Sourcing

K. Patel works on 360°SCM to ensure that it offers traceability till farms for our botanical extracts. It has carefully identified the regions for its focused herbs. It educates the farmers to follow GAP (Good Agricultural Practices) and offers guidance to maximize the yields. KPPE also promotes contractual farming for organic herbs.

Sustainability

Sustainability has often been defined as to how biological resources endure and it remains diverse and productive. But recent definition of sustainability goes beyond these narrow parameters. Today, it refers to develop a well-grounded, wholesome model for business through managing economical, social and environmental needs. Sustainability is an integral part of natural product industry. It starts with Supplement companies on backward integration till it reaches a point where it benefits the farmers. Sustainability of these farmers is not merely economical now; it is also social and environmental. We at K. Patel work with sustainability at core of our business through CSR we ensure education and uplift life of our farmers and villagers near our facility and farming regions.
