

Leading Global Saccharine Manufacturer

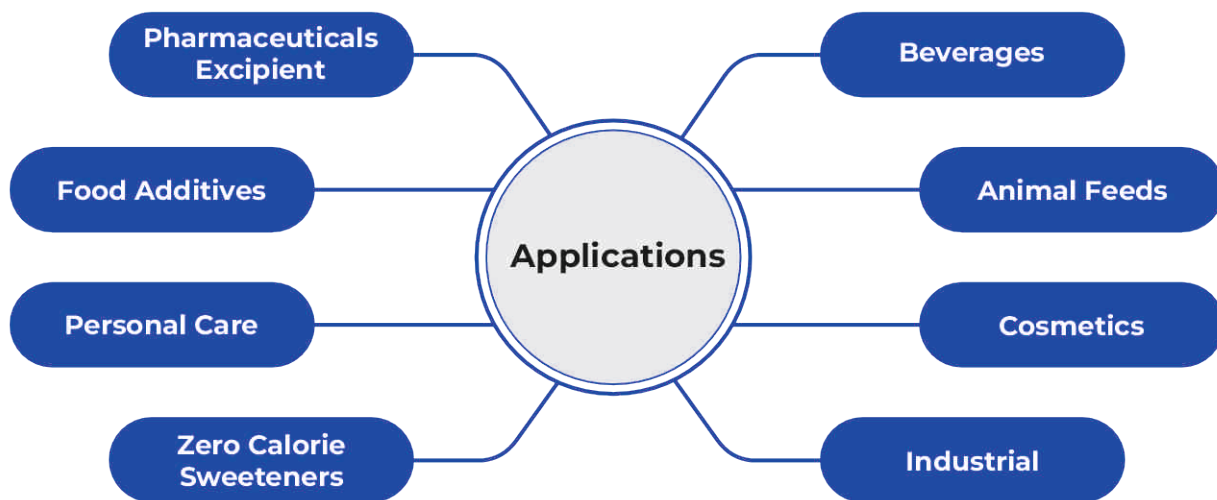

| SACCHARIN

Saccharin and its salts are recognized world-wide as a safe sweetener approved by various authorities including USFDA for use in food, beverages, oral care and pharmaceuticals. saccharin has no calories and a glycemic index (GI) of zero. Saccharin is not absorbed or broken down by the body and has no effect on blood sugar levels. It is therefore considered as an important sugar substitute to help combat diabetes and obesity. Saccharin is also heat stable up to at least 250°C . Therefore, saccharin is commonly used in table-top sweeteners, candies, cookies, drinks, mouthwashes, toothpastes, tobacco products

The first commercially available artificial sweetener has been used for over 100 years as a sugar substitute!

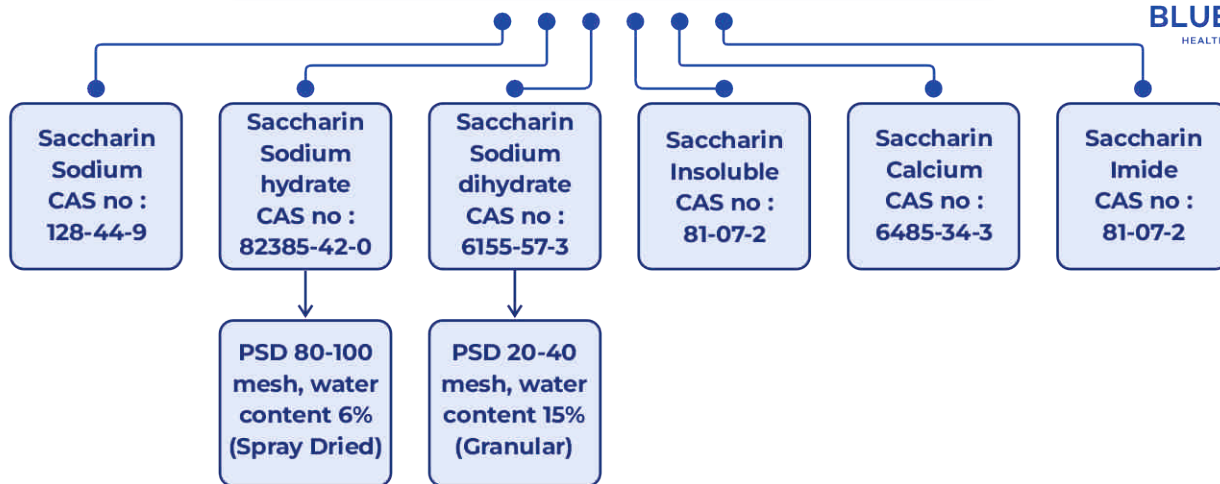

| BLUEJET SACCHARIN

Since 1968, Blue Jet has been recognized as 1st manufacturer of Saccharin Sodium in India. Blue Jet has used 57 years of accumulated technological expertise and skilled workforce to become one of today's global market leader and largest manufacturer of Saccharin Sodium based in India. The in-house fully backward integrated production ensures the highest purity products which leads to the highest quality of Saccharin.

OUR VALUE PROPOSITION

1st Manufacturer
of Saccharin Sodium

3000 MT of
Annual Capacity

cGMP Compliant dedicated
semi-automated Manufacturing Block

Indigenous Sourcing
of Raw Materials

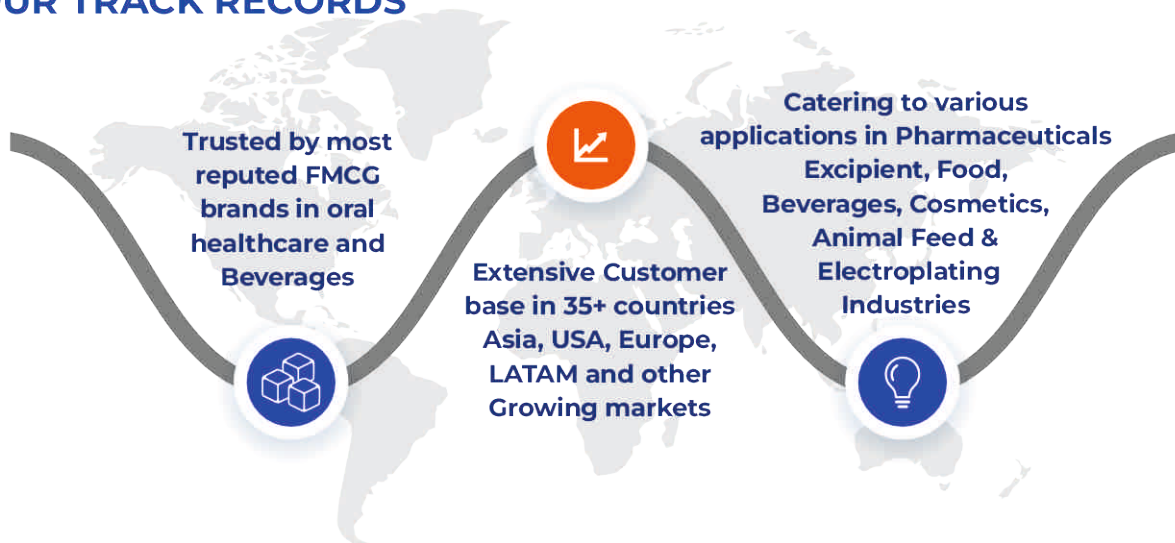

Ensures consistency in quality, taste
and impurity profile

Customized Packaging
Solution 25kg-1Mt big bag

Backward Integrated & Multiple
streams of same Unit Operations

Environmentally sustainable, dedicated
distillation system, solvent recovery
system & effluent treatment system
