

PHARMALINE
More than Health

Transforming health through scientific innovation.

OVER 35 YEARS OF SUCCESS

Pharma Line is an Italian pharmaceutical company founded in 1987 in Mantua. In 2013, the headquarter was moved to the global city of Milan, Italy's economic and financial heart.

**HEALTH
IS A
BEDROCK**

**BUT WELLBEING
IS A WHOLE
DIFFERENT MATTER**

OUR MISSION

Pharma Line develops unique nutraceutical associations formulations creating **effective synergies** for an innovative therapeutical approach.

Pharma Line can count on a diversified product portfolio covering different therapeutic areas.

OUR VALUES

RESPECT

Making people and their well-being our priority is our way of showing respect to Life, providing safe and effective products that offer solutions to unmet needs.

QUALITY AND INNOVATION

Unique nutraceutical combinations of active substances for an innovative therapeutical approach and better results.

RELIABILITY

Working closely with industry professionals as a reliable partner to optimize the quality of our offerings and enrich our portfolio.

AMBITION

Started from tradition fired up with enthusiasm and zeal while keeping an eye on the future that helps us grow each and every day.

FROM TRADITION TO INNOVATION

VERSATILITY

The Pharma Line Portfolio covers all major therapeutical areas. Versatility is one of the key features of the products that fulfills the varied unmet medical needs in more than a single therapeutical area, backed up by **preclinical and clinical studies**.

QUALITY AND 100% MADE IN ITALY

The company oversees the entire production process; from Research and Development to Marketing and Medical activities, outsourcing Production and Logistics to leading suppliers who guarantee the best quality at every stage.

Design and formulation of products follow a strategic logic aimed at maximizing effectiveness and safety.

The products are based on accurately curated dossiers and are supported by rigorous international scientific literature and clinical experiences.

Pharma Line is UNI CEI EN ISO 13485 certified; all production processes are 100% made in Italy. All the facilities that manufacture our food supplements are subject to GMP inspections and are GMP certified.

A WORLD WITHOUT BORDERS

After being firmly established throughout the national territory, Pharma Line has opened its doors to the international market dedicating a whole new department to Export to guarantee effectiveness to patients, specialists in the industry and partners around

the world, maintaining the highest standards of technology, competence, reliability and competitiveness.

Pharma Line is always looking for new Partners from all over the world with shared values and ethics.

Catidral®

 10-12-20-30 SACHETS

Indicated for the oral treatment of acute and chronic diarrhea symptoms related to gastrointestinal disorders, as well as in the prophylaxis of drug related diarrhea and chemotherapy/radiation-induced diarrhea (CID/RID).

- Stops diarrhea normalizing the fecal consistency, reducing diarrhea episodes and abdominal pain.
- Interacts with glycoproteins in the mucous membrane covering the enteric wall, generating a protective gel layer.
- Rehydrates and restores the electrolyte balance.

The synergy between **Catidral®** ingredients is expressed by diosmectite's absorption strength which allows the resolution and reduction of diarrhea's episodes, and by the balanced dose of electrolytes, which decreases the risk of dehydration and helps the hydrosaline balance return to normal.

- ▶ Painful symptoms associated with gastrointestinal disorders
- ▶ Acute and chronic diarrhea
- ▶ Chemotherapy and radiotherapy-induced diarrhea

Trisodium citrate	0.147 g
Glucose (dextrose anhydrous)	1.982 g

Catidral[®] *plus*

 10-12-20-30 SACHETS

Indicated for the oral treatment of acute and chronic diarrhea symptoms related to gastrointestinal disorders, as well as in the prophylaxis of drug related diarrhea and chemotherapy/radiation-induced diarrhea (CID/RID).

- Stops diarrhea normalizing the fecal consistency, reducing diarrhea episodes and abdominal pain.
- Interacts with glycoproteins in the mucous membrane covering the enteric wall, generating a protective gel layer.
- Rehydrates and helps the hydrosaline balance return to normal.
- Prebiotic effect on the intestinal microflora.

Catidral[®]*plus* contains diosmectite, electrolytes and PHGG (Partially Hydrolyzed Guar Gum). Diosmectite strengthens the mucosal barrier, neutralizes pathogens' toxins and adsorbs fluids. Its balanced dose of electrolytes decreases the risk of dehydration and helps the hydrosaline balance return to normal.

PHGG increases water retention, improves stools consistency, promotes changes in the intestinal microflora and ameliorates the environment of the small intestine and the colon.

- ▶ Painful symptoms associated with gastrointestinal disorders
- ▶ Acute diarrhea (viral and bacterial infection or food poisoning)
- ▶ Chronic diarrhea (chronic diseases or malabsorption)
- ▶ Chemotherapy and radiation-induced diarrhea

Restore

Association of HOWARU® Restore (a registered blend of four live probiotics strains), BioEcolians® (a natural prebiotic fiber) and Lactoferrin.

- Promotes the physiological balance of the intestinal microflora.

HOWARU® Restore, a mixture of four probiotic strains that are highly viable, freeze-dried and active in promoting the balance of intestinal flora, in synergy with BioEcolians®, natural prebiotic fiber, and lactoferrin.

HOWARU® Restore, a registered and clinically proven association of two strains of lactobacilli (*L. acidophilus* NCFM, *L. paracasei* Lpc-37) and two strains of bifidocacteria (*B. lactis* Bi-07, *B. lactis* Bl-04), has a pronounced probiotic action promoting the balance of intestinal bacterial flora that may be altered due to chronic intestinal disorders.

It also contains BioEcolians®, a natural prebiotic fiber, that acts as nourishment for the bacterial microflora and lactoferrin that supports the immune system's functionality.

- ▶ Irritable bowel syndrome (IBS), Inflammatory bowel disease (IBD)
- ▶ Diarrhea due to viral and bacterial etiology
- ▶ Antibiotic associated diarrhea (AAD)
- ▶ Gastrointestinal discomfort due to food intolerance

Recommended Dosage

1 sachet/day

Food supplement

Active Ingredients	Per sachet
HOWARU® Restore (<i>L. acidophilus</i> NCFM®, <i>L. paracasei</i> Lpc-37®, <i>B. lactis</i> Bi-07®, <i>B. lactis</i> Bl-04®)	5 x 10 ⁹ CFU*
BioEcolians®	1 g
Lactoferrin	50 mg

*The content in live-cells refers to the properly stored product.

Enterovital[®]

30 CAPSULES

Pro

A registered blend of 4 live strains that offers high support to restore the physiological balance of intestinal bacterial flora.

- Lactobacillus and Bifidobacteria strains help restore and maintain the intestinal microflora.
- HOWARU[®] Restore significantly reduces the number of episodes and the number of liquid stools in antibiotic-associated diarrhea (AAD)*.

HOWARU[®] Restore is a registered blend of four live strains which efficacy has been clinically studied and documented.

Thanks to this blend and its association of two strains of lactobacilli (*L. acidophilus* NCFM, *L. paracasei* Lpc-37) and two strains of bifidobacteria (*B. lactis* Bi-07, *B. lactis* BL-04), **Enterovital[®] Pro** has a pronounced probiotic action promoting the balance of intestinal bacterial flora that may be altered, e.g., in the case of an antibiotic-associated diarrhea (AAD) or Clostridium difficile-associated diarrhea (CDAD).

10 SINGLE-DOSE MICROVIALS
of 10 ml - with reservoir cap

Daily Balance

Association of HOWARU® Restore (a registered blend of four live Probiotics strains: two strains of Lactobacilli and two strains of Bifidobacteria), BioEcolians® (a natural prebiotic fiber) and Lactoferrin.

- Promotes the physiological balance of the intestinal microflora, often altered in case of seasonal change or due to stressful periods.
- Based on HOWARU® Restore studies, Enterovital® Daily Balance is recommended after an Enterovital® Restore cycle in order to maintain results.

HOWARU® Restore, a mixture of four probiotic strains that are highly viable, freeze-dried and active in promoting the balance of intestinal flora, in synergy with BioEcolians®, natural prebiotic fiber, and lactoferrin.

HOWARU® Restore, a registered and clinically proven association of two strains of lactobacilli (*L. acidophilus* NCFM, *L. paracasei* Lpc-37) and two strains of bifidobacteria (*B. lactis* Bi-07, *B. lactis* Bl-04), has a pronounced probiotic action

promoting the balance of intestinal bacterial flora when altered.

It also contains BioEcolians®, a natural prebiotic fiber, that acts as a nourishment for the normal bacterial microflora and lactoferrin that participates in the support of the immune system.

- ▶ Traveler's diarrhea
- ▶ Bowel irregularity with abdominal pain and presence of fermentation
- ▶ Gastrointestinal discomfort due to temporary unbalanced diet

Enterovital®

 1 BOTTLE OF 5 ml WITH DROPPER

0+

Association of two highly documented probiotic strains, *Lactobacillus rhamnosus GG* and *Bifidobacterium breve* (M16-V) and Vitamin D3 that provides support in case of babies' colic, food/formula intolerance and respiratory tract infections related to gastrointestinal disorders in newborns.

- Promotes balance of intestinal bacterial flora.
- Supports immune system functions.

Enterovital® 0+ promotes the balance of intestinal bacterial flora through the association of *Lactobacillus rhamnosus GG* (ATCC 53103) and *Bifidobacterium breve* (M-16V), freeze-dried strains of lactic acid bacteria belonging to bacterial strains normally present in the newborn's intestinal flora. And thanks to vitamin D3, **Enterovital® 0+** supports the immune system functions.

- ▶ Infant colic
- ▶ Poor infant weight gain associated with irregular bowel movement
- ▶ Negative effects of formula milk feeding (poor digestibility and inappetence)
- ▶ Recurrent respiratory tract infections due to intestinal dysbiosis or gastrointestinal disorders

Recommended Dosage

*The content in live-cells refers to the properly stored product.

Leniref®

📦 14-20-24 STICK PACKS ○ 20-30-40 CHEWABLE TABLETS

Leniref® is a medical device based on Magnesium alginate, Mucosave™ plus HC, Calcium carbonate and Potassium bicarbonate, indicated for the treatment of gastroesophageal and laryngopharyngeal reflux and relative symptoms, thanks to its triple mechanical action.

- Physically blocks the reflux of gastric contents by forming a floating raft, thus protecting esophageal and upper respiratory tract mucosa from the acidic stomach content.
- Neutralizes stomach acidity.
- Promotes the repair and the healing of the lesions of the mucous membranes through muco-adhesive mechanism.

Magnesium alginates, calcium carbonate and potassium bicarbonate in contact with stomach's acid content, form a raft (a stable structure which, by floating on the surface of gastric contents in the upper part of the stomach, acts as a physical barrier blocking reflux movement into the esophagus).

Magnesium alginate in synergy with Mucosave™ plus HC promotes healing, restoration and protection of the mucosa due to its muco-adhesive properties. Calcium carbonate and potassium bicarbonate neutralize the excessive gastric acidity.

- ▶ **Gastroesophageal reflux:** pyrosis, esophagitis, acid regurgitation, heartburn
- ▶ **Laryngopharyngeal reflux:** change of voice, dry cough, irritation of upper airways

Macrostop[®]

250 ml ORAL SOLUTION

14-20-30 SACHETS

Based on macrogol 4000, it is indicated for the treatment of acute and chronic constipation, fecaloma, colon cleansing and constipation with episodic or chronic colic.

- Through an osmotic mechanism, Macrostop[®] increases water content and volume of the stools.
- Makes stools softer.
- Improves bowel motility.
- Its action is not reduced over time.

Macrogol 4000 has a good safety profile. Presents no defecatory urgency, no pain, no abdominal distension and there's no need to increase the dose. Macrogol 4000 can be used by patients who are on a low-sodium diet.

- ▶ Acute constipation
- ▶ Chronic/persistent constipation, Fecaloma
- ▶ Colon cleansing (box of 30 sachets)

10 g

125 g

Macrostip[®] *psyllium*

14-20-30 SACHETS

Indicated for the treatment of occasional and chronic constipation in adults and children (aged 6 years and over).

- Through an osmotic mechanism, Macrostip[®] *psyllium* regularizes intestinal functions.
- Macrocol 4000 recalls high quantity of fluids, hydrating the fecal mass and stimulating peristalsis.
- *Psyllium* fiber with its mucilage increases in volume and softens fecal mass facilitating fecal evacuation.
- Macrostip[®] *psyllium* action is not reduced over time.

The synergy between the mechanical action of Macrocol 4000 that stimulates bowel movements and the volumetric action of *Psyllium* increases the fecal bulk, softens fecal mass facilitating its evacuation. **Macrostip[®] *psyllium*** does not irritate the intestinal mucosa, is not absorbed and therefore is totally safe and eliminated unmodified in the stool.

► Occasional and chronic constipation in children, adults and elderly (starting 6 years old)

☪ 30 DIVISIBLE COATED TABLETS

An exclusive association of L-acetyl carnitine, Vitamin B12 in combination with patented, titrated, standardized and highly bioavailable extract of Ginkgo biloba that preserves synaptic transmission and microvascular circulation.

- Contributes to physiological neurological function.
- Supports proper neuronal microperfusion.
- Counteracts oxidative damage on the central nervous system (CNS).

Synergistic action of three active ingredients: L-acetyl carnitine has a neurotrophic action that improves nerve conduction, vitamin B12 is useful for normal functioning of the nervous system and supports neuronal energy metabolism. Clinically tested Ginkgo biloba extract is characterized by: standardization of raw materials and production processes, titration of the active principles and proven high bioavailability.

Emacrit®

 30 STICK PACKS  30 CAPSULES

Thanks to a specific formula, Emacrit® improves iron level and contributes to the formation of red blood cells and to the reduction of tiredness and fatigue. Formulated with Vitamins C, B6, B12, folic acid and an innovative and patented iron source (microencapsulated and micronized iron saccharate) to guarantee maximum efficacy and tolerability.

- A complete formulation of iron and vitamins to maximize iron blood profile parameters.
- Favors restoration of physiological haemoglobin levels.
- Contributes to physiological formation of red blood cells.

The innovative source of iron saccharate is absorbed with a physiological mechanism in which Vitamin C is involved. Iron is necessary for restoration of hemoglobin and serum iron levels. Vitamins B6, B12 and folic acid contribute to red blood cells synthesis and correct hemoglobin biosynthesis.

Iron deficiency anemia frequent in cases such as:

- ▶ in women e.g. pregnant, with menorrhagia
- ▶ in chronic kidney disease

Venolen[®] idrogel

 100 ml TUBE

Alcohol free gel with cooling, soothing and moisturizing effect, improving cutaneous trophism and increasing tissue elasticity for prompt relief from lower limbs' pain and swelling.

- Helps to maintain and increase tissue elasticity.
- Provides a pronounced soothing effect.
- Coadjuvant therapy for varicose veins and heavy legs.
- Easily absorbed, gives a fresh sensation after application.

The synergy between **Venolen[®] idrogel** active ingredients acts on the morpho-functional lymphatic-venous unit:

- Stimulates lymphatic drainage
- Degrades proteinaceous exudates
- Restores venous outflow

- ▶ Heavy legs
- ▶ Oedema
- ▶ Coadjuvant treatment for Chronic Venous Insufficiency (CVI)

 10 STICK PACKS ORAL SUSPENSION

An association of D-mannose, cranberry dry extract and juice, grapefruit dry extract and black currant for fast relief of urinary tract disorders, alone or as an adjunct to antibiotic therapy.

- Promotes the correct function of the urinary tract and prevent uropathogens-mediated infections.
- Prevents bacterial adhesion to uroepithelial cells membrane

An association of ingredients that work synergistically to support urinary tract health by targeting both the causes and symptoms of urinary tract infections.

D-mannose and cranberry's proanthocyanidins provide anti-adhesive properties, preventing pathogens from attaching to epithelial cells. Grapefruit seed extract exhibits antibacterial activity.

Together, cranberry, grapefruit seed extract, and blackcurrant confer a strong anti-inflammatory effect, promoting symptom relief.

- ▶ Acute urinary tract infections
- ▶ Recurrent urinary tract infections
- ▶ Prevention of recurrence of urinary tract infections

Golaflog

○ 24 OROSOLUBLE TABLETS

Association of Altea extract, Myrrh extract, Mastiha resin and high molecular weight Sodium hyaluronate, supporting the normal oropharyngeal mucosa.

- Reduces inflammation of the throat.
- Potentiates mucosal barrier defenses.
- Protects oropharyngeal mucosa.

Thanks to altea extract highly titrated in mucilages, **Golaflog** promotes the well-being of the throat and mucous membranes of the respiratory system. The myrrh extract is useful for the function of the oropharyngeal mucosa and for the reduction of oxidative damage that causes pain and sore throat. The effectiveness of the titrated plant extracts of altea and myrrh is amplified by their synergy with mastiha resin and high molecular weight sodium hyaluronate known for lubricating, moisturizing and mucoadhesive properties.

- ▶ Sore throat
- ▶ Pharyngotonsillitis
- ▶ Throat inflammation

Licorice flavor

Recommended Dosage

Up to 4 oral tablets per day to be dissolved slowly in the mouth.

Food supplement

Active Ingredients

Per 4 orosoluble tablets

Mastic Gum resin powder and dry extract mixture	80 mg
Althea officinalis dry extract titrated 25% Mucilages	80 mg
Myrrh dry extract titrated 4% in Furanodienes	40 mg
High-molecular-weight Sodium Hyaluronate	4 mg

Viscoflu®

 20 SACHETS

Systemic treatment of respiratory tract diseases characterized by thick and viscous mucosal hypersecretion.

- Fluidifies airways secretions.
- Decongests mucosa and reduces inflammation.
- Supports mucociliary clearance.
- Supports the immune system.

The synergy between N-acetylcysteine and enzymes from fermented maltodextrins confers mucolytic and anti-inflammatory activity and the inhibition of the biofilm formation by exerting a biostatic effect. While Vitamins C and B2 provide an immunostimulant activity, help and protect cells from oxidative stress and contribute to the efficiency of the immune system.

Viscoflu®

 5 x 5 ml AMPOULES 5 x 10 ml AMPOULES

Treatment of respiratory tract diseases characterized by thick and viscous mucosal hypersecretion.

- Fluidifies airways secretions.
- Decongests mucosa.
- Supports mucociliary clearance.

Viscoflu® Ampoules acts by fluidifying the mucus through the mechanical action of its components:

- buffered hypertonic saline solutions applied directly to the respiratory mucous membranes draw out water to the extra-cellular compartment by osmosis, increasing water content in the mucus fluidifying it and facilitating its removal.
- N-acetylcysteine possesses: mucolytic activity expressed by direct contact with the mucus and antioxidant activities useful to preserve the trophism of respiratory epithelia.

Respiratory diseases with viscous hypersecretion or painful inflammation:

- ▶ acute/chronic bronchitis and its exacerbations
- ▶ bronchiectasis
- ▶ rhinosinusitis and secretory otitis media

Viscoflu®

30 ml NASAL SPRAY

Facilitates the fluidification and mechanical removal of mucus and/or mucopurulent secretions stagnant inside the nasal cavity and inside the paranasal sinuses.

- Fluidifies airways secretions.
- Decongests mucosa.
- Supports mucociliary clearance.

Viscoflu® Nasal Spray acts by fluidifying the mucus through the mechanical action of its components:

- buffered hypertonic saline solutions applied into the nasal cavities enter in contact with mucosal membranes drawing out water to the extracellular compartment by osmosis, increasing water content in the mucus fluidifying it and facilitating its removal.
- N-acetylcysteine possesses: mucolytic activity expressed by direct contact with the mucus and antioxidant activities useful to preserve the trophism of respiratory epithelia.

Respiratory diseases with viscous hypersecretion or painful inflammation:

- ▶ acute, subacute and slow-resolution rhinitis
- ▶ chronic and muco-crusty rhinitis
- ▶ vasomotor rhinitis
- ▶ acute and chronic sinusitis

Viscoflu®

 20 ml ORAL SPRAY

Viscoflu® Oral Spray is indicated as a protective treatment in case of inflammatory processes of the pharynx and oral mucosa. Treats sore throat with moisturizing, protective and lenitive effects.

- Forms a protective barrier on inflamed mucous membranes.
- Indirectly counteracts inflammation.
- Has a moisturizing, emollient action.

Viscoflu® Oral Spray protects the pharyngeal and oral mucosa through protective and lenitive action of the Ectociclina-PROg® mixture contained therein, which:

- Propolis and glycerol act synergistically forming a protective barrier on inflamed mucous membranes, reducing inflammatory process in the throat.
- Ectoin, by binding to the water molecules, has a moisturizing-emollient action.

▶ Inflammation of the pharyngeal and oral mucosa

B-Vital[®] *totale*

20 EFFERVESCENT TABLETS

30 COATED TABLETS

Vitamin B complex in balanced doses with activated form of folic acid (400 µg).

- Contributes to normal homocysteine metabolism.
- Helps to maintain normal function of nervous system.
- Supports erythropoiesis and energy metabolism.

B-Vital[®] totale formulation provides beneficial synergies: B vitamins support normal energy metabolism and reduction of tiredness and fatigue (Vitamins B1, B2, B6, B12 and B5), physiological haematopoiesis (active form of folic acid), normal formation of red blood cells (Vitamins B6 and B12) and their normal maintenance (Vitamin B12), physiological homocysteine metabolism (Vitamins B6, B9 and B12 plus inositol) and normal functioning of the nervous system (Vitamins B1, B2, B6 and B12). Additionally, **B-Vital[®] totale** is useful in the contribution to the growth of maternal tissues during pregnancy.

- ▶ Peripheral neuropathies (B-Vital[®] 500)
- ▶ Metabolic diseases
- ▶ Chronic fatigue
- ▶ Hyperhomocysteinemia
- ▶ Restrictive diets
- ▶ Megaloblastic anemia
- ▶ Reduced intestinal absorption
- ▶ Pregnancy and lactation
- ▶ Concomittant chronic drug intake

ENERGY

B-Vital[®] *totale*

 100 ml ORAL SOLUTION  30 ml ORAL DROPS

Vitamin B complex in balanced doses. Specifically formulated for newborns and babies.

- Contributes to normal energy metabolism, nervous system and psychological functions.
- Contributes to normal homocysteine metabolism.
- Contributes to normal red blood cells formation and maintenance.
- Contributes to harmonious growth of children (aged 1 year and over).

B-Vital[®] *totale* oral formulations are composed of B vitamins in balanced doses which provide beneficial synergies:

B Vitamins support normal energy metabolism and reduction of tiredness and fatigue (Vitamins B1, B2, B6, B12 and B5), physiological haematopoiesis (folic acid), normal formation of red blood cells (Vitamins B6 and B12) and their normal maintenance (Vitamin

B12), physiological homocysteine metabolism (Vitamins B6, B9 and B12 in addition to inositol) and normal functioning of the nervous system (Vitamins B1, B2, B6 and B12).

- ▶ Unbalanced diets
- ▶ Poor or low vitamins B diet

Sinergien[®]

20 EFFERVESCENT TABLETS

Minerale

High dosage of Magnesium and Potassium, highly bioavailable and well tolerated, combined with Vitamin C to quickly restore the normal hydrosaline balance.

- Contributes to the maintenance of physiological hydrosaline balance.
- Contributes to the reduction of tiredness and fatigue.
- Helps preventing dehydration.

The synergistic activity of magnesium and potassium maximizes support against cramps, weakness, fatigue and tiredness.

Magnesium contributes to the normal function of the nervous system and energy-yielding metabolism. Potassium participates in the muscular contraction and contributes to maintain physiological blood pressure. Vitamin C also increases the bioavailability of Magnesium and Potassium.

- ▶ Tiredness and fatigue related to high temperatures
- ▶ Dehydration in case of sweating, pathological conditions or concomitant therapies

Ascorbic acid (vitamin C)	180.0 mg

Sinergem[®]

20 SACHETS

Effort

Indicated in case of excessive sweating and physical fatigue due to intense physical or sports activity.

- Supports normal muscle function and contributes to normal protein synthesis.
- Contributes to the reduction of tiredness and fatigue.
- Restores normal electrolyte balance.
- Increases physical performance in successive bursts of short-term, high-intensity exercise.
- Supports post-workout recovery.

The synergy between Betaine and Creatine allows fatigue reduction, increased strength and endurance and increased muscle function. Magnesium promotes the reduction of fatigue and supports energy metabolism; Magnesium and Potassium support the muscular system. Betaine acts as an osmoprotectant;

Zinc supports proper metabolism of macronutrients and proper protein synthesis. Selenium, Zinc and Vitamin C protect cells from oxidative stress.

- ▶ Hydrasaline imbalance
- ▶ Hypokalemia
- ▶ Hypomagnesemia: weakness, fatigue, muscle cramps

Elevia Vis

 10 SINGLE-DOSE MICROVIALS WITH RESERVOIR CAP

Ginseng and Guarana dry extracts have a tonic and an adaptogen effect for an effective and safe treatment of mental and physical fatigue.

- Supports psychological and nervous functions.
- Contributes to mental and physical fatigue reduction.

Guarana and Ginseng have a tonic and restorative action.

Ginseng has also an adaptogenic activity.

Royaljelly completes the composition by providing a rich blend of easily assimilated nutrients.

The synergy among active ingredients prepares the body to face stressful or particularly demanding events on both physical and mental level, and restores the body's balance in the event of prolonged or repeated stress over time.

▶ Physical exhaustion and mental fatigue

Active Ingredients	Per microvial (10 ml)
Freeze-dried royal jelly	80.00 mg
Ginseng dry extract	70.00 mg
Guarana dry extract of which Caffeine	14.12 mg 1.412 mg

Liovital[®] AD

 10 SINGLE-DOSE MICROVIALS WITH RESERVOIR CAP

Natural ingredients, at pharmaceutical quality standards, offering support to "fragile people", in case of asthenia, lack of appetite and recovery.

- Contributes in stimulating physiological appetite in elderly and children.
- Helps to reduce fatigue including in the case of chronically ill patients.
- Supports the physiological immune response.
- Provides micronutrients in highly absorbable form.

Liovital[®] AD contains cod liver oil, Vitamins A, B1, D, E, pollen, royal jelly, Glycine and Zinc. Royal jelly, Vitamin E and Glycine present restorative properties. Royal jelly is rich in essential amino acids, easily assimilable vitamins and minerals. This is why royal jelly and pollen extract are food ingredients of high nutritional value. Vitamin D promotes the absorption of calcium and phosphorus and contributes to the maintenance of healthy bones.

Glycine is required for connective tissue and muscle mass growth and health status maintenance. Thiamin, pollen and Zinc favour appetite. Cod liver oil, Vitamin A and Vitamin D counteract oxidative stress and ageing, supporting the immune system's function.

- ▶ Inappetence due to convalescence
- ▶ Recurrent illnesses due to nutritional weakening
- ▶ Anorexia-Cachexia syndrome
- ▶ Pre-Cachexia

Stenorex®

 30 SACHETS

A balanced combination of amino acids, vitamins and Zinc in support of muscle mass function and physical performance.

- **Contributes to normal protein synthesis and muscle function.**

Arginine, Citrulline, Lysine and Cystine work in synergy to support and promote muscle protein synthesis, to protect tissues from oxidative stress and counteract muscle protein degradation.

Vitamin C offers a strong protection against oxidative stress and ROS (Reactive Oxygen Species) accumulation. Vitamin B12, B9, B1 and Zinc are involved in energy metabolism while vitamins B12 and B1 also participate in protein metabolism. Vitamin D3 regulates calcium metabolism and bones health. Zinc and amino acids activate satellite cells involved in muscle regeneration.

▶ Athletic performance

▶ Muscle tone/recovery

▶ Sarcopenia
