**VIRO  
STOP**

# Stop infections naturally with VIROSTOP

Protective barrier against viruses  
causing upper respiratory infections

[virostop.info](http://virostop.info)

Swiss Quality

# What is Virostop?

## Effective Protection:

VIROSTOP helps shield you from viruses causing upper respiratory infections like cold and flu, providing a natural and effective defense for your respiratory health.

## Patented Blend of Plant Extracts:

VIROSTOP features a unique blend of extracts derived from carefully selected plants, creating a durable, continuous film that protects the mucous membranes of the upper respiratory tract.

**Rich in plant polyphenols, the extracts act as a physical barrier, preventing viruses and bacteria from entering the body and causing infections.**

*Cistus creticus*

*Sage*

*Purple Echinacea*

*Barbados cherry*

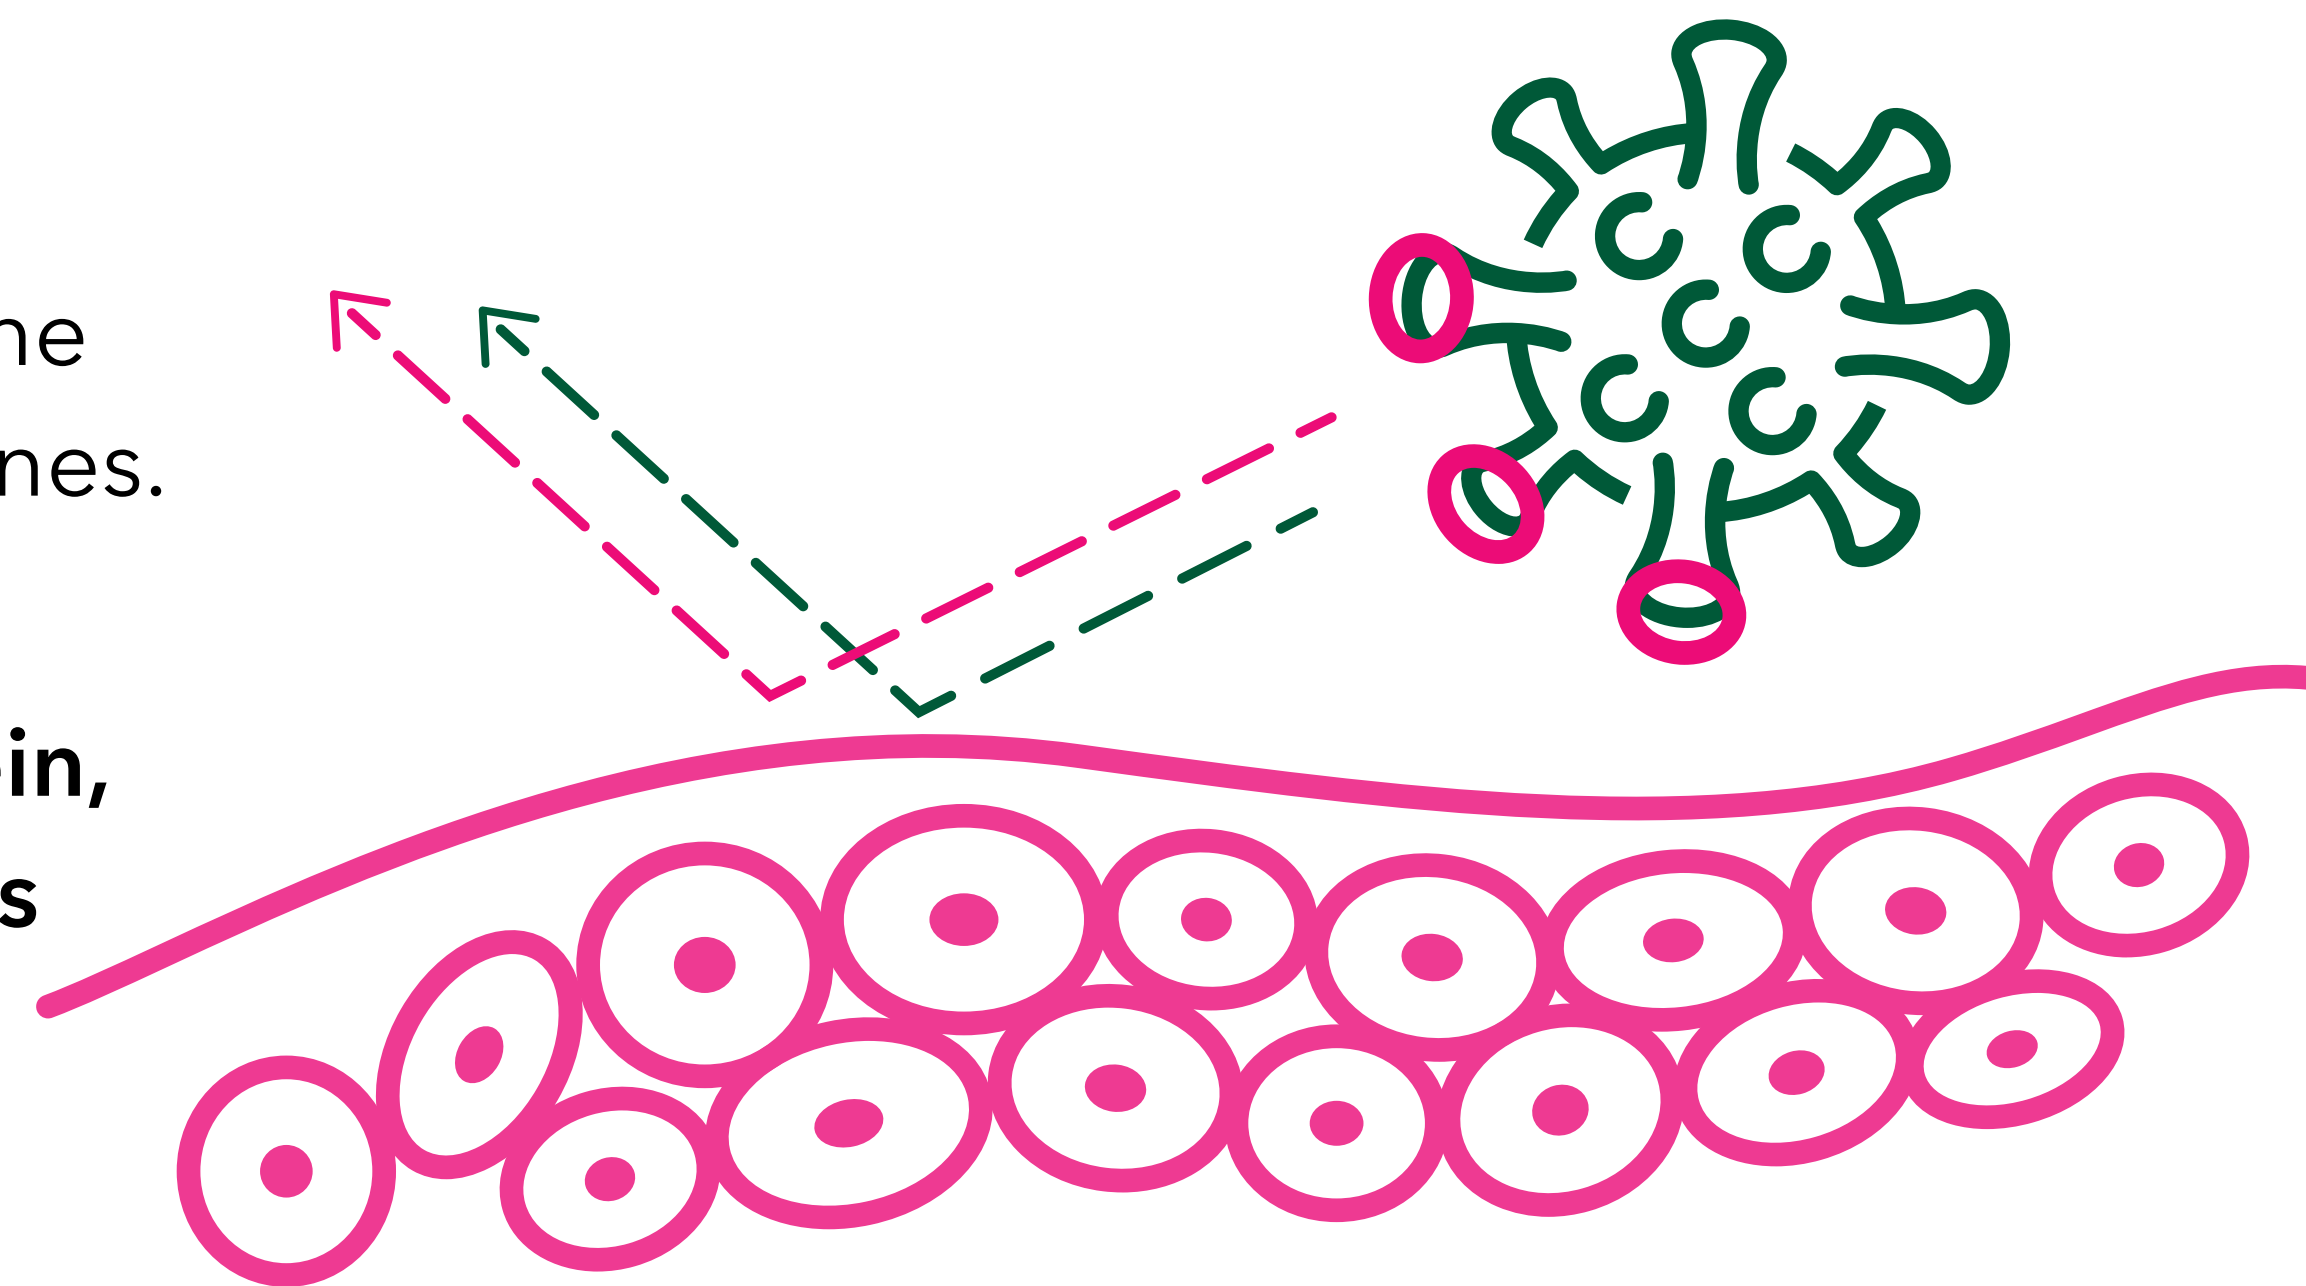

*Citrus bioflavonoids*

# How does Virostop work?

The mucous membrane of the respiratory tract acts as a natural barrier against the entry of viruses and bacteria into our body's cells. However, when there is a high influx of attacking viruses and bacteria, its capabilities can be overwhelmed, allowing pathogens to cause an infection.

**VIROSTOP solution** enhances our natural defenses by delivering a blend of active plant-based substances to the surface of the upper respiratory tract's mucous membranes.

**Special plant polyphenols, when attached to viral protein, mechanically inhibit the function of the protein and thus prevent the virus from entering the cell, preventing the development of infection.**

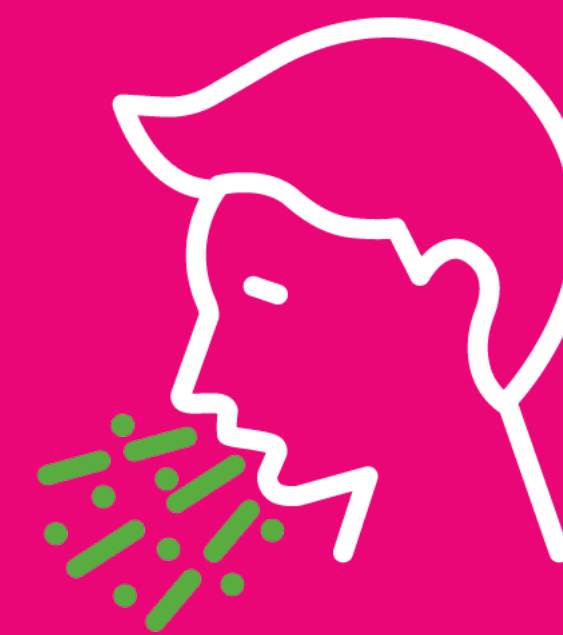

# How to use Virostop?

**Preventatively**

If we are in an environment with an elevated risk of infection, someone in our household, school, or workplace is ill, or if we ourselves are beginning to combat a viral infection, we can support our mucosal immunity with VIROSTOP solution.

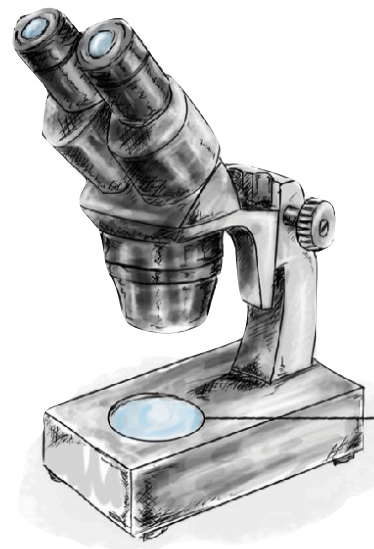

**Symptoms relief**

In cases of an existing infection, these substances can prevent the virus from attacking nearby cells. They help slow the infection's progression and assist in restoring the function of the respiratory tract mucosa.

**FAMILY-FRIENDLY CHOICE | FOR ADULTS AND CHILDREN FROM 6 YEARS OLD**

## ANTIVIRAL EFFECT OF TRADITIONAL MEDICINAL PLANT EXTRACTS AGAINST SEASONAL INFLUENZA VIRUSES and SARS-CoV-2 (In Vitro Study)

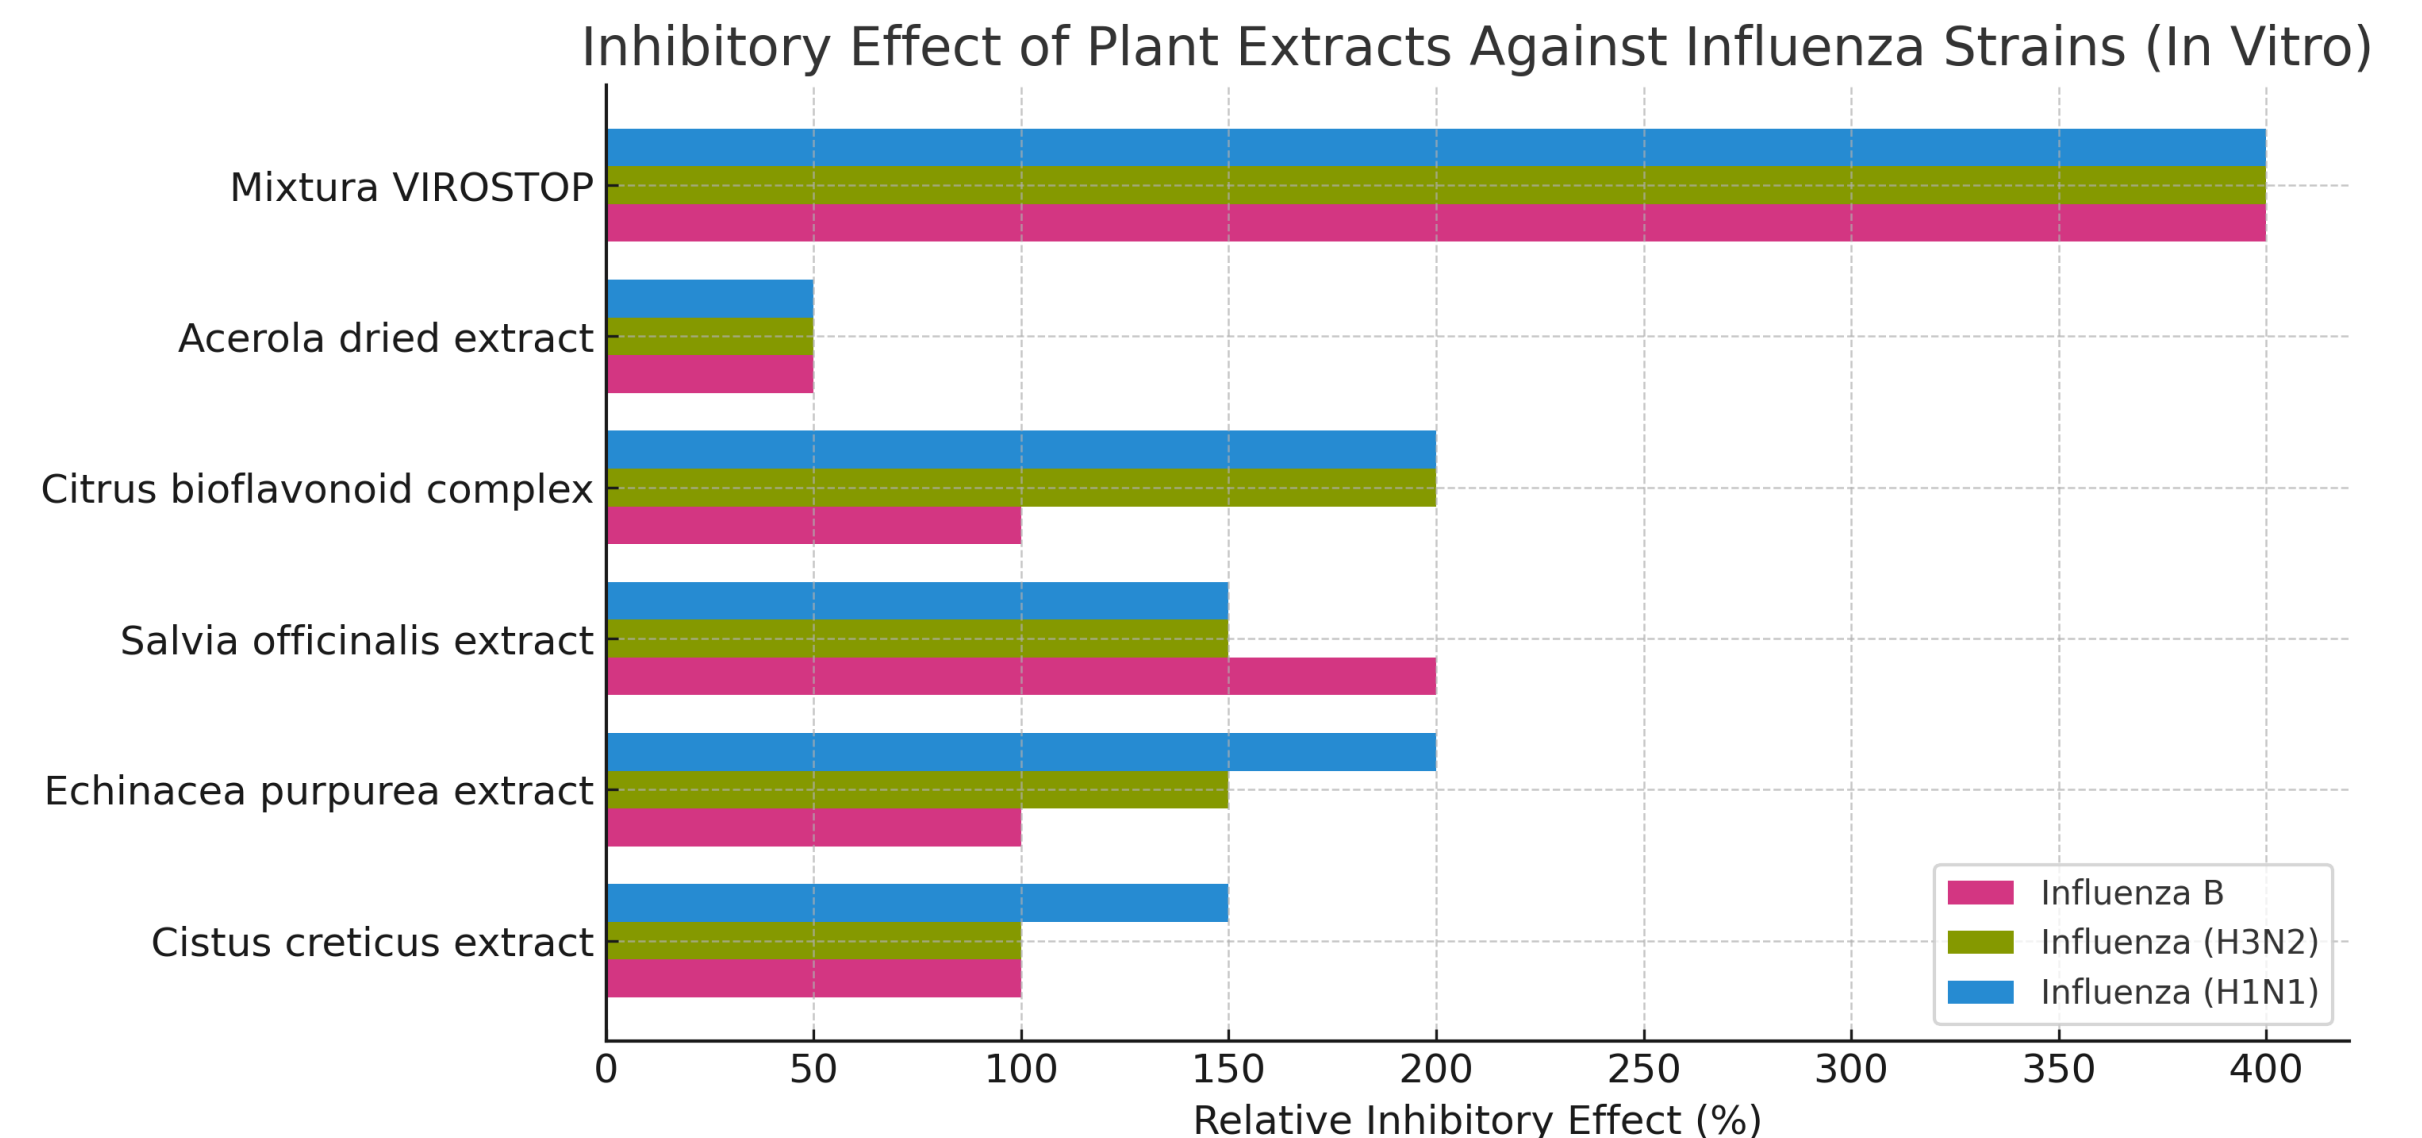

The study evaluated the inhibitory effect of extracts from selected medicinal plants on the replication of seasonal influenza virus strains (types A H1N1, A H3N2, B) and SARS-CoV-2 in cell culture. Researchers tested each extract individually and in combination, focusing on the formulation known as **VIROSTOP Mixtura**.

**Key findings from the study are as follows:**

**Enhanced Effectiveness of Combined Extracts:** The combined extracts in VIROSTOP Mixtura demonstrated up to **twice the antiviral effectiveness** compared to individual components. The formulation inhibited both **seasonal influenza strains** and **SARS-CoV-2**, confirming a broad-spectrum antiviral action.

**Synergistic Action:** The plant extracts- *Cistus creticus* eriocephalus, *Echinacea purpurea*, *Salvia officinalis*, Citrus bioflavonoid complex, and Acerola extract- contain diverse polyphenols.

Their combination produced an enhanced inhibitory effect through **synergistic interaction between different polyphenolic structures**, resulting in stronger antiviral potency without cytotoxicity or resistance risk.

# VIROSTOP ORAL SPRAY

- This product forms a protective film in the oral cavity and throat.
- It prevents the development of, and alleviates symptoms associated with, acute upper respiratory infections (cold&flu).
- The spray ensures easy and uniform application of the solution across the entire mucosa.
- Only natural active substances, pleasant mint herbal taste.

## USE

- Start using it as soon as you experience a scratchy throat, sneezing, or other early symptoms of flu or cold.
- It's also suitable for situations with an elevated risk of infection.

## Packaging

30 ml

## Key Advantages of VIROSTOP

Compared to Other Cold&Flu OTC Products on the market:

**Natural Ingredients:** Natural-based active ingredients with proven efficacy are missing from the flu and cold shelves. Safe for long-term use, free from harsh chemicals.

**Provides a Comprehensive Solution:** Addresses root causes rather than just suppressing symptoms.

**Family-Friendly:** Safe for children from age 6, making it ideal for the entire family.

**Proven Market Success:** High sales in Central Europe, where the product has an almost decade-long history, demonstrating reliability and effectiveness. Widely loved by parents, reflecting high satisfaction and trust.

### **Superior Regulatory Certification in the EU:**

- Fully certified under the newest EU Medical Device Regulation (MDR), a distinction no other substance-based product in the cold and flu market has achieved.
- Most competitors still follow the older MDD regulations, which will soon be outdated, leaving many products without valid registration.

**Regulatory Approval in the UK:** Registered with the Medicines and Healthcare products Regulatory Agency (MHRA), ensuring adherence to stringent safety and efficacy standards.
