

WHO ARE WE?

Experts in the **VH₂O₂** decontamination market for the pharmaceutical industry, we develop **flexible and tailored solutions** to meet the specific needs of our clients.

For more than 20 years, we have been ensuring the **design, manufacture, and installation** of all our solutions.

OUR EQUIPMENTS

DosyMist CS®

Fully integrated solution

DosyMist XL®

Automated solution for larger spaces

DosyMist®

Mobile solution, easy to handle

NeutraMist®

Solution for H₂O₂ catalyst

APPLICATIONS

We address a wide range of applications. From **small pass-throughs** to rooms of **several thousand cubic meters**, our technology is versatile to meet the specific requirements of each application.

- Clean rooms
- MAL SAS, Pass-throughs
- RABS, Isolators
- Laminar flow hoods

OUR STRENGTHS

- ✓ Robust and reliable products
- ✓ Customized solutions
- ✓ Solutions meeting your needs and constraints

- ✓ Data integrity 21 CFR Part 11 Audit Trail
- ✓ 6LOG performance - EN 17272
- ✓ Traceability and reproducibility

SOLIDFOG TECHNOLOGIES

Surface Disinfection by H₂O₂ Nebulization

OUR EXPERTISE
AT YOUR SERVICE

www.solidfog.com

DECONTAMINATION

Need for occasional decontamination?

Solidfog provides tailor-made decontamination services that meet your specific needs. Our team can quickly carry out a fully documented decontamination cycle with accurate and reproducible results.

- 1 Identification of your needs and development of a **suitable solution**
- 2 Cycle execution following a **specific protocol**
- 3 **Complete GDP compliant report**

CONSULTANCY

Need advice on defining your needs, designing/writing URS, or in qualification stages?

We support our clients through our knowledge of the process to help them choose the right solution.

- ✓ **Assistance and support** for writing and executing various protocols:

FAT | QI/QO | SAT | Cycle Dev. | Validation

MAINTENANCE & CALIBRATION

An after-sales support that meets the highest quality standards

Solidfog provides you with high-quality support for preventive maintenance and periodic calibration. Our after-sales service team performs inspections in compliance with GMP and GDP regulations.

- ✓ **Complete traceability** is ensured through documented protocols and digitized specific reports.

Our VH₂O₂ Technology

- **No pre-conditioning phase required:** technology operating effectively across a wide range of temperatures and relative humidity levels
- Controlled **reproducibility:** time savings in QP
- **Optimized cycle duration:** faster aeration
- **Cost-efficient:** low biocide concentration
- **Efficacy compliant** with international standards
