

PROFILE

Sinocompound was founded in 2008 with headquarter located in Zhangjiagang city, Jiangsu province, China. Sinocompound focuses on metal catalysts, ligands, and high-purity electronic chemicals. Our company has adopted ISO9001, ISO14001 and OHSAS18001 international quality and environmental management system certification, and belongs to the Jiangsu Provincial High-Tech Enterprises.

With 10 years of investment in research and development, Sinocompound has grown to be the leading manufacturer in catalysts and high-purity organometallic compounds. We have successfully developed series of metal catalysts and ligands. Our products include metal complexes, ligands based on Phosphorus, Nitrogen, Oxygen, chiral ligands and catalysts, and high-purity electronic chemicals. In 2013, we licensed from MIT on the production of Buchwald ligands and catalysts.

Our research facilities occupy 4,500 m² (48,437 sq ft) of the laboratory space at Zhangjiagang headquarter, with a research team comprised of expert chemists. The establishment of a Joint Laboratory with Nanjing University further enabled us to provide customer synthesis and catalyst screening services. Located in Chizhou city, Anhui province, Sinocompound's 33,500 m² (8.2 acres) of manufacturing facilities provide a scale-up production capability with a proven track record.

WHAT WE CAN DO ?

WHAT OUR PRODUCTS CAN DO?

1 Cross-Coupling

2 Asymmetric Catalysis

Suzuki-Miyaura Reaction, Heck Reaction, Buchwald-Hartwig Coupling, Asymmetric Hydrogenation, ... etc.

We have plenty of experience in catalysts and our products have been successfully used in many fields, for more information, please get in touch with us on our website: www.sinocompound.com
