FEMALE INTIMATE CARE

PARTNERSHIP PROPOSAL

A natural biological solution for *intimate health*

An MDR-certified portfolio of hormone-free vaginal suppositories —
built on biologically active natural ingredients, designed to restore
balance at every stage of a woman's life.

CE / MDR Certified Medical Devices

Hormone-free · Fragrance-free

For Women's Balance

Women are moving away from harsh treatments — toward *natural, hormone-free* intimate care.

01

A growing demand

A rising number of women actively seek non-pharma, hormone-free options for everyday intimate health.

02

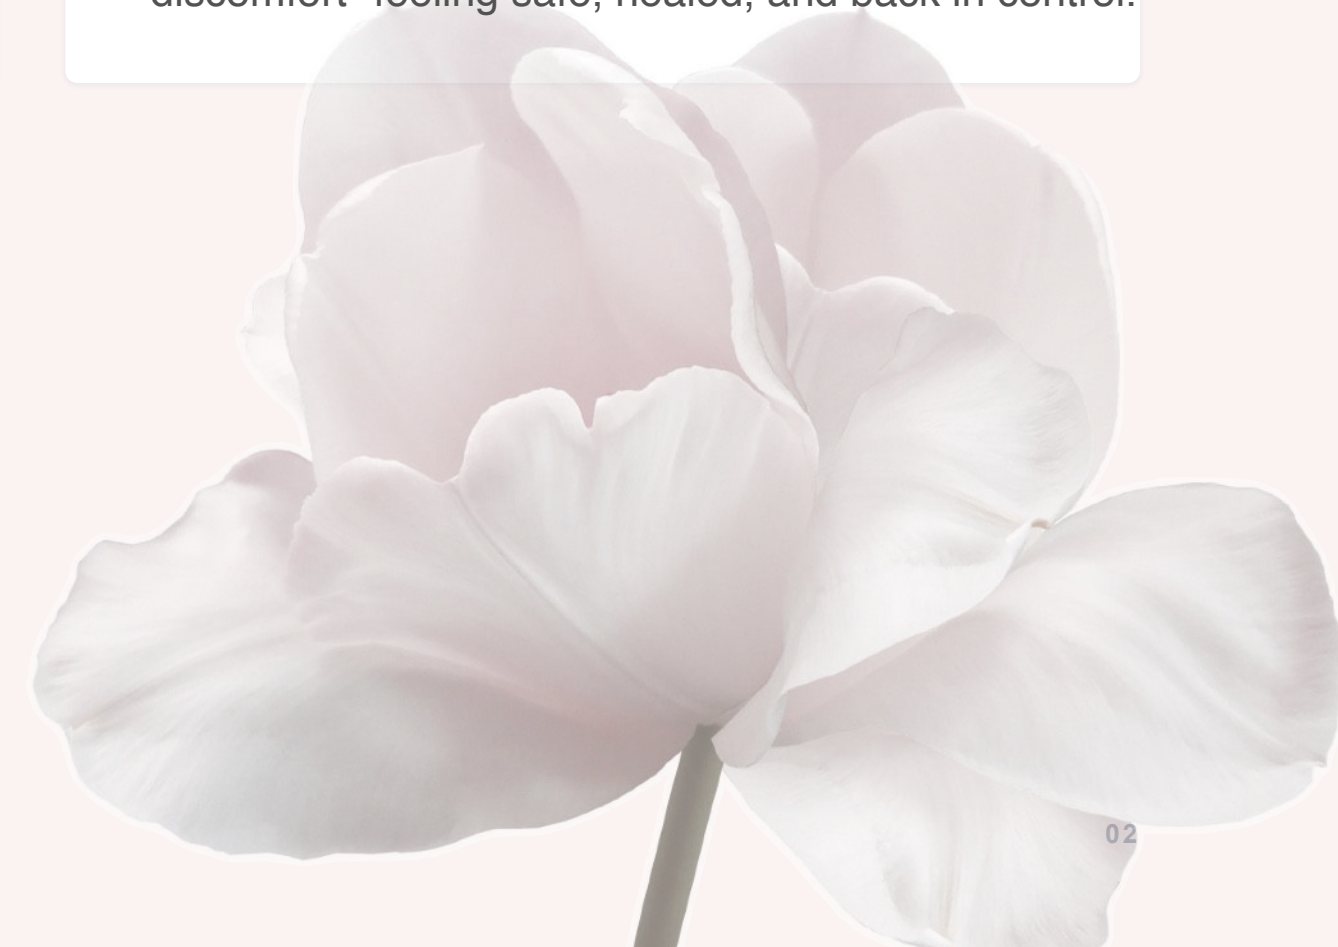

An underserved need

Especially relevant for women with sensitive skin, hormonal shifts, or pregnancy-related sensitivity.

03

An emotional outcome

Gyntima helps women break the cycle of recurring discomfort- feeling safe, healed, and back in control.

One trusted brand for every stage of a woman's life

Gyntima offers a full spectrum of natural, biologically active vaginal suppositories- formulated to respond to specific needs across a woman's lifetime.

- Maintains the natural vaginal balance
- Soothes itching, burning & discharge
- Relieves dryness, promotes hydration
- Helps prevent & manage infections
- Eases menopausal & postpartum discomfort
- Gentle, effective daily intimate care

Gentle. Targeted. Designed to *restore*, not suppress.

Unlike harsh treatments that kill all bacteria — including the good ones — Gyntima creates the right conditions for the natural flora to recover and thrive.

- Does **not disrupt the entire flora** like antifungal drugs (e.g. clotrimazole)
- Built on **biologically active natural ingredients** — tea tree oil, lactic & hyaluronic acid
- Suitable for **sensitive users** — even during pregnancy & breastfeeding
- Breaks the cycle of **recurring thrush, irritation & dryness**
- Free from **synthetic hormones, fragrances**
- Developed as **medical devices** — backed by function, not cosmetic claims

Certified to the EU Medical Device Regulation — the unmatched OTC standard.

Four targeted products, one natural system

Each suppository targets a distinct need — sharing the same hormone-free, biocompatible foundation.

Probiotica

MICROBIOME SUPPORT

Restores & maintains healthy vaginal flora after antibiotics or infection.

Probiotica Forte

ANTISEPTIC STRENGTH

Tea tree oil & sage for bacterial and fungal regeneration.

Hyaluronic

DEEP HYDRATION

Intensive moisture & mucosal regeneration for dryness, healing.

Menopausa

HORMONAL TRANSITION

Soy isoflavones, hyaluronic & lactic acid for menopausal balance.

10 suppositories per pack | Classified as Medical Devices | Hormone-free & fragrance-free

GYNTIMA · 05

Probiotica

Supports the restoration and maintenance of vaginal flora — especially after antibiotics, infections, or hormonal changes — with a formula that is both gentle and effective.

KEY INGREDIENTS & BENEFITS

- **Biocompatible base** — promotes an environment for healthy bacterial growth
- **Sage extract** — anti-mycotic, anti-inflammatory, antiseptic & moisturizing
- **No hormones or fragrances** — well tolerated, suitable for long-term use

RECOMMENDED IN CASES OF

- After antibiotics or strong disinfectants
- Milder bacterial vaginosis, discharge or discomfort
- After intercourse or swimming
- As part of a regular prevention routine

10 Suppositories

Medical Device

1 / day · 10-day course

"Natural microbiome support for intimate balance and comfort."

GYNTIMA · 06

Probiotica Forte

Supports the natural regeneration of the vaginal microbiome by creating an optimal environment for healthy lactobacilli — combining plant-based antiseptics with a physiological base.

KEY INGREDIENTS & BENEFITS

- **Tea tree oil & sage** — natural antiseptics, effective against bacteria & fungi
- **Biocompatible base** — supports the natural conditions for lactobacilli to thrive
- **Relieves itching, burning & discharge** — no hormones or fragrances

10 Suppositories

Medical Device

Treatment & Prevention

RECOMMENDED IN CASES OF

- Vaginal discharge of unknown origin
- Mild thrush, bacterial vaginosis or discomfort
- After antibiotics, swimming or intercourse
- Irritation linked to hormonal changes

GYNTIMA · FEMALE INTIMATE CARE

ANTISEPTIC STRENGTH

"Natural support for bacterial and fungal infections."

"Deep hydration and regeneration for dry, sensitive vaginal mucosa."

GYNTIMA · 07

Hyaluronic

Provides intensive moisture and supports natural regeneration of the vaginal mucosa — especially valuable in cases of hormonal imbalance, vaginal atrophy, and postpartum or post-infection sensitivity.

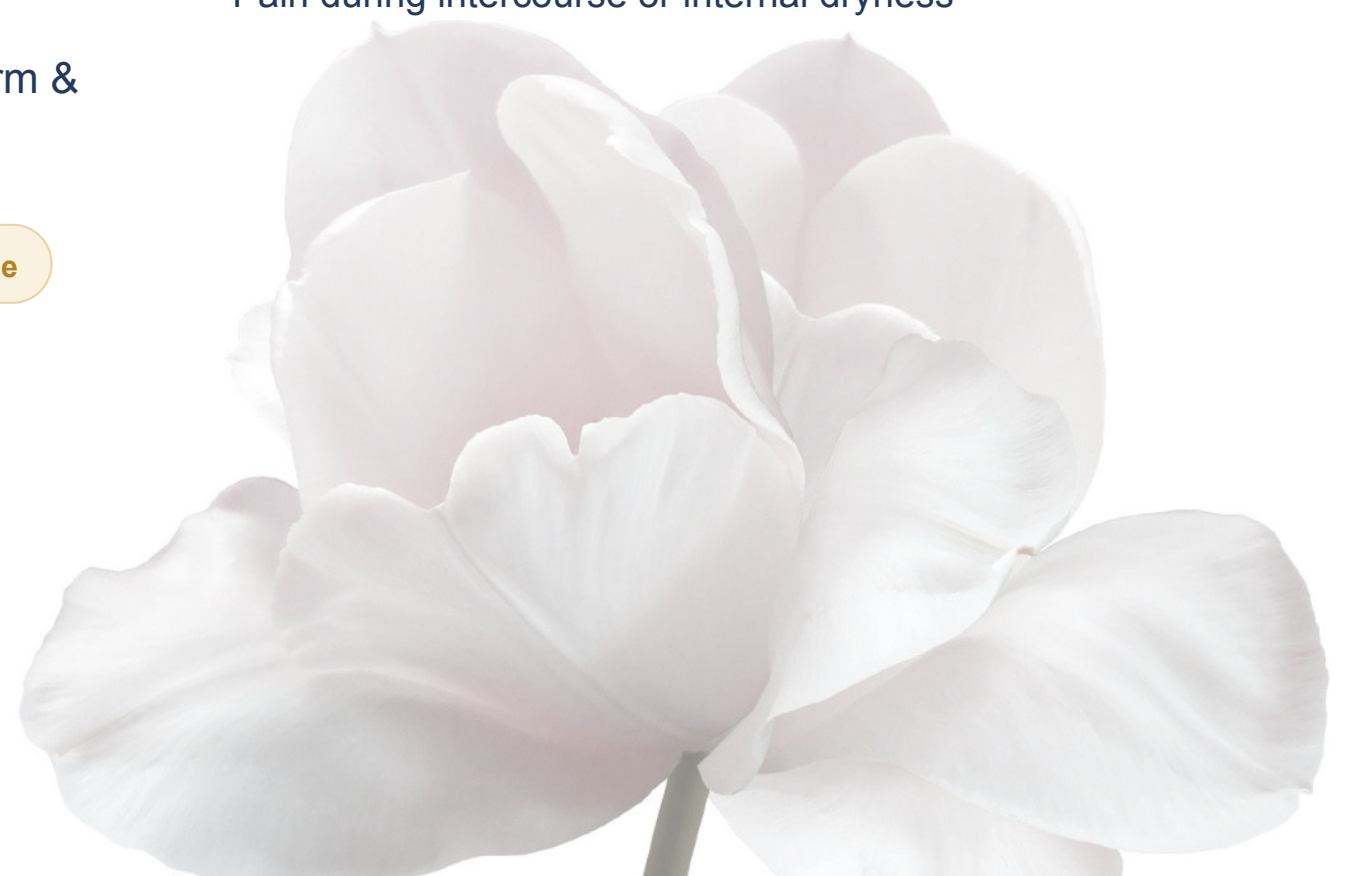

KEY INGREDIENTS & BENEFITS

- **Hyaluronic acid** — deep hydration, tissue regeneration, improved elasticity
- **Biocompatible base** — supports the natural conditions for lactobacilli
- **Hormone- & fragrance-free** — suitable for long-term & preventive use

10 Suppositories Medical Device 1 / day · 10-day course

RECOMMENDED IN CASES OF

- Dryness & atrophy from menopause or breastfeeding
- Pregnancy & postpartum recovery
- Chemotherapy or medication-induced mucosal damage
- Pain during intercourse or internal dryness

GYNTIMA · 08

Menopausa

Combines soy extract, hyaluronic acid and lactic acid to restore moisture, relieve dryness and support natural balance during hormonal transitions — without the use of synthetic hormones.

KEY INGREDIENTS & BENEFITS

- **Soy extract** — plant-based estrogen-like isoflavones that restore moisture
- **Hyaluronic acid** — deeply hydrates & regenerates thinning, atrophic tissue
- **Lactic acid** — supports natural vaginal pH & microbial balance

10 Suppositories

Medical Device

Hormone-free

RECOMMENDED IN CASES OF

- Menopausal & perimenopausal vaginal symptoms
- Vaginal dryness, irritation & atrophy
- Pain during intimacy & daily discomfort
- Women avoiding or unable to use hormonal creams

GYNTIMA · FEMALE INTIMATE CARE

HORMONAL TRANSITION

"Plant-based support for menopausal dryness and discomfort."

A natural, female intimate care portfolio, ready for the OTC *market*.

Certified

CE / MDR medical devices, meeting the EU's most demanding OTC standard.

Differentiated

Hormone-free, natural and biologically active — distinct from antifungal drugs.

Complete

Four targeted SKUs covering microbiome, hydration and menopause needs.

Proven

A loyal customer base with strong repeat purchase and subscription behaviour.

The unmatched OTC product.
Certified to the EU Medical Device Regulation.
