

KidBrain

Food Supplement

KidBrain is a food supplement specially developed for children aged 1 year and above.

It contains **Omega-3** and **Omega-6 fatty acids**, including **DHA**, **EPA** and **ARA**, carefully selected to support children's nutritional needs during the early years of life.

DHA

DHA (Docosahexaenoic Acid)

An important structural component of the brain and retina, supporting normal brain and visual development.

ARA

ARA (Arachidonic Acid)

An Omega-6 fatty acid naturally present in the body and important during periods of growth and development.

EPA

EPA (Eicosapentaenoic Acid)

Specifically supports for cellular structure and function, neurological and cognitive development, and immune health.
