THE NEW LAUNCH OF METABOLIC SYNDROME LINE

This expansion reflects our continued commitment to innovation, evidence-based solutions, and long-term collaboration with our partners in improving public health.

1 in 3 adults

have metabolic syndrome

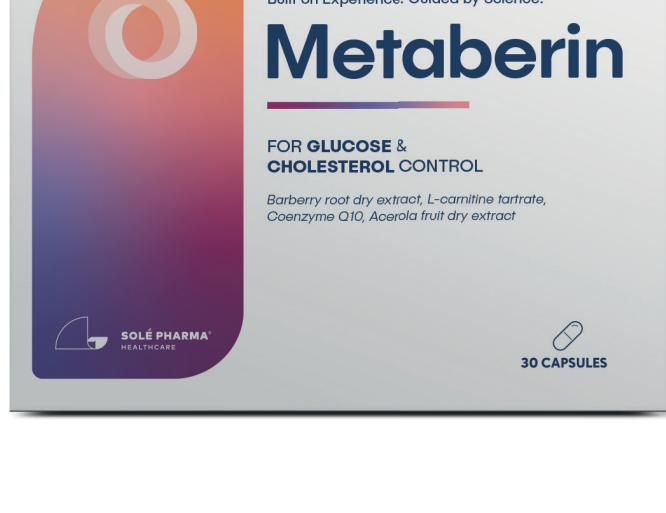

A growing health challenge

Metabolic syndrome — encompassing insulin resistance, dyslipidemia, abdominal obesity, and prehypertension — is one of the fastest-growing global health concerns.

Our new portfolio is designed to meet this need with targeted formulations that support prevention, management, and improved quality of life

First products to be launched under Meta line

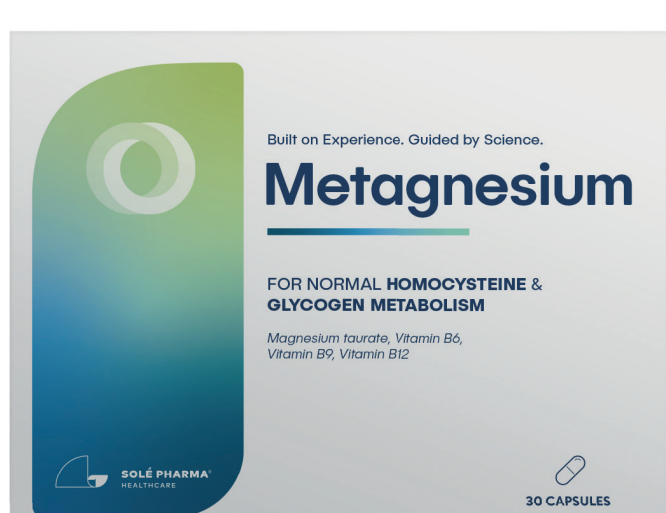

The 'META' branding across the product line signifies our commitment to addressing metabolic syndrome and related conditions

METABERIN for the regulation of glycolipid metabolic disorders

METASITOL supports improved insulin sensitivity in cases of insulin resistance / prediabetes

METAGNESIUM a cardio-magnesium complex with active B-group vitamins to support cardiovascular function

METACARD D3 a combined formula for cardiovascular health, helps prevent calcium buildup in blood vessels and supports overall cardiovascular health

What does the Meta line offer?

RIISING MARKET DEMAND

metabolic risk factors are increasing globally, making this one of the most urgent therapeutic areas

PORTFOLIO EXPANSION

provides a comprehensive metabolic and cardiovascular health range

CROSS-SELLING SYNERGIES line integrates seamlessly into current offerings, opening opportunities for bundled marketing and broader reach

HIGH GROWTH POTENTIAL

targets a large and underserved patient group, creating strong and sustainable growth prospects

DEDICATED SUPPORT

full scientific, marketing, and training resources provided to ensure successful market entry

Next steps together

We are confident that this launch represents not only a significant step forward for Solepharm, but also a valuable opportunity to strengthen partnership and expand impact in the field of metabolic health.

The future of metabolic health lies not in waiting, but in acting early and wisely!
