

Engineered for Compliance.
Driven by Innovation.

VALIDATED AUTOMATION

Validated Automation that moves you forward

BBS Automation helps life sciences companies grow faster, stay compliant, and bring products to market sooner—with one trusted partner from first concept to full production.

One Global Source for your Validated System Needs in Life Sciences and Beyond

Deep Expertise. Global Compliance. Scalable Innovation.

Designed to meet global standards including cGMP, ISO, FDA, and EMA. Our systems provide the traceability, consistency, and speed life sciences manufacturers rely on.

Automation Across the Product Lifecycle

FROM **CONCEPT**

TO **COMMERCIAL SCALE**

Proof-of-Principle

- Early-stage technical validation
- Direct collaboration with device designers and product owners
- Examples: Concept demos, feasibility studies, risk mitigation insights

Semi-Automation & Piloting

- Small-batch, semi-automated lines or pilot-scale production
- Integrated collaboration with moulders, sterilization, and early production teams
- Typical stakeholders: Drug developers, fill-finish experts, equipment suppliers

Full Production Integration

- Fully automated solutions
- Seamless integration with CMOs, internal manufacturing, and quality systems
- Scalable systems engineered for compliance, quality, throughput, and lifecycle support

Regulated Healthcare Solutions

NEEDLES & SYRINGES

DRUG DELIVERY DEVICES

TUBES, IV SETS

DIAGNOSTICS

MEDTECH DISPOSABLES

LABWARE

OPHTHALMIC

RESPIRATORY DRUG DELIVERY

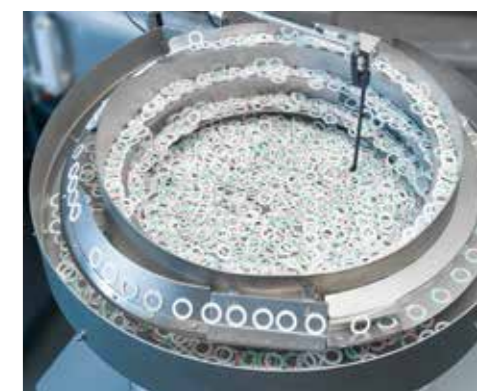

YOUR BENEFITS AT A GLANCE

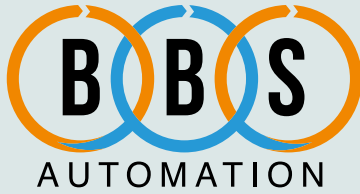

- Turnkey automation from PoP to commercial scale
- Support in every stage of greenfield development
- Virtual commissioning to de-risk and accelerate deployment
- Cleanroom-ready platforms built for scale and regulatory compliance
- Global service coverage with secure remote diagnostics
- Lifecycle support and upgrade paths to extend system value

Our Technologies for Advanced Manufacturing

- Integration of Injection Molding Processes
- Loading & Take-out Systems
- Precision Feeding & Part Handling
- Modular Conveyance Systems
- Robotic Handling & Motion Systems
- Precision Assembly Modules
- Vision Inspection & Quality Control
- In-Line & End-of-Line Testing
- Automated Tray Handling
- Palletizing & Depalletizing Systems
- Flexible & Adaptive Automation Platforms
- Data Integration & Traceability Systems

100 + years of experience
1,000 + customers
10,000 + systems installed
100,000 + sqm production space
