

KOMCYST

For management of Polycystic Ovary Syndrome (PCOS)

- *Corrects insulin resistance and hyperinsulinemia*
- *Brings down hypercholesterolemia*
- *Normalizes symptoms of acne, irregular menstrual cycle and slows the growth of abnormal hair*

Parameters	Furocyst	Myo Inositol
Improvement of insulin resistance	Yes	Yes
Reduction of circulating insulin	Yes	Yes
Primary outcomes: fasting insulin concentrations	Reduced	Reduced
Secondary outcomes: HOMA index	Reduced	Reduced
Secondary outcomes: testosterone level	Reduced	Slightly reduced
Secondary outcomes: androstenedione level	Reduced	No effect
Secondary outcomes: SHBG plasma level	Increased	No effect
Supplementation time for effects	8 Weeks	24 Weeks
FSH -> LH Conversion	Directly Supports	Indirect effect
Combination Therapy	Not needed	MI/DCI 40:1 Works better
History of use as food	Thousands of years	Less than 20 years

KOMCYST

Clinical Evaluation of Komcyst, containing Furocyst.

Efficacy conclusions carried out on 107 patients

- The left ovary volume was decreased significantly up to 23.78%
- The mean cyst size in the right ovary was reduced significantly up to 41.57% & right ovary volume decreased up to 44.92%
- Fifteen patients got pregnant during the study & complete dissolution of cysts was observed in 8 patients.
- HOMA index also reduced significantly in 75.67%.
- 79.5% of the study population had regular menstrual cycle.
- Mean Prolactin levels were significantly decreased.

Efficacy conclusions carried out on 50 patients

- Fenugreek seed extract caused significant reduction in the ovary volume.
- 46% of the study population showed reduction in the cyst size.
- 36 % of the study population showed complete dissolution of the cysts.
- 12% of the patients got pregnant.
- 71% of the patients reported regular menstrual cycle on completion of the treatment.
- Overall 94% of the patients reported positively or got benefitted from the fenugreek extract dosing.

Safety conclusion

Both studies showed that Komcyst, containing Furocyst, was safe for consumption and it had no known side effects.

How Do We Make Komcyst

Sourcing the best seeds

Unlike other sources that tend to be "wild-crafted" and result in unpredictable ingredient quality, our fenugreek seeds are grown on pesticide-free farms.

Test it by Quality Control before release

Every batch of Komcyst is tested at the in-house Quality Control lab to ensure the best quality.

Extracting Active component

Komcyst is an innovative product involving separations of active ingredients from the natural plant without affecting chemical properties of the active fractions. No chemicals amused.

Regulatory solidity

We take it a step further by ensuring complete safety and efficacy of our products. Komcyst, containing Furocyst is backed by clinical studies and 5 international patents.

Ingredients: Fenugreek seed extract: 500mg

Directions for use: Take one to two capsules daily with meals.

1 box contain 30 capsules.

Made In EU
