

How outsourcing can transform your stability storage

✚ Scalable capacity

Enjoy the freedom to scale your stability storage up or down without any minimum contract. Get exactly the amount of storage you need, whenever you need it.

€ Control costs

With Q1 Scientific's 'Pay for Use' model, you can eliminate waste and avoid hidden maintenance, service, and security expenses. Enjoy peace of mind with no unexpected facility costs.

✓ Expert support

Count on our experts for help and guidance, ensuring you navigate any challenges and optimise your stability storage.

€ Save on infrastructure

Reduce your capital investment by minimising the need for extensive storage facilities and infrastructure.

⚠ Manage risk and compliance

Benefit from stability storage at cGMP facilities with extensive validation, quality systems, 365/24/7 security monitoring, backup power and systems.

👁 Complete visibility

Access your sample documentation and upcoming sample pull dates 24/7 through the secure Q1 Scientific portal.

↑ Maximise space

Free up valuable space and resources at your site, allowing you to focus on your core operations without the hassle of space constraints.

📅 Reliability and trust

Rely on our proven track record and trusted reputation to ensure your samples are in safe hands.

Q1 Scientific – Global Capacity

Q1 Scientific operates in 3 strategic locations worldwide and is part of Cambrex, which boasts a presence in 14 locations globally.

Secure storage for every stage of your product lifecycle

Your breakthroughs deserve the right conditions

Managing stability storage in-house can be complex, time-consuming, and resource-intensive. By outsourcing your stability storage, you can optimise your stability program, reduce staffing and equipment costs, minimise risks associated with outdated equipment or missed stability pulls, and address compliance challenges.

Imagine the peace of mind that comes with knowing your samples are stored under optimal conditions. With a 100% on-time sample pull rate and facilities equipped with 24/7 monitoring and backup systems, we ensure unparalleled reliability and security for your samples.

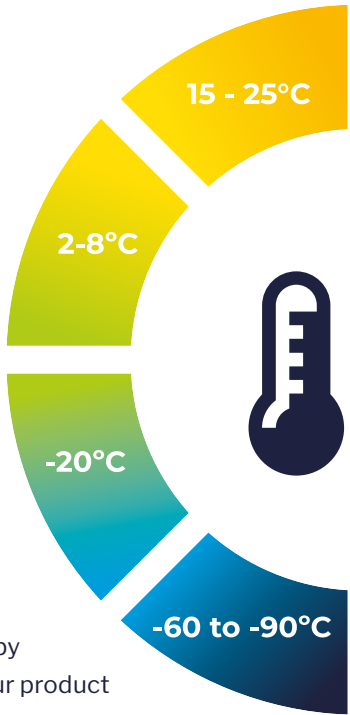

For a secure, reliable, and cost-effective solution to storing your pharmaceutical and medical device stability samples under any ICH or custom temperature and humidity condition, choose Q1 Scientific.

GDP storage that protects product quality at every step

At Q1 Scientific, we understand that once a product is ready for market, the stakes are high. Our GDP-certified storage facility in Belgium is designed to ensure that your authorised pharmaceutical and healthcare products are kept in tightly controlled conditions, preserving product integrity and protecting patient safety.

Whether your products are heading to clinical sites, pharmacies, hospitals, or distribution hubs, we offer secure, compliant storage that meets EU GDP standards. With GDP-certified storage conditions from -90°C to 15 - 25°C, backed by 24/7 monitoring and robust quality systems, we safeguard your product until its final journey to the patient.

Stability study solutions

Stability storage -80°C to +50°C with full humidity control, adhering to standard ICH and custom R&D conditions	Thermal cycling Simulate shipping conditions to assess product resilience, meeting ICH Q1A (R2) standards
Photostability Ensure product efficacy and safety under light exposure, adhering to ICH Q1B guidelines	Disaster recovery Protect against unforeseen events with our comprehensive disaster recovery services

Ensuring stability, protecting innovation
