## IMMUNE BALANCE

RODINKplus™ award-winning clinical study ✓

RODINK™

Oral administration  
1 vial a day  
in the morning

Recommended duration of use  
40 consecutive days before trying to conceive

Oral administration  
10 ml once a day  
in the morning

Recommended duration of use in  
the first 3 months of pregnancy

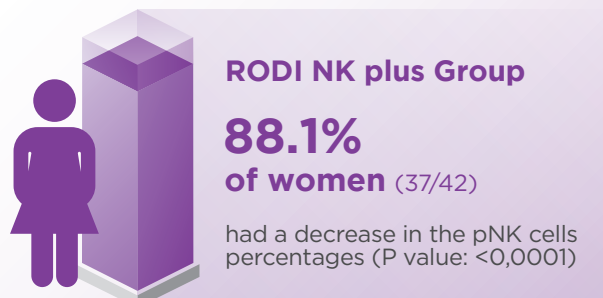

### BEFORE PREGNANCY

Backed by an award-winning clinical study and a patented technology, **RODI NK plus™** contributes to the normal function of the immune system when trying to conceive.

### DURING 1ST TRIMESTER OF PREGNANCY

**RODI NK™** is a key ally for immune equilibrium while expecting a baby. Its patented technology is specifically formulated to continue supporting women during the first three months of pregnancy contributing to the normal function of the immune system.

Source: Anosia 2019; 15, 1: 3 - 9

42 women with multiple miscarriages and implantation failures who had elevated levels of peripheral NK cells, took **RODI NK plus™** for 40 consecutive days. After the use of **RODI NK plus™** 88,1% of women had a statistically significant decrease of NK cells in the peripheral blood.

# IT'S ALL ABOUT THE EGG

## RODIOVA™

Oral administration

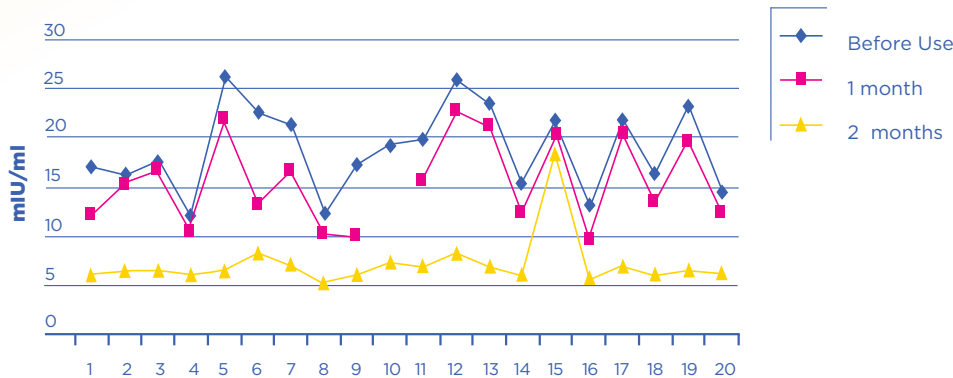

Recommended to take for 3 months before trying for a baby

2 times a day in the morning and at night

**When FSH is above 15IU/mg the success rate of delivering quality eggs is reduced to less than 5%.**

20 women were advised to take RODI OVA for 2 consecutive months. After use it helped significantly reduce FSH and LH (below 10 IU/ml), enhancing egg production and quality.

**FSH before and after the use of RODI OVA**
