

About us

Since 2008, Protolis has specialised in **rapid prototyping** and **low-volume manufacturing** of quality plastic, metal, and silicone parts.

We assist customers worldwide with our team of **40+ experts** based in **Asia and Europe**.

- 15** years of experience
- 1,000** projects per year
- 30** countries, countless satisfied customers
- 7** production methods
- 200+** plastic and metal materials

Our Production Methods

3D Printing

Plastic CNC Machining

Metal CNC Machining

Vacuum Casting

Rapid Injection Molding

Compression Molding

Extrusion

Sheet Metal

Our Production Capabilities

Our in-house workshops use diverse production methods, ensuring **high-quality products** backed by rigorous **quality control**.

15+ finishes to enhance visual appeal, boost performance and elevate your product's overall quality.

200+ production grade **plastics and metals** available and ready to manufacture.

Fast turnaround times so you get your parts in 7 days from quote to delivery with our efficient project follow-up.

Your Project in 5 Steps

Get your plastic and metal prototypes or production parts in no time. A **flexible organization** providing a personalized response to your need without setbacks.
