

Pharmaceutical Digital Workforce Academy

Barbados is developing a Pharmaceutical Workforce Digital Academy to build the specialized talent needed to power a growing pharmaceutical and life sciences sector. Working with a Swiss learning institute and a UN entity specialized in this area, the Academy will provide scalable, industry-aligned digital training and credentials in areas such as GMP manufacturing, quality systems, regulatory sciences, supply chain and other critical pharmaceutical capabilities.

Designed to serve Barbados and the wider Caribbean, the digital platform will enable rapid development of foundational competencies, micro-credentials and continuous professional development, creating a pipeline of industry-ready talent.

Train here. Work anywhere. Power the Caribbean's pharmaceutical future.
