Human Clinical Trials

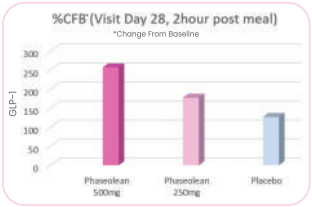

Backed by clinical science, Phaseolean® amplifies satiety by boosting GLP-1 and PYY hormones and silences hunger by lowering Ghrelin.

Clinical 1

Amplifies Satiety

2x Greater GLP-1 Increase

1.6x Greater PYY Increase

Shifts digestion kinetics to trigger an increase in GLP-1 and PYY levels compared to placebo.

Silencing the Hunger

1.3x Greater Ghrelin Decrease

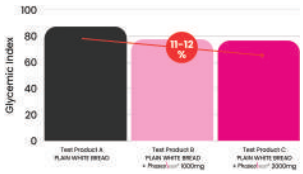

Directly influences the root cause of cravings with decrease in Ghrelin level compared to placebo.

DAILY DOSE: 500mg | GLP-1 • PYY • Ghrelin

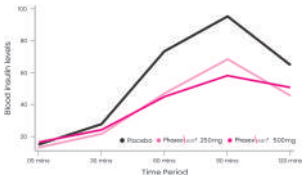

Clinical 2

Reducing Glycemic Index & Glycemic Load

Clinical study demonstrated a clear downward trend in both Glycemic Index and Glycemic Load, reducing the glycemic impact of carb-rich meal.

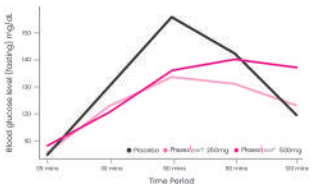

Improved Blood Sugar Response

Clinically shown to effectively lower the metabolic stress, requiring less insulin to manage meal compared to placebo and cuts peak insulin demands by 39%.

Keeps the initial impact of heavy starch meals under control by maintaining glucose spike at the 60-minute mark.

GI • GL • Blood Glucose Response | **DAILY DOSE: 1000mg**

Clinical 3

Supporting Effective Weight Management

2.1 Kg
Mean
Body Weight Loss
