

STABLE ISOTOPES

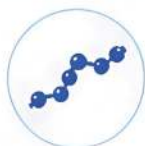

Stable isotope-labeled compounds for tracing, quantification, and mechanistic studies

7,480+ Products

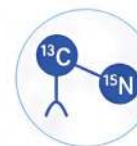

» PRODUCT LINE OVERVIEW «

1. Isotope-Labeled Amino Acids and Peptides

2. Deuterated Reagents & Solvents

3. ¹³C / ¹⁵N Labeled Compounds

4. Isotope-Labeled Drugs and Metabolites

5. Inorganic and Gas Reference Standards

6. Products Supporting Isotope Analysis

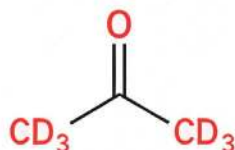

» FEATURED PRODUCTS «

Ammonium nitrate -¹⁵N

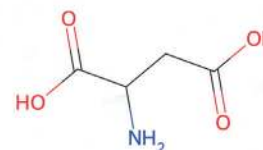

CAS: 31432-46-9

Acetone-D₆

CAS: 666-52-4

L-Aspartic acid-¹⁵N

CAS: 3715-16-0

» PRODUCT ADVANTAGES «

High Quality & Reliability

Strict quality control ensures high product purity, accurate and reliable labeling positions, and excellent batch-to-batch consistency

Comprehensive Information

Detailed isotope information, including labeling positions and enrichment levels, supports research applications

Wide Applications

Suitable for research and applications in drug discovery, metabolomics, proteomics, analytical testing, and more

Fast Delivery

Sufficient inventory and efficient logistics help ensure fast and on-time delivery

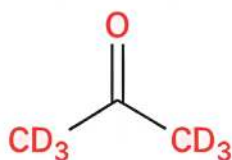

» FEATURED PRODUCTS «

Ammonium nitrate -15N

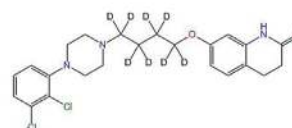

CAS: 31432-46-9

Acetone-D6

CAS: 666-52-4

Aripiprazole-d8 (Butyl-d8)

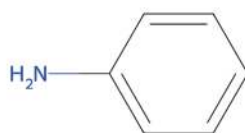

CAS: 1089115-04-7

Fmoc-Ala-OH-15N

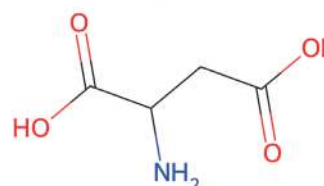

CAS: 117398-49-9

Aniline-d7

CAS: 14545-23-4

L-Aspartic acid-15N

CAS: 3715-16-0

» APPLICATION AREAS «

Drug Discovery

Drug target discovery and validation, pharmacokinetic studies, and efficacy evaluation

Analytical Testing

LC-MS, NMR, and other analytical method development and quantitative analysis

Metabolomics

Metabolic pathway studies, biomarker discovery, and mechanism analysis

Proteomics

Quantitative protein labeling, post-translational modification studies, and interaction analysis

Research Experiments

Experimental method development, mechanistic studies, and tracer experiments
