

novonesis

Revolutionizing Enzymes for Diagnostic and Biopharma Industries

At Novonesis, we specialize in creating novel recombinant enzymes tailored to the required technical parameters, all at scalable prices

Identification

of novel recombinant enzymes for diagnostics and biopharma

Creation

of high-yielding expression strains for competitive pricing

Optimisation

of technical parameters for optimal performance

Production

of recombinant enzymes in crude form, ready to be purified to high grade products

novonesis

Looking for a partner?

We are seeking collaborators capable of purifying our recombinant enzyme material and commercializing the product

Peptide
manufacturing

Cell
culture

Regenerative
medicines

We offer:

- Ready-made recombinant enzyme products for distribution in diagnostics and biopharma
- Collaboration opportunities to co-develop recombinant enzyme products to close market gaps
- Let's meet over coffee to discuss potential partnerships!

Contact us to explore collaboration opportunities and learn more about our innovative recombinant enzyme solutions
