

GENAIZ

We've created a novel, ethical, and data compliant AI solution that massively increases workflow efficiency across Life Sciences applications.

We move code. Not data.

Accuracy
on specific GxP related solutions

Good Practice (GxP) leaders in Pharma, Biotech, CRO and CDMO manufacturing and R&D – face a perfect storm and choppy waves. High data volumes and variable data quality. Enormous budget, headcount, and time to stay compliant. Low commercialization success rates. And the accelerating pace of innovation and disruptive AI.

Enter ethical, compliant AI-powered automation, tailored for Life Sciences. Enhance operational excellence and decision-making. Unlock growth. Turn regulatory compliance and complex environments into a strategic advantage. And stay ahead of continuously evolving compliance needs: GxP, FDA, EMA, GDPR, and more.

GenAlz Platform

Human UI

Intelligent Solutions

Off-the-shelf packages for common workflows:
ConformityCheck.AI, DueDil.AI, FileSub.AI, LitReview.AI,
RiskRelief.AI

Smart Functions

Containerized AI and analytics

Triggers

Connectors

Data Mesh

SDK

Orchestration

Ethical

White-box, human-in-the-loop AI that is accessible, auditable, explainable and traceable.

Dedicated AI

Rapidly assemble and deploy tailored workflows.

Compliant

Incapable of breaking compliance rules, with computer system validation (CSV) acceleration, AI validation, and quality-by-design based on the most stringent European regulations.

Containerized Smart Functions

Lightweight, flexible and modular GenAlz and 3rd-party models and data: ML, NLP, OCR, open information extraction, neural networks, reinforced learning, statistics and clustering models, custom semantic search engine, etc.

Safe and Sovereign Data

GenAlz goes to the data, not the other way around, with a virtual air gap and Data Mesh Infrastructure that keeps data local and supports specific client security policies.

Connectors

Quickly ingest data from almost any internal or external repository: LIMS, QMS, RegDocs365 from CourtSquareGroup, PubMed, FDA and HC databases, and more.

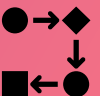

Skills Building

Empower employees to build AI skills with an intuitive, non-technical user experience that helps them leverage data and AI autonomously.

Triggers

Monitor events, allowing comprehensive actions to execute over the pipeline.

Book a Demo

Improve collective well-being by accelerating the creation of new treatments on the market.
