

Elevate Your Biopharma Freeze-Drying with RheaVita

Discover the power of **controlled, continuous freeze-drying** for premium biologics

Our Products

- **RheaLyo™ Mono** – Fast, small-scale R&D continuous freeze-dryer. Dry product in hours, not days
- **RheaLyo™ Multi** – Scalable R&D freeze-dryer, for stability batch productions
- **RheaLyo™ GMP-Flex series** – The only commercial continuous freeze-drying system allowing GMP production of pharmaceuticals – minimal tech transfer

Our Comprehensive Services

- **Feasibility studies** – Evaluate and develop the RheaLyo™ freeze-drying process for your formulation
- **Stability batch production** – Produce your freeze-dried samples for preclinical purposes on aGMP-ready line
- **Continuous Lyo Academy** – Customized training on freeze-drying fundamentals and controlled and continuous freeze-drying technology

Key Value Points

Controlled processing	→	Minimal vial-to-vial variability
Continuous processing	→	Maximal supply chain flexibility and formulation
Dry product in hours, not days	→	Fast, efficient process development
Minimal scale-up tech transfer	→	Faster time-to-market, less waste
Fast, variable crystallization speeds	→	Optimal ice structure for compound integrity and drying time

Why RheaVita?

As the only commercial provider of GMP-ready continuous freeze-drying for biologics, RheaVita delivers faster, scalable, and cost-effective solutions from R&D all the way to GMP production.

Upgrade your lyophilization strategy—accelerate development, enhance product quality, and streamline manufacturing.
