

IBUPROFEN

AMSAL 400 mg

Effective relief from pain, inflammation and fever

Ibuprofen 400 mg provides effective **symptomatic relief** from **mild to moderate pain**, **reduces** inflammation and helps **lower elevated body temperature**.

10 film-coated tablets

Indications:

- Headache and migraine
- Dental pain
- Menstrual pain
- Back pain
- Muscular and joint pain
- Pain associated with minor injuries
- Fever and pain associated with the common cold and influenza

Ibuprofen is a non-steroidal **anti-inflammatory** drug (NSAID) that inhibits **cyclooxygenase enzymes** and **reduces** the **production** of prostaglandins—mediators **involved in pain, inflammation and fever**.

Three Key Therapeutic Effects

Analgesic: Helps relieve mild to moderate pain.

Anti-inflammatory: Reduces inflammation and associated discomfort.

Antipyretic: Helps lower elevated body temperature.

Fast. Effective. Trusted.

Ibuprofen is a **well-established** active substance with **proven analgesic, anti-inflammatory and antipyretic** properties.

Its **broad range** of indications makes **Ibuprofen 400 mg** a practical choice for the **symptomatic treatment** of common **painful and inflammatory** conditions.

Why Choose Ibuprofen 400 mg?

- **Effective relief from different types of pain**
- **Anti-inflammatory action**
- **Reduction of fever**
- **Well-established efficacy**
- **Convenient 400 mg strength**

Recommended Use: For adults and adolescents: *12 years of age and older weighing at least 40 kg:*

Take **one 400 mg** tablet as **needed**. The interval **between doses** should be at **least 6 hours**.

Do not exceed 1,200 mg within **24 hours** unless otherwise **advised** by a **healthcare professional**.

Use the lowest effective dose for the shortest duration necessary to relieve symptoms.

Reliable relief when pain gets in the way.
