Sanzyme Biologics®

**DELIVERING VALUE
THROUGH SCIENCE**

About Sanzyme Biologics

Sanzyme Biologics is a pioneer in probiotic manufacturing with over five decades of expertise in microbial fermentation.

With a legacy of innovation and a focus on quality and science, Sanzyme partners with customers globally to deliver reliable and effective health solutions.

Established as an Indo-Japanese venture with technology roots from Sankyo, Japan, the company combines a strong scientific foundation with advanced manufacturing capabilities.

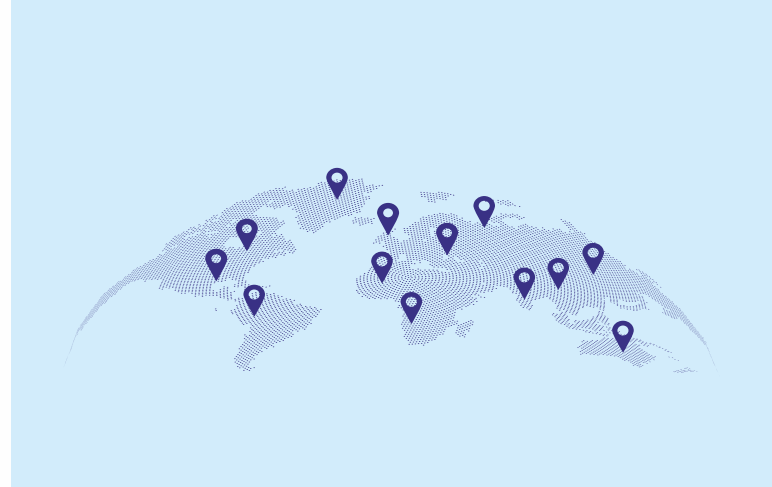

Headquartered in Hyderabad, India, Sanzyme Biologics develops and manufactures research-backed probiotic ingredients and fermentation-derived solutions for pharmaceutical, nutraceutical and food applications.

Our Credentials

- Over **50 years of expertise in microbial fermentation**
- Established **Indo-Japanese heritage** with technology from Sankyo, Japan
- **First company to manufacture probiotics in India**
- **400+ employees** with strong scientific and technical capabilities
- Presence across **40+ countries globally**
- Privately held, **CRISIL A1+ rated company**
- **30+ PhDs** supporting research, development, and innovation
- Proven track record of delivering **safe, effective and consistent products**

Certification

Our Capabilities

- **Advanced microbial fermentation expertise** with over five decades of experience
- **State-of-the-art manufacturing facilities** with dedicated plants for bacteria and yeast production
- Integrated capabilities from **strain development to commercial-scale manufacturing**
- **High fermentation capacity (>350,000L)** ensuring scalability and consistency
- Strong focus on **quality, compliance, and global regulatory standards**
- Robust processes ensuring **product stability, efficacy and performance**
- Ability to support applications across **pharma, nutraceutical and food industries**

Introduction | Our Journey

Founded As Uni Sankyo,
First Indo Japanese Venture

1969

Technology transfer from
Sankyo Japan

1972

Formulation export to
Sankyo Japan

1979

Sales & Marketing operations
launched in India

1988

1993

Expansion into
manufacturing of enzymes

2011

Established as an independent
entity as Sanzyme

2017

Fermentation business unit
created as Sanzyme Biologics

2024

Established
Sanzyme Biomolecules

Our Product Portfolio

Probiotic Strains

Bacillus coagulans (or)
Lactic acid bacillus

Bacillus clausii

Bacillus subtilis

Saccharomyces boulardii

Lactic acid bacillus
Pellets

Finished Formulations

Probiotic oral suspension

Bacillus clausii oral suspension
(2/4 Bn CFU per 5 ml ampoule)
