

Where Dedication Delivers Value

Who we are?

Driven by science. Powered by partnership. Next-generation CDMO with a relentless passion for quality biologics. We deliver advanced CDMO services that expand access to life-changing therapies.

End-to-end CDMO solutions

Cell line development

High-yield mammalian cell lines tailored for fast timelines & manufacturability

Drug substance development

High-yield mammalian cell lines tailored for fast timelines & manufacturability

Analytical development

Phase-appropriate, method-qualified testing for quality control & release

Drug product development

Proven expertise aligning formulation, device, and packaging strategies with clinical needs

Clinical & commercial drug substance manufacturing

Flexible capacity, inspection-ready operations, highly competitive pricing

SUPPORTING SERVICES

- ✓ Device development
- ✓ Regulatory support
- ✓ Tech transfers
- ✓ Process characterization
- ✓ PPQ
- ✓ DP GMP services via qualified external partners

End-to-end services

Mirrored equipment and capabilities, processes and analytical approaches enable seamless and rapid scale up and tech transfer projects to serve clients worldwide.

Warszawa-Duchnice, Poland

Commercial scale

The large, state-of-the-art GMP facility offers full technical development and commercial-scale manufacturing with single-use bioreactor capacity up to 2'000L.

Gdańsk, Poland

Clinical development & manufacturing

Full technical development and medium-scale GMP manufacturing center, with expertise in clinical development, regulatory affairs, and IP management.
