

FISCHER®
LIFE SCIENCE. PACKAGING SOLUTIONS.

Safe - Low particle - Standard sizes

Tub and Nest

Provider of **complete solutions** for your
pharmaceutical packaging products.

Particle Cleanliness from Production to Deployment

The tubs and nests go through a fully automated removal and packaging process:

- Removal of parts from the tool
- Placement of parts and stack formation
- Packaging of stacks, including labeling

All process steps are conducted under cleanroom conditions.

Cost Efficiency

- Significant reduction of TCO (Total Cost of Ownership)
- No investment required in tools or other operational resources

Flexibility

- Standard items with short lead times
- Compatible with common loading and filling systems

Quality

- Established materials (PS and PP)
- Suitable for common sterilization processes
- Shape-stable
- Enables sterile filling of syringes
- Over 20 years of know-how
- Leading reference customers worldwide
- Swiss quality and trust

Application

The tubs and nests are suitable for the following prefillable syringes:

- Nest 100 PP Ø 12.2 (10x10) for 0.5ml, 1.0ml long, and 1.0-3.0ml
- Nest 160 PP Ø 9.4 (10x16) for 0.5ml and 1.0ml long

Certification

- GMP Class C and ISO 7
- ISO 13485
- ISO 11040-7
- Institute of Environmental Sciences and Technology's standard IEST-STD-CC1246 (level 200)

Tub 96

TECHNICAL SPECIFICATIONS

Item Number	Description	Color	Quantity per pallet	Dimensions in mm				Material type
				A	B	C	D	
0170091	Tub 96	white	792	260	227	97	24	PS
0170095	Tub 96	transparent	792	260	227	97	24	SBC & SMMA

Standard Quantity per Pallet

- Disposable pallet 120 x 80 cm
- Standard height approx. 225 cm
