Yaveon 365 for the Pharmaceutical Industry

Pharmaceutical companies face stringent regulations on a daily basis. The gathering of ever more information, meeting rigorous quality demands, and strict process monitoring is ever more time-consuming. Not to forget change controls, computer system validation, and much more. To summarize, they face numerous challenges. Can an ERP solution help with this? Yes. At least, if it's the right one. The most important criterium is that it must meet the requirements of your industry.

The Base: Microsoft Dynamics 365 Business Central

Made for SMBs

Microsoft Dynamics 365 Business Central is not just any ERP system, but one that is tailored to the needs of small to medium-sized businesses. In other words, you work with a solution that suits you, and that isn't complicated by unnecessary functions and fields.

Use It – Immediately and from Anywhere

No installation is required; you can start immediately – because Yaveon 365 works via a webclient. As the system is also available as an app on all mobile devices, you can use the functions at your desk, on the train, or even on a bench in the park.

Navigation: Intuitive

Almost everyone knows Excel, Word, and PowerPoint, and understands, at least for the key functions, how to use these programs. So why use an ERP system that is completely different? Microsoft Dynamics 365 Business Central adheres to the typical Microsoft design. Which means the navigation and usage of the solution are intuitive.

Shut Down Stand-Alone Solutions

Microsoft Dynamics 365 Business Central is fully integrated into your Microsoft 365 package. This means that you no longer need stand-alone programs that run parallel to each other. Instead, you get a single solution with a uniform structure – all in one system. These include, for example, the integration of Microsoft Power BI and the Dynamics 365 sales solution. von Microsoft Power BI und die Dynamics 365 Sales-Lösung.

A Secure Investment

Microsoft is tried and tested: More than 3.3 million users rely on the Microsoft ERP system – and have done so for many years. Business Central is the latest version of the solution, which was launched over 30 years ago. It's undeniable: With Microsoft, you're banking on experience and longevity at the same time. That's a safe investment.

Ok, that makes sense.

The next question is: If Microsoft Dynamics 365 Business Central is so perfect, why do you need an additional industry solution, and one which takes time and money to set up?

Modifications? Easily Done

Whether adding more employees, restructuring, or just new requirements, companies change, and with them, your expectations of an ERP system. Don't worry; you don't have to start new ERP projects on a regular basis to meet these needs. Microsoft Dynamics 365 Business Central changes with you, making the entire system scalable. If you need more users, just add them in. If you need more features, simply add as an app – future updates are, of course, still possible.

Do You Really Need an Industry Solution?

To be honest, not for everything. There are many processes that you can map with Microsoft Dynamics 365 Business Central. But to actually and sustainably facilitate your everyday work, you need additional functions that are specially adapted to the pharmaceutical industry. Providing you with a solution adapted to your company, not one to which your company has to adapt. An industry solution is, therefore, more than just a possible add-on. It is an ERP extension that brings you an unbeatable argument: better results with less work.

An Industry Solution Means a Specialized Industry Partner

Features are one thing; consulting is another. A good ERP solution for the pharmaceutical industry comes from a vendor that is as at home in your industry as you are. Because only then does the vendor know what really matters. And this brings advantages. You communicate on an equal footing, your concerns are met with understanding, and you benefit from the experience of your software partner.

successfully, you need a partner who knows their way around. This builds trust and a sense of community because consulting is only effective if it provides real answers. Or would you have your building rewired by a painter?

Can Yaveon Do All This?

Numerous projects, many audits, and consultants who draw on many years of knowledge in the pharmaceutical industry. Our employees know their way around your industry and how to avoid stumbling blocks. This knowledge comes from three sources: Professional training and development, regular department meetings, and project experience. Because changes are often required, especially in a regulated environment, it is essential to be up-to-date. To carry out an industry project

The Essential Functions Covered by Our Industry Solution

- Key industry functionalities are included.
- Meets regulations and requirements. If these change, the solution is ready for necessary adjustments.
- You use a role-based interface. Every employee sees the functions and data that are necessary for their area.

The Most **Important Reasons** Why Yaveon 365 Is Just Right for You:

Reasons 01-03

01

Work Reliably and Transparently: **Computer System Validation (CSV)**

CSV: indispensable in the regulated environment and yet extremely complicated. Yaveon makes this easier – because our solutions are specially developed for this purpose. The process is simplified by extensive documentation and our consulting expertise. This reduces your workload and ensures a smooth validation process.

02

Meet Regulations: Fulfill Compliance Requirements

The be-all and end-all in the pharmaceutical industry: Regulations and the requirement to meet them – and of course, that goes for software too. Yaveon 365 meets all the required standards, and the dedicated compliance app offers everything you need when it comes to complying with all regulations.

03

Highest Standards: Quality Inspection

When it comes to quality, you don't compromise – and neither does Yaveon 365. From the incoming raw materials goods inspection to the inspection of semi-finished or finished goods, and the monitoring of cleanrooms or equipment – the solution digitizes your quality management. The QM module also offers the possibility to combine information in one system and manage it with the batch data.

04 Save Time, Money, and Paper: [Electronic Signature](#)

Save valuable resources with electronic signatures, based on the dual control principle (one or two person rule). Because the signature is completed faster, and you don't need paper or postage stamps. The electronic signature also offers security in all relevant processes – an unbeatable argument.

05 Keep all [Batches under Control](#): Batch Management

Do you want or need to keep control of which batch was used when, under which conditions, and for which process, and do you want to connect all this information centrally in one system? Yaveon 365 combines a variable set of rules and freely definable batch statuses that can be used to standardize your processes.

06 [Support the Process Industry](#): Everything for SMBs in the Life Sciences

Yaveon 365 is not just any software. It is a tailor-made ERP solution for SMBs in the life sciences industry. It includes all the important options that make your day-to-day work easier and more secure.

The Yaveon 365 Modules Are Available as Individual Apps. Why Is That?

All Possibilities – With Low Complexity

You have decided to implement an ERP system – but do you really need all the features? Not necessarily. Because Yaveon lets you choose individual apps, you get exactly the features you need for your work.

Scalable

Demands change – just like your ERP features. If required, simply add further apps and take advantage of even more possibilities with Yaveon 365.

In Stages Instead of All at Once

Adding features gradually doesn't only mean you benefit from more options when you need them. As you extend Yaveon 365 as needed, your users increase their familiarity with the solution, and it becomes an integral part of their everyday work.

The Full Program

Many apps, many possibilities. Yes – and if you prefer, all at once. You still benefit from the advantages of a modular implementation, but it's all done in a shorter project timeframe.

Future-Proof

The software world has arrived in the cloud. That's why Business Central, 365 and our apps are of course cloud-ready and are kept up to date with regular updates.

Yaveon 365 – Top 10 Modules for the Pharmaceutical Industry.

Compliance

Meet the high demands of a regulated environment and comply with statutory regulations and standards.

Vendor Scorecard

Yaveon 365 as a Software as a Service in the Cloud

Yaveon 365 as SaaS in the Cloud

Welcome to the age of Software as a Service! Worried about data leaks and outages? No need.

Because all our systems meet the important security standards. Flexibility, future-proofing and the ability to grow with you: solutions in the public cloud are the ideal basis for you to use your ERP in the long term and remain successful in the long term.

The Most Important Facts About the Public Cloud at a Glance:

- Public Cloud on [Microsoft Server](#) „Azure“
- Software as a Service (SaaS): Infrastructure is provided in full, maintenance work, back-ups and further developments are outsourced. IT departments gain time for their actual tasks.
- Enables scalability and provides flexibility.
- Payment possible as a monthly or annual subscription.
- Distribution of total costs over several years.
- Regular [localized compliance, governance and security updates](#).
- Prevents data loss.
- [Failure and data security are ensured](#).
- System is always „up-to-date“ thanks to automated updates.
- No more manual updates and/or new projects necessary.

How Does a Yaveon 365 Project work?

As you spend a lot of time with your consultants during the project phase, it is vital that you can work well together. For this reason, you will get to know your key consultant and our proven project methodology Yaveon ProCedures before the project begins, because who wants to buy a pig in a poke?

Presentation System and Comparison with Requirements

The first step is to get to know the system, and compare requirements with capabilities.

Get to Know the Project Team

The chemistry must be right. That's why you should get to know your Yaveon consultant right at the start.

Project Launch

Ready, steady, go: Together, we start full steam ahead and begin the joint ERP project.

Implementation

Now it's time to get down to business: The Yaveon 365 implementation is the core of your project.

Tests

Testing, testing, testing. Processes and functions are checked several times to ensure that everything runs smoothly.

Go-live

The big day has come: Together, we implement the real start of Yaveon 365.

Service and Support

Once the system is in use, the support phase begins. If you have any questions, Yaveon support is there for you.

Different company sizes, different requirements: Every ERP project is different. But they all have one thing in common: they involve the full expertise of our team:

- Experience from over 550 customer projects
- Maximum know-how in all aspects of computer system validation
- Expert in the process and batch processing industry
- Large project team in Germany and Switzerland
- Solution in use worldwide via extensive partner network

That's What Our Customers Say

"The Yaveon team knows HELM inside out, and that is incredibly valuable. And of course, we also appreciate the advice. Rather than blindly following instructions, our consultants tell us honestly if they see a more effective route to reach our goals. That's what I call proactive consulting."

Gerry Wallner und Andreas Lübbe

"The Yaveon consultation was and is always very detailed. Our concerns are dealt with quickly, which is particularly important for us."

Shami Kaur Bola

"It was clear from the first second that the consultants at Yaveon were knowledgeable about validation. Right from the start, the cooperation was excellent, and we were on the same page."
