# What is Valens™ AH 2.0?

Valens AH 2.0 AVAILABLE NOW!  
Valens AH 2.0 HA  
High adsorption version - coming soon - expected Q1 2026

Valens™ AH 2.0 is a **high-performance aluminium hydroxide adjuvant** containing 2% aluminium oxide, specifically designed for human vaccines. Its positive surface charge enables efficient antigen adsorption, enhancing antibody-mediated immune responses, and it can be combined with other components to stimulate additional immune pathways. Part of the Valens range, it offers proven performance with reliable, scalable supply you can trust.

## Key Highlights

### High Purity & Low Bioburden

- Sterilized via irradiation for reliable quality

### Customizable

- Flexible volumes & packaging, including sterile biobags

### Exceptional Quality, Consistency & Scalability

- Produced under excipient cGMP & Ph.Eur compliant

## Why it Matters

- Decades of proven safety in licensed vaccines
- Compatible with other adjuvants for a balanced immune response
- Supported by a well-established regulatory and manufacturing history

## What Makes AH 2.0 Different?

- Custom-tailored packaging solutions (e.g., sterile biobags)
- Proven stability and compatibility testing on demand

## SPI Pharma Advantage

20+ years in vaccine adjuvants

SPI's expertise, backed by strategic partnerships, powers a pipeline of innovative vaccine adjuvants

Secure, scalable global supply

## Ready to accelerate your vaccine development?
