IMPACTING HUMAN LIVES POSITIVELY

NOVALUBE®- SODIUM STEARYL FUMARATE

NOVALUBE™ SODIUM STEARYL FUMARATE is a Hydrophilic Lubricant, suitable for API's having poor water solubility and incompatibilities with magnesium stearate. Preferable Lubricant to manufacture ODT tablets and effervescent powder formulations.

Features of Sodium Stearyl Fumarate

- NOVALUBE ™ (SSF) has a superior effect on tablet hardness and the required ejection force in the tabletting process
- NOVALUBE ™ (SSF) improves the disintegration and friability characteristics of the tablets
- Due to the less hydrophobic nature it has a little impact on the dissolution profile of the drug from the tablets

Parameters to be considered while using NOVALUBE ™

- Lower concentrations of NOVALUBE ™ (SSF) should be used in formulations as compare to the conventional lubricants.
- Proper studied should be done before replacing the conventional lubricant.
- NOVALUBE ™ (SSF) is recommended for high value low volume tablets due to its higher cost.

Grades

SODIUM STEARYL FUMARATE (BP /IP/ USP/ NF)

NITIKA

Product Benefits

- QbD Support for Formulation Development
- Fine Particle size 4-10 µ
- High Surface Area >3m²/g
- Significantly Lower Impurity Profile
- Excellent Whiteness Index >90%

Certifications

- EXCiPACT
- WHO GMP Certified
- DMF Available
- HALAL Certified
- FDA Certified
