# Our Expertise

## Microbiology Testing

At Gibraltar Laboratories we offer a full complement of compendial testing to support your products. We perform everything from rapid sterility testing to virology/molecular biology and antibiotic testing to help get your products to market.

## Chemistry Testing

Gibraltar Laboratories offers a wide range of services in wet and analytical chemistry. Our expert staff of scientists perform analysis or compendial release testing for raw materials and drug products on a daily basis.

## Other Routine Testing

Since 1970 we have been partnering with medical device, pharmaceutical, and biopharmaceutical companies. We perform a variety of testing to support your product validation, internal quality processes, product release, and environmental and water systems validations.

**Safeguarding Global Health®** – with every test we complete.

As a Nelson Labs company, Gibraltar Laboratories is part of a global provider of more than 700 microbiological testing and analytical chemistry laboratory services.

Our global network enables us to serve customers where they need us – when they need us.

With the addition of Nelson Labs Europe and Gibraltar Laboratories, our 13 global locations are comprised of eight fully integrated laboratories within Sterigenics' sterilization facilities and five stand-alone laboratories.

## Microbiology Services

### Full Compendial Support

- Rapid Sterility Testing
- Rapid 72 Hour Yeast/Mold Testing
- On Site Environmental Monitoring
- Antibiotics
- Mycoplasma
- USP <61/62> for solids, liquids and transdermal patches
- Detection of Burkholderia cepacia
- Media fills

### Cleaning Validations, Molecular Biology, Virology, & Research

- Cleaning Validations
- Western Blot Analysis
- Adventitious Agents
- Viral Studies
- PCR Detection
- ELISA
- EPA Disinfectant Testing

## Analytical & Wet Chemistry Services

### Release Testing for Raw Materials & Drug Products(USP, EP, JP, & BP)

- Assay of Raw Materials & Finished Products by Gas Chromatography (GC) or HPLC
- FTIR & UV/VIS for identification of samples
- Atomic Absorption
- TOC as indirect measurement of organic molecules
- Stability Studies per ICH/FDA
- Residual Solvents
- Elemental Analyzer
- Photostability/Forced degradation
- Dissolution Studies
- Elemental Impurities Analysis by ICP/MS
- Identification of low-level EO residuals

### QC Chemistry & Method Development / Method Validation Compendial

## Site Qualification Assessment

The Gibraltar Laboratories locations have been assessed to the Nelson Labs' quality standards following strict ISO 17025 requirements and GMP regulatory expectations for a testing lab.

You can know that the same strict Nelson Labs quality standards apply to Gibraltar Labs—without the need to audit each location.

Contact us for a complete qualification packet.
