product lifecycle.**

Your One Partner Benefits

Aseptic Fill & Finish and Terminal Sterilization

Access fully-integrated capabilities, advanced technologies, and flexible support for multiple programs at any scale and stage.

Analytical and R&D Services

Be early to market by making use of our R&D lab for efficient development & seamless transfer between non-GMP & GMP formulated drug products.

Regulatory Support

Leverage regulatory expertise to manage your product's compliance at every step, backed by a strong regulatory track record.

Packaging & Logistic Services

Profit from our dedicated capabilities for secondary packaging and current serialization technologies with highly flexible distribution systems.

Trusted Quality & Compliance

Rely on our commitment to seek the highest standards of quality & compliance as the foundation of all our activities and projects.

End-to-End Partnership Made Easy

Benefit from a single point of contact throughout your project for both APIs and drug products, streamlined process collaboration and aligned project management across our network.

Early Development to Clinical Stages

At CordenPharma Caponago, our **dedicated team of skilled professionals** designs tailored programs to match your product's lifecycle stage and specific needs. **With extensive development experience**, our formulation and analytical team delivers **robust methods and processes**, whether it is a technology transfer, a refinement of your existing formulation, or the developing of a custom formulation from scratch. Operating from our **large state-of-the-art R&D lab**, our experts ensure your project progresses swiftly and efficiently - on time and on target.

Clinical Injectable Manufacturing

Our clinical aseptic fill & finish facility in Caponago (IT), offers a **wide range of injectable drug product formats**, including PFS, vials and cartridges.

Our dispensing & compounding area has the flexibility to conduct batch formulation with either fixed stainless steel vessels or cutting-edge single-use disposables.

The filling area leverages Nest & Tub technology and offers either classical mechanical pumping heads or the latest peristaltic technology – whichever your product requires to be successful.

Commercial Manufacturing

Our aseptic processing facility equipped with multiple filling lines supports **batch sizes from less than a thousand to over a million units** in PFS, cartridges, vials, and Nest & Tub RTF formats. Compounding can be performed in stainless steel or disposable systems after API dispensing in humidity and temperature-controlled glove boxes. **Lyophilization and automated visual inspection** are available if needed.

With over 25 years of regulatory-inspected expertise and a **variety of advanced technologies** (open RABS, isolators, terminal sterilization) we offer you the flexibility you need for your product and process – cost-effective, safe and efficient.
