

Regional Health Supplies Hub

Barbados is advancing a Regional Health Supplies Hub to transform how essential health products reach countries across the Caribbean. The Hub would serve as a regional consolidation and distribution gateway for products sourced through the PAHO Revolving Fund and Strategic Fund, mechanisms that serve 42 countries and territories and provide access to a broad portfolio ranging from vaccines and essential medicines to diagnostics and medical devices.

By aggregating shipments through Barbados, the model can address the challenges of small markets, fragmented demand, frequent shipments and high logistics costs, while strengthening the speed, resilience and sustainability of regional supply chains. **One regional gateway. Smarter distribution. Stronger health security.**

**If you move products at scale,
come talk to us.**
