

Nozitix®

Thixotropic Nasal Spray

- For viral infections (including rhinovirus and coronavirus)
- For bacterial infections

Nozitix (10 ml, 200 doses) is a nasal spray with **thixotropic properties** (thixotropy) in the form of an **emulsion based on water and olive oil**.

Indications:

Nozitix nasal spray is used in the treatment of:

- viral rhinitis
- bacterial rhinitis
- allergic rhinitis
- Thanks to its thixotropic properties, it coats the nasal mucosa with a thin, soft protective layer, enabling easy application and better contact of all active ingredients with nasal mucosa.

- **Active ingredients:**
fucoidin, kappa-carageenan, totarol, xylitol, siberian fir essential oil
- **Fucoidin and kappa- carageenan extract from marine algae demonstrate strong antiviral activity against:**
rhinovirus, coronavirus, RSV Virus, influenza virus
- **Totarol is highly effective against bacteria such as:**
S. aureus, S. pneumoniae, Moraxella catarrhalis i H. influenzae.
- **Xylitol inhibits adhesion and growth pathogenic bacteria on the surface of nasopharyngeal epithelial cells:**
S. Pneumonia, H. influenzae, P. Aeruginosa, M. Catarrhalis
- **Siberian fir** essential oil contains natural antibacterial and antiviral substances that protect and support treatment upper respiratory tract infections.
- **Free from synthetic additives:**
