

Science-Backed **Probiotics** for EveryWing's Wellness

*Targeted gut support for broilers,
layers, and breeders—naturally
improving performance.*

SCAN FOR WEBSITE

Probiotics are non-pathogenic bacteria that exert a beneficial influence on the health or physiology (or both) of the host, in addition to improving intestinal structure, developing immunity to defend against pathogens, and subsequently progressing in growth and performance.

The recent studies on the use of antibiotics as a feed additive & its harmful effects has led to the search for alternative sources of antibiotics in the feed industry.

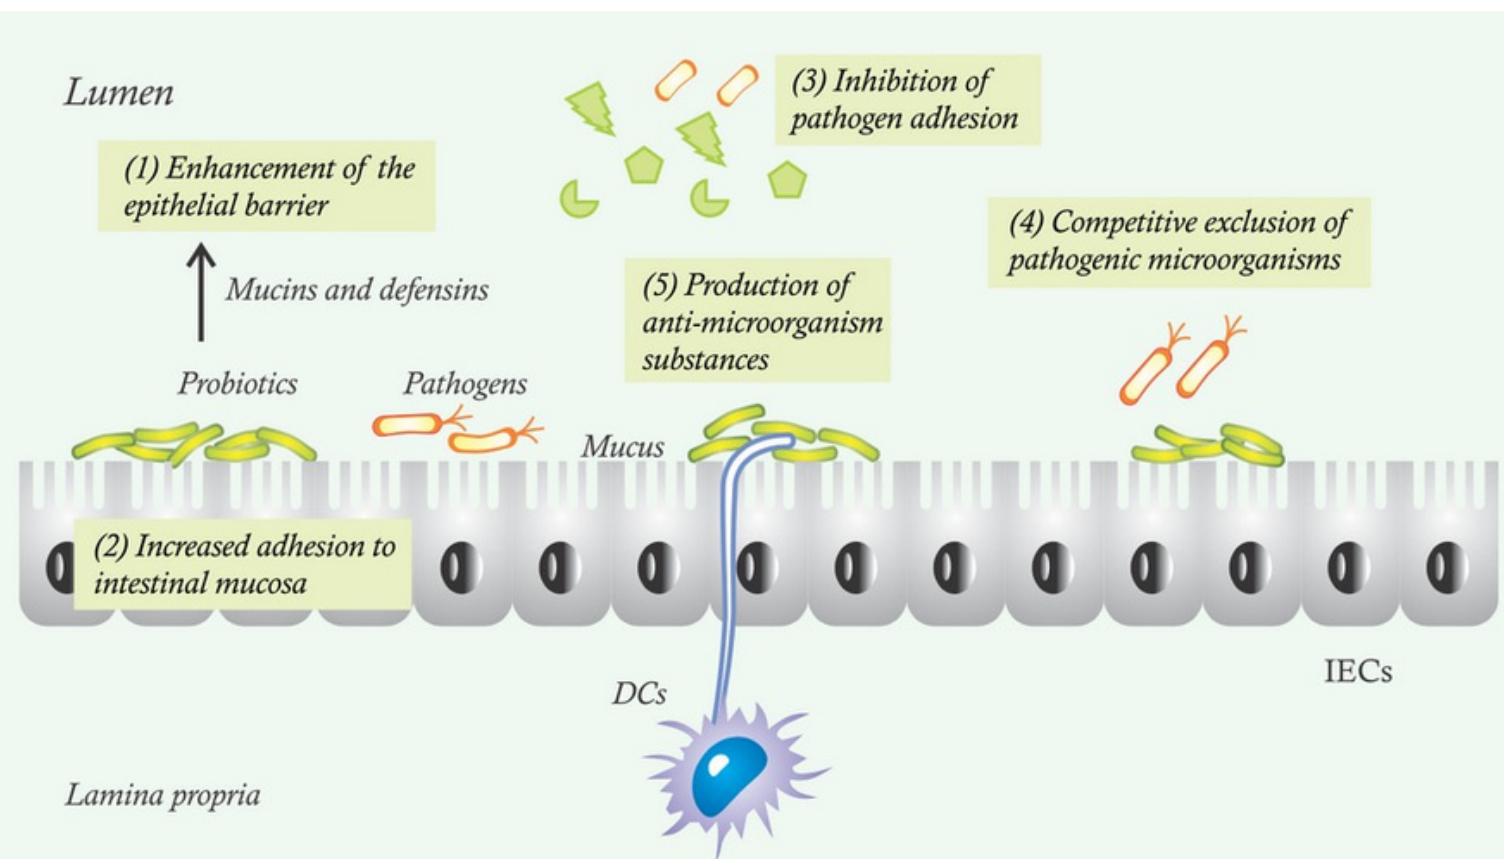

Presently, probiotics are considered as a potential substitute for antibiotics as a live biotherapeutic agent to improve animal health & performance.

Probiotics are generally regarded as safe & have been widely used in **Broilers, Layers & Breeders** at all developmental stages and growth.

By adding probiotics to feed or water the intestine is populated with beneficial bacteria avoiding or decreasing the extent of pathogen colonisation. Thus, Probiotics are helpful in the overall gut management of the birds during all the stages of their lifecycle.

The importance of gut health in antibiotic-free production cannot be overstated, which is why we offer an innovative set of products for Gut health & performance.

► Mechanism of Action

**TAKE THE FIRST STEP TOWARDS
ANTIBIOTIC-FREE POULTRY
FARMING WITH ELMED PROBIOTICS.**

ELMAX

➤ Composition:

ELMAX is a synbiotic feed supplement that helps improve F.C.R & weight gain.

➤ Benefits:

- Enhances meat quality, egg production, egg size, and laying time
- Suppresses the production of gases like ammonia and hydrogen sulfide (H₂S)
- Improves feed utilization and feed conversion ratio (F.C.R)
- Enhances the bird's nonspecific immunity
- Prebiotics stimulate the growth and activity of beneficial gut bacteria
- Protects birds from enteric diseases related to E. coli and Salmonella through competitive exclusion
- Improves the bird's gut microbiome, helping prevent digestive upsets

➤ Application:

Mix/blend **ELMAX** with the feed.

➤ Dosage:

100g of Elmax for 5000 Chicks/ Layers/ Broilers/ Breeders to be administered along with water or feed.

➤ Presentation:

100g, 500 g & 1 Kg

➤ Storage:

Store in a cool & dry place.

➤ Storage:

24 months from the date of manufacture.

ELSAC

➤ Composition:

ELSAC is an instant diarrhoea controller that contains *Bacillus subtilis* and *Saccharomyces boulardii*.

➤ Benefits:

Helps control all kinds of diarrhoea including antibiotic associated diarrhoea.
Helps in the development of mucosal immunity.

Binds and flushes out pathogens such as *E. coli* and *Salmonella*, thus it inhibits the growth of pathogenic bacteria.

Improves feed efficiency and weight gain in commercial broilers.

Helps colonize the gastrointestinal tract with healthy flora.

Highly recommended in necrotic enteritis, loose droppings.

➤ Application:

Mix/blend **ELSAC** with the feed.

➤ Dosage:

100g of ELSAC for 5000 Chicks/ Layers/ Broilers/ Breeders to be administered along with water or feed - 7 days course

➤ Presentation

100g, 1 Kg, 5 Kg & 10 Kg

➤ Storage

Store in a cool & dry place.

➤ Shelf Life:

24 months from the date of manufacture.

ELCHICK

➤ Composition:

Specially formulated Probiotic supplement to control loose droppings & EMS in chicks.

➤ Benefits:

- Helps control loose droppings in chicks
- Helps restore flock health and productivity to normal
- Reduces the enterotoxigenic and cytotoxic effects of pathogens
- Aids in the elimination of pathogenic bacteria from the bird's body
- Stimulates the immune system, boosting nonspecific immunity and improving immune response
- Helps control Early Mortality Syndrome in chicks
- Fast-acting with 100% safe and antibiotic-free ingredients

➤ Application:

Mix/blend **ELCHICK** with the feed or water.

➤ Dosage:

100g of Elchick for 5000 Chicks/ Layers/ Broilers/ Breeders to be administered in the first water or feed of the day at the first sign of loose droppings.

➤ Presentation

1 Kg, 5 Kg & 10 Kg

➤ Storage

Store in a cool & dry place.

➤ Shelf Life:

24 months from the date of manufacture.

Major Probiotic Strains

Bifidobacterium

Bifidobacterium bifidum
Bifidobacterium animalis
Bifidobacterium lactis
Bifidobacterium longum
Bifidobacterium breve
Bifidobacterium infantis

Pediococcus

Pediococcus acidilacticii
Pediococcus pentosaceus

Enterococcus

Enterococcus faecium
Enterococcus durans

Streptococcus

Streptococcus faecium
Streptococcus faecalis
Streptococcus thermophilus

Probiotic Yeast

Saccharomyces boulardii
Saccharomyces cerevisiae

Lactobacillus

Lactobacillus acidophilus
Lactobacillus rhamnosus
Lactobacillus lactis
Lactobacillus salivarius
Lactobacillus plantarum
Lactobacillus reuteri
Lactobacillus casei
Lactobacillus paracasei
Lactobacillus gasseri
Lactobacillus brevis
Lactobacillus fermentum
Lactobacillus delbrueskii
Lactobacillus sakei

Bacillus

Bacillus coagulans
Bacillus subtilis
Bacillus clausii
Bacillus megaterium
Bacillus polymyxa
Bacillus licheniformis
Bacillus mesentericus
Bacillus firmus
Bacillus amyloliquefaciens
