PROSTARELAX

Rectal suppositories for prostate health

BOTOX - LIKE EFFECT

Local relief for men with prostate complaints. BOTOX - LIKE peptides release the tension behind the pressure and pain, while seven plant extracts and hyaluronic acid soothe and protect — in one suppository, once a day.

- CE-marked medical device
- 10 suppositories
- Once daily, in the evening
- Phyto - biotechnology

A common problem that affects everyday comfort

Prostate complaints — prostatitis and benign prostatic hyperplasia — are among the most common urological problems in adult men. They bring discomfort or pain in the pelvis and perineum, a feeling of pressure in the rectum, burning, and a frequent urge to urinate. Many men also have anorectal complaints at the same time, such as irritated mucosa, hemorrhoids or fissures.

PROSTARELAX works locally, in the rectal area right next to the prostate — exactly where men feel the pressure and discomfort.

Four actions for prostate comfort

Inserted in the evening, the suppository melts and its ingredients act directly on the rectal mucosa, right next to the prostate.

Relax

Acetyl hexapeptide-1
& pentapeptide-18

Men with prostate complaints often feel pressure, tension and pain in the pelvic and rectal area. The BOTOX - LIKE peptides help release this tension, easing the pressure and discomfort that come with prostatitis and an enlarged prostate.

Protect

Dimethicone & lubricating
base

Forms a protective layer on the mucosa that reduces friction and irritation, keeping the area comfortable through the day, even with long sitting.

Hydrate

Sodium hyaluronate

Keeps the mucosa hydrated and supports its natural regeneration and elasticity.

Soothe

Seven plant extracts

Oak bark, horse chestnut, marigold, chamomile, pumpkin seed, frankincense and Centella asiatica calm and protect the mucosa and ease the discomfort of congestion and irritation that so often comes with prostate complaints.

The relief men feel: less pressure, burning, pain and discomfort in the pelvic and rectal area — and a better quality of life.

Who it's for

Adult men with prostate complaints:

- Acute and chronic prostatitis
- Benign prostatic hyperplasia (enlarged prostate)

as supportive local care when there is pressure, burning or pain in the pelvic and rectal area.

Because prostate complaints often come with anorectal problems, PROSTARELAX also helps with internal hemorrhoids, anal fissures, and irritated or dry rectal mucosa.

Ingredients

Extract of pedunculate oak bark (0.04 g), extract of horse chestnut seeds (0.04 g), extract of marigold flowers (0.04 g), extract of chamomile flowers (0.04 g), sodium hyaluronate (0.002 g), pumpkin seed extract, frankincense extract (*Boswellia serrata*), Centella asiatica extract, laureth-9, dimethicone, **acetyl hexapeptide-1**, **pentapeptide-18**, PEG-32, polysorbate 20, PEG-20

How to use

1 suppository once a day, inserted into the rectum – preferably in the evening before sleep, after hygiene and ideally after a bowel movement.

Wash hands and the area before and after use. Open the blister by pulling apart the two cut tabs.

Product facts

Product	fytofontana PROSTARELAX rectal suppositories
Category	Medical device, CE 2265
Pack	10 rectal suppositories in blister
Box size	57 × 29 × 110 mm
Storage	5–25 °C, protected from sunlight
Shelf life	36 months from production
Language versions	EN / DE / ES / IT and CZ / SK / PL / HU
