

# Securing your products with trusted packaging solutions

## Experience innovation and efficiency

With over 50 years of experience, we offer comprehensive solutions for planning, packaging, and shipping needs. Our extensive expertise in the pharmaceutical cold chain and a proven track record of product protection reinforces World Courier as your trusted partner.

## Discover our proprietary packaging solutions

### Cocoon

The breakthrough temperature-controlled packaging solution that set a new standard for volumetric weight efficiency. As the first of its kind in the market, Cocoon established a benchmark for multi-use, passive cold chain systems, with its ability to handle larger payloads flexibly. Available in various sizes and temperature configurations, with real-time location monitoring as standard, we have the right solution tailored for you.

### Global thermal container (GTC)

Discover the blend of cost efficiency and temperature control with our reusable GTC shippers. Available in a wide range of sizes from 4L to 96L, it offers comprehensive size and temperature options while ensuring product safety during transit with phase change material (PCM) panels. Real-time location monitoring is included as standard, for added peace of mind.

### Global dry ice (GDI)

Secure deep-frozen transport with GDI, with in-transit replenishment of dry ice as needed, using our extensive global network. This robust shipper offers uniform performance and reporting globally and can be tailored from 7L to 80L for precision payload size.

## Why choose World Courier?

With our deep expertise in pharmaceutical cold chain logistics spanning over 50 years World Courier is your trusted partner for comprehensive planning, packaging, and shipping needs.

Our extensive global network and proven track record in safeguarding products make World Courier packaging solutions the optimal choice for navigating complex supply chains and regulatory landscapes.
