The Future of *Pichia pastoris*: METHANOL - FREE INDUCIBLE PROTEIN PRODUCTION

Transform Protein Production with the my*Pichia* Platform

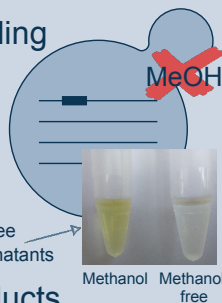

Traditional *Pichia pastoris* protein production relies on methanol, a toxic, flammable inducer that poses safety risks, increases production costs, and complicates regulatory compliance.

The **my*Pichia* Platform** enables methanol-free inducible protein production, revolutionizing *Pichia pastoris* for safer and more efficient bioprocessing.

Why Choose the my*Pichia* Methanol - free Platform?

- ✓ **Safer Manufacturing:** No hazardous methanol handling
- ✓ **Non-Toxic Inducer:** Safe, biocompatible inducers
- ✓ **Lower Costs:** Cuts methanol and safety expenses
- ✓ **Regulatory Advantages:** Eases global compliance
- ✓ **High Titrers:** Boosts protein yields
- ✓ **Simplified DSP:** Less secretion of pigmented byproducts

Go *Pichia*! - Go Methanol - Free!
