ABOUT

We specialise in manufacturing, wholesale distribution and pharmaceutical retail.

The Perfect Care group was established in 2012 with the mission to supply healthcare-related products to both the Romanian and international markets.

Starting with wholesale distribution, over the years our company has significantly expanded its scope, entering the fields of pharmaceutical retail, manufacturing of personal hygiene products, cosmetics, food supplements, medical devices and pharmaceutical products.

Consistent growth and innovation have enabled us to build a robust team, surpassing 200 dedicated employees. Our management consists of a dynamic group of young professionals who are committed, proactive, and always prepared for new challenges.

At Perfect Care, we stand firmly by our core values of integrity, dedication and fairness — qualities that strengthen our relationships and enhance success with our business partners.

Business Cooperation

DISTRIBUTION & MEDICAL PROMOTION

We have a well established distribution network supplying pharmacies, private clinics and hospitals from our four warehouses spread across the country. This enables us to efficiently supply our 250+ corporate customers. We have partners from 35 countries spread out across four continents.

Our medical promotion strategy is supported by a dedicated team of medical representatives who engage directly with healthcare professionals to provide the most recent scientific information, product training and ongoing support to ensure the safe and effective use of our therapies.

LICENSE AND SUPPLY

We out-license our dossiers and manufacture products under our customers' brands, offering comprehensive support during the life-cycle of the products.

CONTRACT MANUFACTURING

We assist our customers with transferring their manufacturing needs to our facilities and provide tailored production services.

MANUFACTURING & LOGISTIC

Perfect Care operates an industrial site devoted to manufacturing creams, gels, vaginal ovules, suppositories, oral solutions, dermal solutions, and nasal sprays, in full compliance with EU GMP guidelines. We are pleased to offer our customers versatile services tailored to their individual needs

Services:

- * Pilot Batch Development: Comprehensive design and coordination for the production of pilot batches for new products.
- * Manufacturing Process Transfer: End-to-end support for the transfer of manufacturing processes, including test batches, process validation, and detailed sampling protocols.
- * Custom Mixing Solutions: Access to a range of emulsifying mixers tailored to your required production volumes.
- * Versatile Filling Capabilities: Filling services for a wide variety of primary packaging formats, including suppositories, sachets, tubes, airless pumps, bottles, sample tubes, and jars.
- * High-Efficiency Equipment: Utilization of advanced, high-grade equipment to ensure optimal production efficiency and quality.
- * Batch Size Flexibility: Scalable manufacturing solutions with flexible batch size options to meet your specific project needs.

01

We fulfill your vision through our distinctive expertise in concept development, complemented by our advanced laboratory facilities and the innovative spirit of our dynamic Research and Development team.

02

Our 500 m² Research & Development department, together with our Quality Control laboratory, operates under GLP conditions and specializes in microbiological and physicochemical analyses.

03

Production capacity:
Ovules / suppositories ~100 mil. / year
Soft gelatine capsules ~500 mil. / year
Nasal sprays ~24 mil. / year
Tubes (cream) ~10 mil. / year

04

The production facility undergoes rigorous annual inspections and comprehensive audits performed by our esteemed contracting partners, ensuring consistent excellence and compliance.

2026 - Opening of a new production facility for pharmaceuticals and medical devices, that will provide a wide range of benefits, including:

Rapid and flexible execution of R&D projects by decoupling them from existing production schedules, accelerating innovation and time-to-market.

Significant enhancement of our production capabilities, enabling us to deliver higher volumes efficiently while maintaining exceptional quality standards.

Improved operational efficiency through state-of-the-art technologies and streamlined workflows.

Regulatory Services

- * Challenge tests, efficacy tests and safety assessments.
- * Supervision of preclinical and clinical studies for preparing the registration dossier.
- * Development of the preclinical and clinical evaluation.
- * Drafting the technical documentation.
- * Support in being compliant with the Cosmetics Directive, The European Medical Device Regulation, as well as with any documentation required for EU & outside EU registration of products.
- * Development of CTD dossiers.

Established
distribution network

All our warehouses are
EU GDP compliant

>250 Corporate
customers

ESG

We are dedicated to natural resources conservation through renewable energy investments and waste recycling.

Our corporate strategy prioritizes health and patient safety. We produce pharmaceuticals, food supplements, medical devices and cosmetics, all while adhering to ESG values.

Blister recycling

Clean blisters consisting of aluminium foil and plastic are sent directly to the recycler, for a rapid and efficient reutilisation.

Reduction in energy consumption

Our commitment to sustainability is demonstrated by integrating renewable energy sources, such as solar panels and advanced heat pump systems, along with intelligent manufacturing technologies designed to optimise energy efficiency and recycle generated heat, significantly reducing our environmental footprint.

ECO fleet

We are proactively expanding our fleet with modern, low-emission hybrid vehicles, reinforcing our commitment to environmental responsibility and sustainability.

PORTFOLIO

With years of experience, we're eager to merge our expertise with our partners' local knowledge to achieve mutual success. Discover our range of medical devices, food supplements, cosmetics and pharmaceuticals.

50+

Projects Completed

We offer products across various forms and therapeutic areas, including women's health, respiratory care and pain relief.

Ovules and
suppositories

~100.000.000 units / year.

Soft gelatine
capsules

500.000.000 capsules / year.

Nasal sprays

24.000.000 bottles / year.

Creams &
Ointments

5.500.000 tubes / year,
4.400.000 bottles / year.

Shots

30.000.000 vials / year.

Syrups & Drops

24.000.000 bottles / year.

Quality & Compliance

ISO 22716:2007

ISO 13485:2016

ISO 9001:2015

EU GMP

CERVIRON®

Cerviron® is a medical device intended for use in the treatment of acute and chronic vulvovaginitis of atrophic, aerobic, traumatic and infectious etiology, of cervical erosions of traumatic or infectious origin and of bleedings caused by them, in the postoperative recovery after gynecological surgeries, for restoration of pH and normal vaginal flora, as well as an adjuvant in the treatment with antibiotics or antifungals.

The main mechanism of action of the medical device is the dispersion of substances in the vagina and the formation of a protective barrier that accelerates the natural healing process of the damaged epithelium.

Clinically proven
effectiveness in treating
gynaecological disorders.

COMPOSITION:

An ovule contains:

- ✓ bismuth subgallate – 100 mg
- ✓ vegetable collagen – 15 mg
- ✓ thyme extract (*Thymus vulgaris*) – 10 mg
- ✓ goldenseal extract (*Hydrastis canadensis*) – 10 mg
- ✓ calendula extract (*Calendula officinalis*) – 10 mg
- ✓ turmeric extract (*Curcuma longa*) – 10 mg
- ✓ hexylresorcinol – 2 mg

semisynthetic glycerides, anhydrous lanolin, colloidal silicon dioxide

20 years
Made in Romania

CERVICAL EROSIONS

BENEFITS

Creates a protective barrier against the action and proliferation of pathogens. Hemostatic and healing effect.

Reduces vulvovaginal bleeding associated with cervical erosions and lesions.

Prevents bacterial recurrence and helps to restore vaginal pH, while preserving Lactobacilli species.

Accelerates the natural healing process of damaged epithelium.

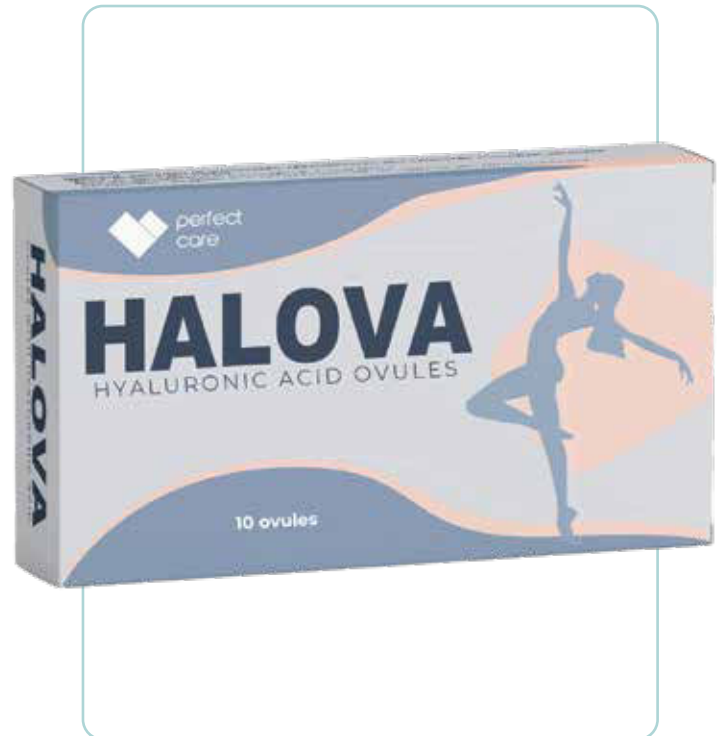

Cerviron® Ovules have been proven to be an effective and safe treatment for various gynecological conditions, including non-specific vaginitis, postoperative cervical lesions and cervical erosions caused by endogenous pathogens. Studies have demonstrated significant improvements in patients symptoms, normalization of vaginal pH and effective reepithelization of the cervical mucosa. The high level of satisfaction and absence of significant side effects underline the treatment acceptability and efficacy.

HALOVA®

Halova® is a medical device intended for intravaginal administration with the aim of promoting and accelerating hydration, healing, re-epithelialization and soothing of damaged, atrophic or irritated vaginal mucosa.

The ovules melt evenly on the vaginal mucosa forming a protective film with moisturizing, re-epithelializing properties, normalizing the vaginal pH, which favours the maintenance of normal vaginal flora and which can be used both alone as well as together with hormonal treatment to restore the natural lubrication of the vaginal mucosa.

BENEFITS

- Accelerates hydration, healing, re-epithelialization and soothing of the vaginal mucosa.
- Maintains pH balance and normal vaginal flora.
- Forms a protective barrier that retains a large amount of water and maintains moisture in the vaginal mucosa.
- Acts locally, is not absorbed systemically and is not metabolised in the body.
- Supports sexual health during menopause.

Real-world performance and safety of vaginal ovules in reducing the vaginal symptoms associated with vulvovaginal atrophy and postmenopausal sexual dysfunction.

VAGINAL ATROPHY
SEXUAL DYSFUNCTION

*Result: The study enrolled 249 women, and one of the significant results was related to dyspareunia, which was completely disappeared in 72% of patients by the end of the study. Halova was demonstrated to be a safe and effective treatment for relieving the signs and symptoms of atrophic vaginitis in perimenopausal women, including dysuria, dyspareunia and vaginal dryness.

AVARON®

Avaron® is a medical device in the form of suppositories or cream intended for use as an adjuvant in the short-term symptomatic treatment of internal hemorrhoids, anal and perianal itching, anitis and perianitis, rectitis, cryptitis, papillitis, anal and perianal fissures.

Avaron® favors healing, re-epithelialization processes and favors the protection of damaged, irritated or inflamed anorectal mucosa.

REGENERATES
damaged tissue and
reduce
bleeding.

REDUCES local
pain and
inflammation.

PROTECTS
damaged, irritated or
inflamed
anorectal mucosa.

Favors
HEALING and
re-epithelialization
processes.

LADY ANION

Sanitary Pads and Intimate Gel Wash

Sanitary pads made with organic cotton. No usage of toxic elements. Provides maximum comfort and protection. Neutralizes odors. Anion emission attracts the menstrual blood in the inner layers. Higher absorption power than regular sanitary pad.

Eliminates unpleasant odors and ensures a pleasant and fresh sensation for the intimate area. The adapted pH and the formula enriched with lactic acid and Aloe vera helps the body to protect and maintain the natural balance of the intimate area.

**STANDARD
100**
2015OK0784
AITEK

Oeko-Tex – Standard 100 confirms that the organic cotton used in Lady Anion meets all ecological requirements.

Bureau Veritas certified the quality of Lady Anion's products being safe for skin contact.

LIVER DYNAMIC

0

**Liver
Dynamic.**

Complete liver support & natural detox formula.

Milk Thistle protects liver cells.

Dandelion & Celandine support digestion and cleansing.

Rosemary promotes bile drainage and fat digestion.

Vitamin E & B3 for cellular protection and energy metabolism.

MAGNESIUM

375mg + Vitamin B6 10mg

Uses **magnesium bisglycinate** — highest bioavailability form.

Supports nervous system and reduces fatigue.

High-strength B6 (10mg) optimizes magnesium absorption.

Well-tolerated, superior absorption formula.

MENOZEN

Women's Solution

Formulated for perimenopause and menopause support.
Reduces hot flashes and night sweats.
Helps maintain hormonal balance and bone health.

Key actives: Red Clover, Pueraria mirifica, Black Cohosh, Vitamins B-complex + K2, zinc, selenium for skin, immunity and fatigue reduction.

ALPHA CARE

Men's Solution

Supports **male energy, vitality** and **stamina**.
Boosts immune function and cellular protection.
Ideal for active lifestyles & demanding periods.

Key actives: L-arginine, L-carnitine, fenugreek, ginseng, goji. Contains zinc, selenium and vitamins C, D3, B6 for superior absorption.

License & supply CDM services

Perfect Care uniquely combines drug development expertise with manufacturing capabilities under one contract.

Ovules and suppositories

Pharmaceuticals:

Paracetamol suppositories: 60 mg, 120 mg, 125 mg, 240 mg, 250 mg, 500 mg, 1000 mg;
Ibuprofen 60 mg, 125 mg;
Bisacodyl suppositories 10 mg;
Progesterone ovules 400 mg.

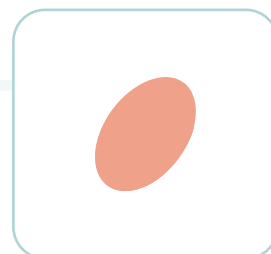

Soft gelatine capsules

Pharmaceuticals:

Ibuprofen soft gelatine capsules: 200 mg, 400 mg;
Progesterone soft gelatine capsules: 100 mg, 200 mg;
Alfacalcidol 0.25, 0.5 and 1 mcg.

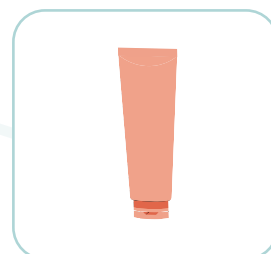

Food Supplements:

Vitamin D3, Vitamin E, Liposomal iron, Lecithin, Fish oil, Liver health.

Semi-solids

Creams, ointments, lotions, gels, roll-on, serums, shampoos, shower gels, etc.

Nasal sprays / Shots / Oral drops

Pharmaceuticals:

Xylometazoline solution: 0.5 mg/ml, 1 mg/ml, 1 mg/ml with menthol.

Xylometazoline + Ipratropium solution: 0.5 mg/ml + 0.6 mg/ml;

Oxymetazoline solution: 0.25 mg/ml, 0.5 mg/ml, 0.5 mg/ml with menthol.

Paracetamol, Ibuprofen syrup.

Food Supplements:

Vitamin D3 for infants, Magnesium + B6, Hyaluronic acid, Collagen.
