

Vital Laboratories
Healthcare Naturally

Corporate Profile

Company Profile

Vital Laboratories is a manufacturer of APIs (Active Pharmaceutical Ingredients) and Intermediates

1998

We started our journey with manufacturing Quinine Derivatives

2025

Today we are one of the largest manufacturers of Quinine Derivatives globally. Also, we are the global leader in Hyoscine and Antimalarials

More than 60 APIs

in our product portfolio covering various therapeutic segments

Manufacturing synthetic and phytochemical APIs. Catering to both **Domestic and International Markets.**

Strong portfolio of products having **phytochemistry-based APIs** which involve the process of Extraction from medicinal plants

Besides Phytochemistry-based APIs we have built up a strong portfolio of **Synthetic APIs**

Our Company's strength and its growth is a result of our philosophy to manufacture APIs right from Key Starting Material (KSM). Hence, ensuring backward integration for most of our products is a key to our success.

In pursuit of our endeavor towards backward integration, through the cultivation in our farms in Australia, we have secured our business of Hyoscine derivatives. Similar integrations in other businesses have strengthened Vital's position as a reliable partner.

With every climb, we push boundaries of healthcare.

Vital is not just an organization — we are pioneers scaling new heights to make care accessible, innovative, and human-centered.

2009

Vital acquired RedPaw, an Australian company, to ensure backward integration for supply of Dubosia leaves (Hyoscine Butyl Bromide)

2013

Established a Production Block dedicated to extraction of Phytochemicals.

2025

Increased capacity for Artemether, Lumefantrine and Hyoscine Butyl Bromide.

2002

The second plant, now known as Plant II, was set up at Vapi, Gujarat for manufacturing of APIs

2016

Established a fermentation block to manufacture small-volume fermentation-based APIs

2024

Nimesulide receives ANVISA approval, demonstrating our commitment to meeting the stringent regulatory requirements.

1998

Vital Laboratories Private Limited was incorporated as a manufacturer of APIs.

2017

Vital envisages its sustainability goals by setting up a 2MW Windmill at Rojmal in Gujarat.

2020

The company starts a Greenfield project to set up a new API block, with commercial production starting in April 2024.

Why Vital

Because quality isn't a choice, it's our promise.

Our agile, backward-integrated approach ensures that every product we create brings dignity, comfort, and happiness to families.

Customer-centric & Agile

Dynamic and Agile Vital is one of the fastest growing companies with its renewed customer-centric philosophy

Quality & Regulatory Compliance

Focused on nurturing quality and regulatory compliance culture

Operational Excellence

A process-driven approach in everything we do to excel in both Phytochemistry and Synthetic chemistry-based products

Market Driven

Proactively aligned to exceed marketplace dynamics and to stay ahead of completion

Backward Integrated

Experienced RCD scientists are committed to achieving cost-leadership through backward integration, non-infringing processes and leveraging technology

Cohesive & Decisive Organization

Empowered teams work cohesively to keep improving efficiencies, effectiveness and productivity

Cost Leadership and Supply Security

Our success stems from our philosophy of producing APIs from the ground up, emphasizing vital backward integration with:

- Economies of scale
- Efficient operations
- Strategic inventory
- Strong supplier relationships

Key Products

Phytochemistry-based

- Hyoscine Derivatives [our Duboisia Farms]
- Artemisinin Derivatives
- Quinine Derivatives
- Thiocolchicoside
- Colchicine
- Digoxin
- Vinpocetine
- Yohimbine

Synthetic chemistry-based

- Methylcobalamin
- Hydroxychloroquine Sulphate
- Acyclovir
- Moxifloxacin Hydrochloride
- Cetirizine Dihydrochloride
- Diacerein
- Nimesulide
- Mefenamic Acid
- Nicorandil

Backward Integrated - Our Duboisia farms (for Hyoscine/Scopolamine) in Australia

Our Local **EDGE-** Speed, Price and Quality at scale

Our Global **EDGE-** Compliance, Consistency and Continuity across borders

Thank you!
