

MAGNESIUM COMPLEX

Magnesium is an essential mineral.

Magnesium contained in cells is vitally important as an essential cofactor for more than 600 enzymatic reactions which are necessary for the regulation of various biochemical reactions in the body.

The **Magnesium Complex** is a mixture of five different organic and inorganic Magnesium compounds. It includes Magnesium Bisglycinate, TriMagnesium Dicitrate, Magnesium Malate and Magnesium Ascorbate as well as Magnesium Oxide.

Each of the above-described Magnesium Salts has its specific features. They support different functions of the body and may immediately effective or delayed. The premixes combine the advantages of different Salts in a single product and optimize the supply with the Mineral Magnesium.

Nutritional information	Amount per two capsules	% NRV*
*Magnesium	375 mg	100%
*Total elemental magnesium from 1290 mg of Magnesium Premix		

1 bottle contains 60 capsules.

Directions for use: Take two capsules daily.
