

Your specialist pharmaceutical packaging and labelling partner

About US

SVUS is a Pharmaceutical Packaging and Labelling specialist and as all companies with a combination of time built understanding and a vision for the future, comes with a deep and enriched history.

Established in 1923 during a complex and changing environment and nearly 25 years after we aligned ourselves as a partner for pharma packaging, the global landscape for the pharmaceutical marketplace, is still equally as complex and challenging in its changes. The growing demands to protect product integrity and increase consumer safety are the demands of our futures.

Today's world needs creative and collaborative partnerships, working together to win in this competitive economy. Our flexible service capabilities, quality, and project management enables you to leverage our expertise to drive the results for your supply chain projects.

Pharmaceutical packaging is an essential arm of your supply chain. Country, Regional and localised distribution, requires more than a simple 'tell and do supplier' can achieve. Today the experiences and abilities of SVUS are leveraged to meet each of your products distribution and supply chain needs.

This is a complex partnership and requires flawless execution. SVUS has a proven history in such aligned partnerships and is structured to provide the reliability required to meet the demands of both global and regional pharmaceutical companies selling their products in ways that suit their individual product portfolios.

Our customers trust our expertise to be an extension of their operations for large and small batch runs. Working with tablets, capsules, injectables and vials, for market access, product launch or simply as an extra capacity to release production bottle necks for continued supply chain distribution.

How we go about working with you

SVUS Project management and your Packaging and Labelling projects

SVUS has added value Project Management processes. These processes firmly established the quality controls and underpin the purchasing of vital components. We enable strong communication channels and are adept at reporting to you via secure electronic channels. Our project Managers and their attention to detail are why our partners can trust and rely on us for their product launches. We understand fully that every delay, every misunderstanding, each misalignment can adversely affect your product release and market presence.

We look for the bigger picture in your needs to understand where hurdles may arise in the future, so timely discussions can be programmed. We work as your partner, bringing On-Time, On-Spec and On-Budget successes.

Current certifications include

- ◆ Holder of certificate Good Manufacturing Practice (cGMP).
- ◆ Holder of permission to store and handle narcotic and psychotropic substances (NPS).
- ◆ Holder of the license to manufacture non-sterile solid, single-dosage medicinal products and packaging of medicinal products delivered in primary packaging.

Advantages of partnering with SVUS

- ◆ Geographical positioning in central Europe, offering distribution advantages and leveraged financial benefits.
- ◆ Flexibility of meeting complex portfolio supply chain needs for individual countries.
- ◆ Production flexibility set for volumes of both millions, thousands and even hundreds when specifically required.
- ◆ Available infrastructure in physical space to develop growth to meet dedicated production needs when partnering on a long-term understanding.
- ◆ Strong project management teams bringing an On-Time, On-Spec and On-Budget relationships.
- ◆ Trust, we are not in the business of extracting unsustainable benefits. We are in the business of transparent and professional partnerships.

We look forward to meeting you and discussing where we can support and offer solutions you are looking for.
