HARNESS THE POWER OF *PICHTIA PASTORIS* FOR TAILORED PROTEIN SOLUTIONS

WHO WE ARE

At myBIOS, we specialize in recombinant protein production using the powerful *Pichia pastoris* yeast system. Renowned for its high expression levels, efficient protein secretion, and capability for complex post-translational modifications, *P. pastoris* is perfect for producing diverse proteins, from enzymes to therapeutics. Our expertise in strain development and process optimization ensures we effectively meet the varied needs of researchers and industry professionals.

OUR SERVICES

Strain Development

Tailored Protein Production

Bioprocess Optimization

Bioreactor Cultivations

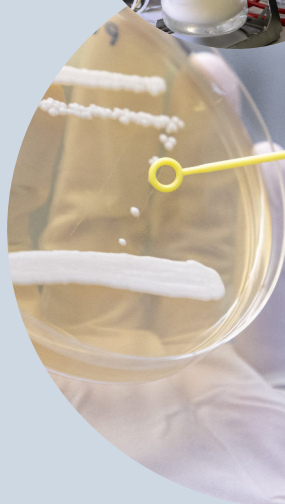

Genome Sequencing

Assay Development

WHY CHOOSE US?

- ✓ Personalized service designed for your specific project
- ✓ Extensive technical expertise with *P. pastoris*
- ✓ No hidden costs, royalty - free, proprietary tools
- ✓ Antibiotic- and methanol - free inducible processes
- ✓ Scalable solutions from research to production

Ready to transform your protein production?
Contact myBIOS today and let's start your project!
