ONDAPLAST: POLYPROPYLENE SPECIALISTS

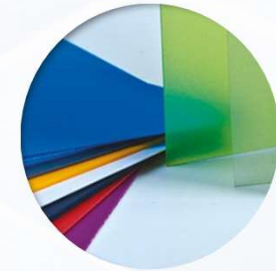

Ondaplast is a leading European company in the sector of PP packaging owning 2 brands:

Polionda®
Corrugated PP

Ondaplaque
Solid PP

Ondaplast means industrial packaging, therefore sheets are also converted into final products such as containers of any kind, packaging, layer pads and so on.

We aim to **constantly grow together with the customers** through:

- Innovative Solutions
- Highest Level of Service
- Total Quality

Investments: (average) 5-6% of yearly turnover

Our investments are made to:

- Increase Production capacity and productivity
- Reduce waste, recycle more and increase overall efficiency
- Develop new technologies and R&D (new materials, new additives)

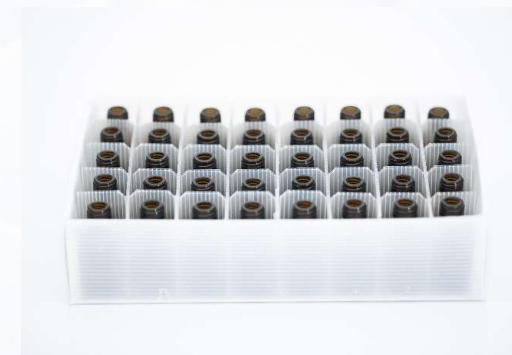

MARKET SEGMENT: PHARMA

Ondaplast is highly focussed on the pharma industry.

The main products are boxes, trays, lids, spacers and other custom solutions.

Every new article is carefully designed and tested to provide top performance and satisfaction.

MARKET SEGMENT: PHARMA

Each Ondaplast plant has its own «Pharma room», with controlled access and environment.

The air is filtered and pressurized, while the technicians receive specific training to respect the highest standards of hygiene.

In these rooms the products are assembled, packaged and inspected before the delivery.

Sustainability

We at Ondaplast are extremely focused on the environmental and social responsibility, a mandatory approach for a long term future.

Part of our Mission is to develop solutions to meet customer's and environment's needs at the same time.

Therefore, we are committed to:

- Reduce the internal waste to zero, through a complete recycling of all our scrap materials
- Reduce the consumption of energy, through the use of solar panels + increased machine efficiency
- Reduce to the minimum the waste by all means
- Use material with the least possible polluting effects
- Buy back post-consume materials (circular economy)
- Develop bio based materials
