

Supply Planning Made Simple

SCmple is purpose-built for clinical and commercial pharmaceutical companies, bridging the gap between spreadsheet-based planning and large cross-industry systems. By replacing spreadsheets with a best-practices-based solution and avoiding the cost and complexity of generic tools, SCmple delivers real-time visibility, fast and collaborative planning, secure scalability, and seamless data integration. The result is better decision-making, lower supply risk, and reliable delivery of life-saving medicines.

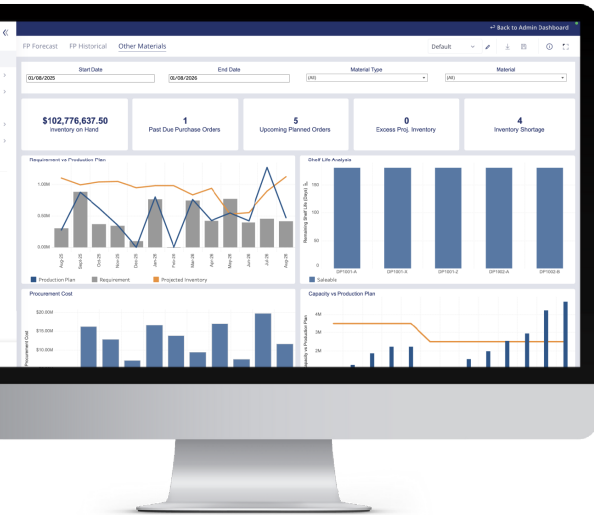

Enhance supply planning accuracy through reliable, data-driven planning with minimal IT overhead.

Increase efficiency with streamlined planning without enterprise-level complexity

Scale with confidence with solutions that support growth and GMP principles.

WHAT SCMPLE DELIVERS

Simplify Supply Planning while improving Accuracy, Agility, and Collaboration

Quickly replace manual spreadsheets with an easy-to-use planning solution.

Maintain reliable supply continuity and control costs.

Build compliance confidence with GMP-based processes and proven workflows.

Enable better collaboration with CDMOs and suppliers.

Gain real-time visibility into production, inventory, and materials.

Improve responsiveness to changing demands and market conditions.
