MANAGEMENT

For more than 40 years, leading healthcare companies around the globe have worked with us to extend their pharmaceutical and nutraceutical product lines as well as to grow their brands.

Our sister company HERMES ARZNEIMITTEL has a rich portfolio of successful OTC brands and a history of more than a hundred years in pharmaceutical excellence. This heritage makes HERMES PHARMA a reliable and experienced partner who truly understands the challenges of its customers.

We work with clients in many different ways – from co-developing brand-new products for specific requirements to licensing products that we have developed in-house. On the following pages you will find a choice of products available for you to in-license. If you are looking for a specific product that is not on this list, please contact us.

We have started developing formulations with alternative natural ingredients and sugar substitutes such as stevia. Please see pages 14 & 15, and contact us for further details!

USER-FRIENDLY DOSAGE FORMS

Tablets and capsules have long been a simple and cost-effective way of drug delivery. However, depending on their size, shape and surface texture, more than 50% of people find them uncomfortable or even painful to swallow.

User-friendly dosage forms are designed to suit modern patients and consumers, offering ease of swallowing, choice and convenience, plus a selection of flavors. They are not only a smart solution for people who dislike or simply cannot swallow tablets. They also support healthcare companies to revitalize ageing products, boost brand loyalty and differentiate products from the competition.
