

Excellence in every injection.

Trusted quality, proven expertise.

Powered by Pfizer, we're ready to support the unique needs of your sterile injectable.

Global expertise. Specialized capabilities.

Time is life, so in the rapidly evolving sterile injectable space, expertise is key to ensuring the safe, successful delivery of your innovative therapeutic to the patients who need it. Around the world, our Pfizer scientists and manufacturing experts leverage their decades of experience alongside our specialized facilities to help ensure the fill-finish precision of your sterile injectable drug substance (liquid or lyophilized) and product (PFS, vials, cartridges).

Efficiently delivering reliability and quality.

To help ensure speed while maintaining consistently high quality of your product, robust processes are in place developed and optimized by our global experts. With dedicated quality and analytical teams, we are here to support your needs as your project progresses from late stage clinical to commercial. Cutting-edge technologies like automated fill lines with digitized technology help to ensure integrity in data, safeguard sterility and secure safety.

At Pfizer CentreOne we aim to provide supply chain reliability by rigorously evaluating each of the companies in our vast supply chain for risk and business continuity track record.

Flexible and transparent support you can rely on.

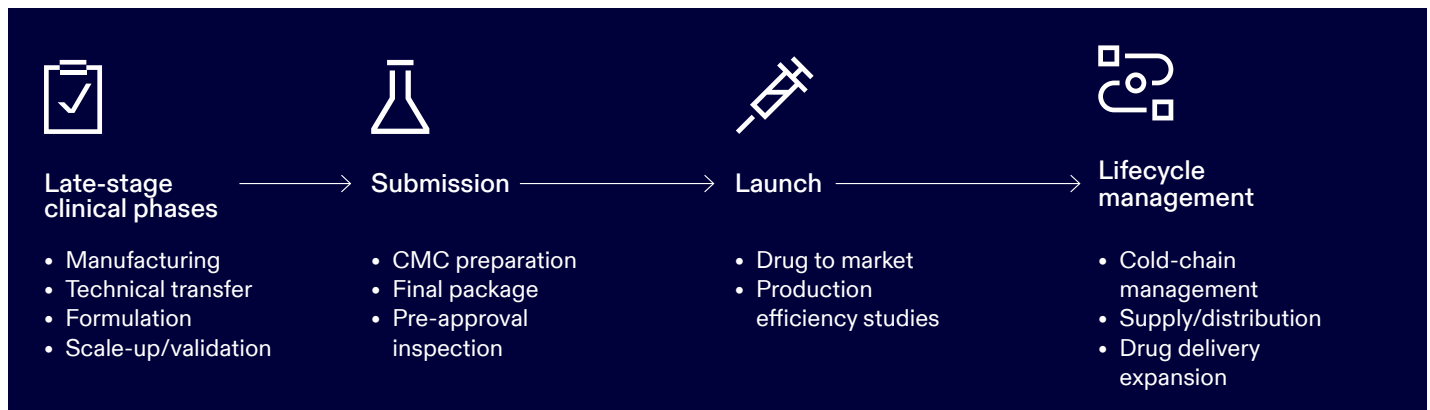

Our global Pfizer experts are dedicated to unlocking innovative solutions to meet your needs using our light-speed principles: from identifying lead-time efficiencies to meeting your evolving expectations and overcoming roadblocks in supply. With a "right-first-time" approach, we work to keep you up to date in real time, leveraging protocols or data sharing.

We're at the forefront of complex SI:

- Expertise with complex therapeutics such as ADCs
- Including the capability to meet your needs across various delivery mechanisms
- With extensive capabilities for both liquid and lyophilized filled pre-filled syringes and vials

We continually improve and invest in our global sites:

- Belgium (Purrs)
- Croatia (Zagreb)
- Spain (Algete)
- Sweden (Strängnäs)
- United States (McPherson, Rocky Mount, Pearl River, Andover Sanford)

Regulatory experience for more than 150 countries, supporting you around the globe

Capabilities at a glance:

Manufacturing

- Clinical
- Commercial

Secondary packaging and global supply chain services

- Packaging capabilities include: bulk (bright stock), single-/multi-unit cartons, kitting, multi-lingual labelling and package inserts
- Secondary packaging development, including customized kits
- Serialization (track and trace) programs
- Drug product storage and distribution: ambient (+15°C to +30°C), controlled room temperature (+15°C to +25°C), refrigerated (+2°C to +8°C), frozen (-15°C to -25°C)
- Cold chain logistics
- EU gateway services, including quality release support

Other substances

- Diluents

Container closure systems

- Vials
- Pre-filled syringes
- Ampoules
- Cartridges

Services and processes

- Aseptic fill-finish
- Terminal sterilization
- Lyophilization
- Combination products

Compounds

- Biologics (ADC, mAbs, other complex biologics)
- Vaccines (inactivated and novel technologies)
- Small molecules
- Controlled substances (II-IV)
- Cytotoxics (liquid)
- Monobactam
- Sterile suspensions
- Hormones, steroids and prostaglandins
- Capability across various delivery mechanisms

Regulatory overview cGMP inspections

FDA, EMA, ANVISA, GCC, GCC-DR, Health Canada, Korean FDA, MHRA, NMPA, PMDA, Taiwanese MOH, TGA, Turkish MoH, AIFA, COFEPRIS, EAEU, MOITRF, Kazakhstan, Belarus

Excellence in every injection, from liquid and lyophilization to pre-filled syringes, vials and cartridges.
