

Ligand Families

Navigate small molecules by ligand family or scaffold to build focused sets and explore structure-activity relationships. This category groups related chemotypes, helping you select analogs, fragments, and tool molecules for discovery research.

24,230+ Ligand-Related Products

Covering natural products, metabolites, PROTACs / molecular glues, immune ligands, Wnt ligand families, FDA-approved ligands, and more.

How to Choose a Ligand Family?

A

Define the
Research Question

Target /pathway/
phenotype /disease focus

B

Choose an
Entry Point

Browse by family,
scaffold, or tool molecule

C

Conduct SAR &
Optimize Screening

Compare analogs and
optimize lead directions

Ideal for
SAR Research

Support analog
comparison and
structural optimization

Facilitates
Targeted Screening

Quickly locate
relevant ligand f
amilies

Supports Custom
Recommendations

Catalog recommendations
tailored to
your project

On-Site Consultation

Find the ligand family solution best suited to your project
