SOFTGROUP

Semi-automatic aggregation
machine with top view camera

SoftGroup® SaTT AS with a top view camera is an aggregation semi-automatic machine.

This model allows scanning of the whole layer of bundles/cartons in the case as well as a few case layers without any additional settings.

The machine scans each printed 2D Data Matrix code printed on the cartons and prints aggregation labels (with SSCCs). Additionally, the aggregation, deaggregation and reaggregation process on case level could be managed through this module. It provides possibilities to decommission SSCC case aggregated numbers with respective reasons.

MAIN FUNCTIONALITIES

- Aggregation of various sizes of the cartons
- Scan 1D and 2D Data Matrix barcodes
- Verification of 2D Data Matrix codes according to the EU and RU requirements as well as GS1 standards
- Print of aggregation label, including 1d barcode
- Reworking station mode – possibility to check the barcode string and to decommission the aggregation number (SSCC) with the respective reason

KEY FEATURES

- The highest quality of supplementing equipment
- Simultaneously scanning up to 100 serialized cartons on one layer
- Large touchscreen display
- User-friendly interface
- Aggregation/Deaggregation/Reaggregation bundles/ cartons and Decommissioning labels at a case level
- This module ensures various format flexibility of boxes and cases
- The software and hardware could be adapted according to the requirements and standards for different markets such as Europe, CIS countries, MENA region, North Africa, etc.
