Significant milestones

CDMO with a global offer to support biopharma companies from R&D to market

We support all your development stages

We have more than **20** years' experience in bioproduction with

a wide variety of expression systems...

Mammalian

Yeast

Bacterial

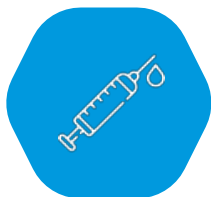

Insect cells

... for wide variety of molecules...

- > mAbs and bispecifics
- > Antibody-drug conjugates
- > Antibody fragments
- > Cytokines
- > Fusion proteins
- > Enzymes
- > Growth factors
- > Antigens

... together with a large panel of industries

LABÈGE

BIOLOGICS | Custom & flexible GMP manufacturing services

Mammalian

Expertise with CHO, HEK

GMP Capacities

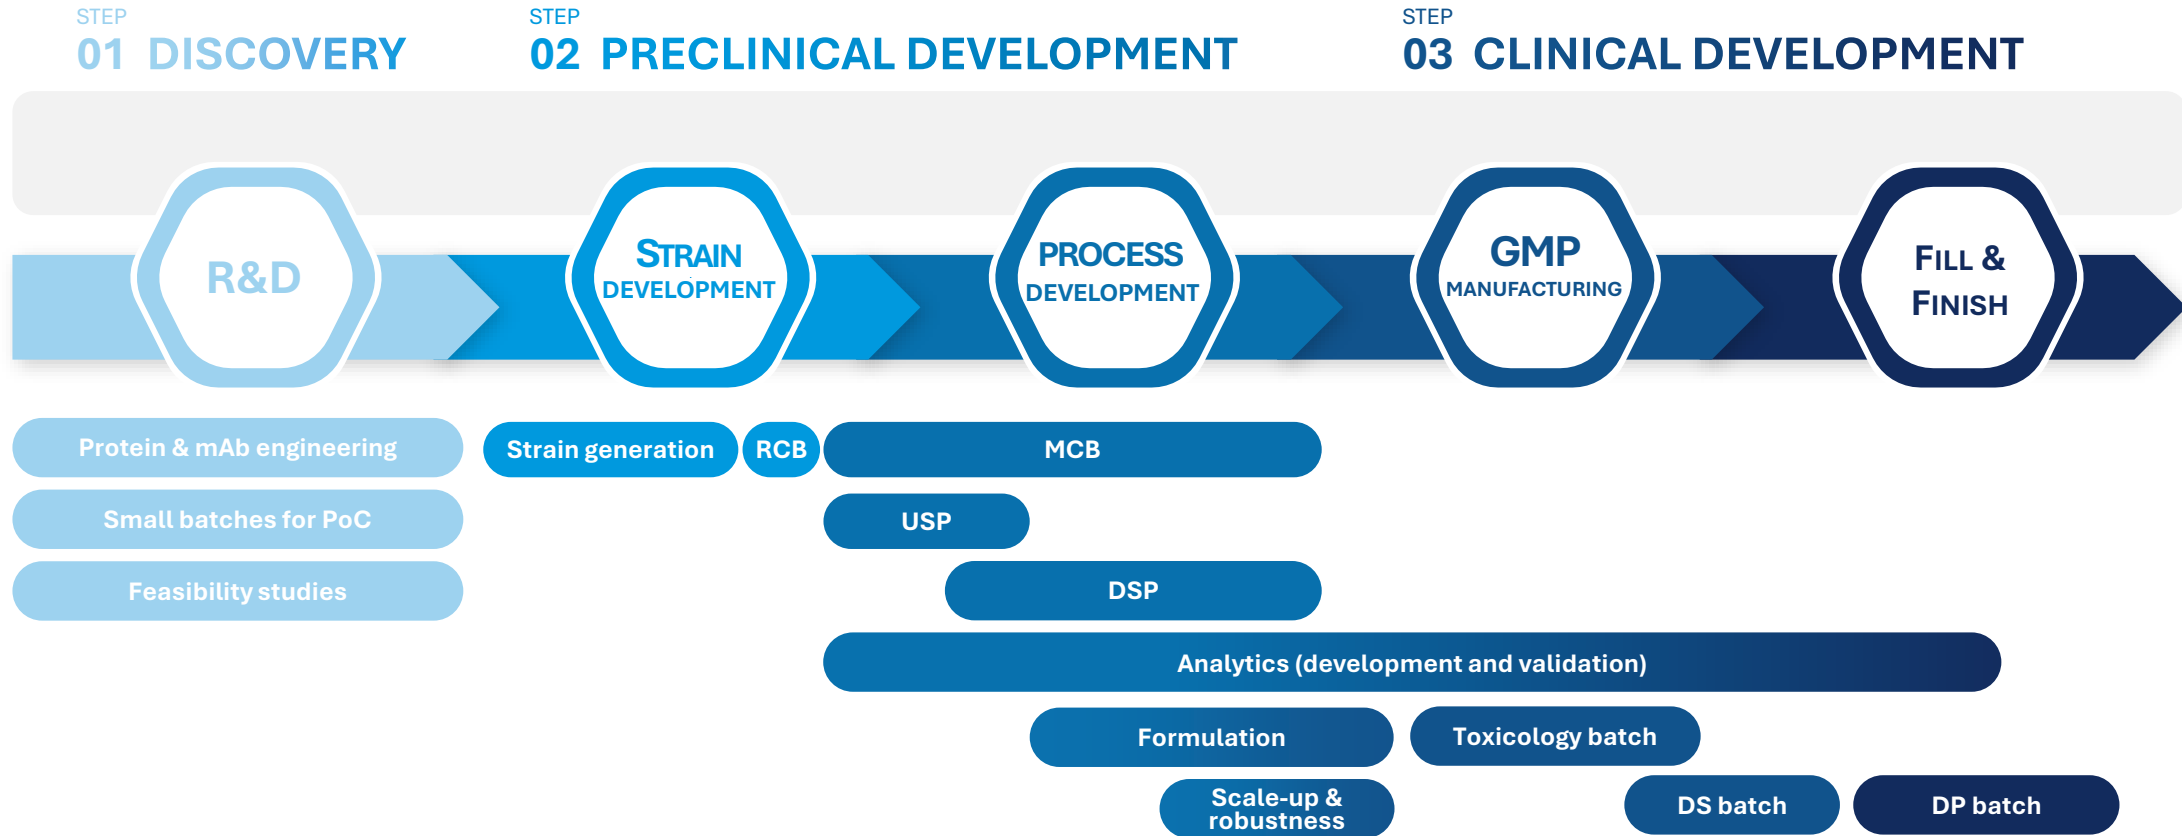

Microbial

Expertise with E. coli, P. pastoris

GMP Capacities

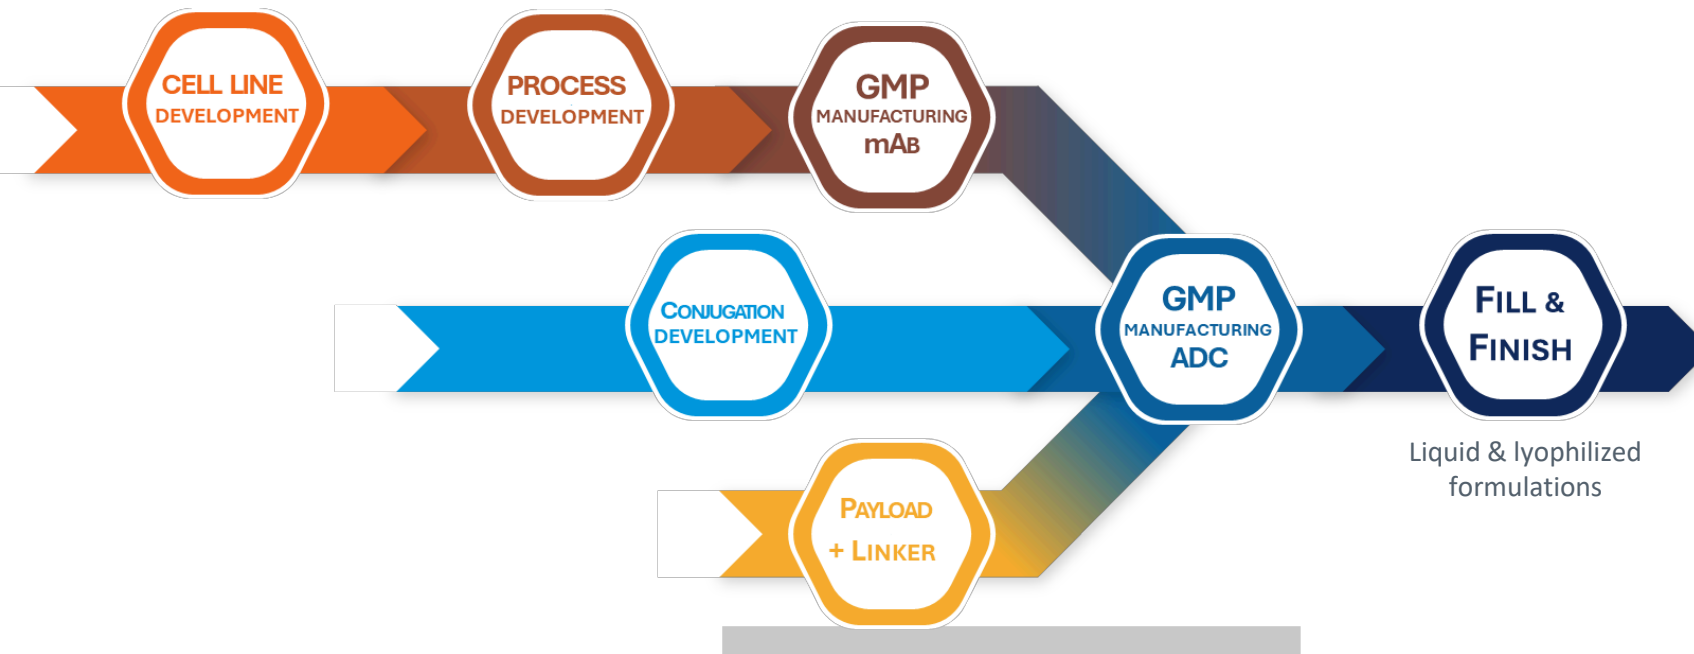

Integrated offer from strain development up to clinic

BIOCONJUGATES | Fully integrated ADC manufacturing offer

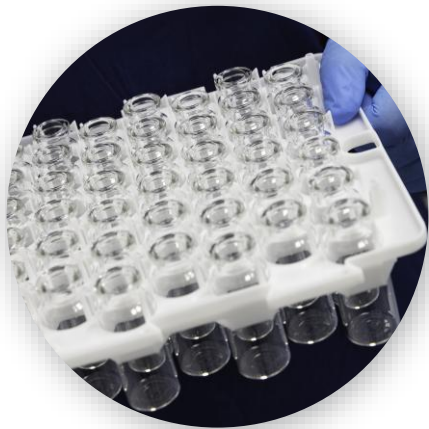

- › Wide range of conjugation technologies
- › Stainless steel reactor for conjugation
- › Production range: up to kilograms
- › Full GMP QC and characterisation support including Mass-Spectro & Cell-Based Assays

Drug product: Vials and pre-filled syringes

Already identified and qualified suppliers for primary containers
(including stoppers, seals, or plungers)

Vials Ready to use vials (in nest or tray)
From 2R to 50R

PFS Ready to use PFS in nest/tub
From 0,5 to 20 mL

HCP RISK MANAGEMENT | Comprehensive HCP management services

Expert custom immunoassays development following EMA/FDA guidelines
& **Trusted analytical partner** (ISO9001 compliant)
