INFLAMMATORY STATES OF THE UPPER AIRWAYS, FEVER, COUGH

Hederasal®
syrup, 125 g

Hederasal® syrup contains dry ivy leaf extract (*Hederae heliis folii extractum siccum*), which has an expectorant and relaxant effect on bronchial smooth muscles. Reduces the frequency and soreness of coughing attacks. Thins the thick secretions in the throat, larynx and bronchi. Facilitates expectoration, relieves cough reflex, does not block cough reflexes.

A herbal medicinal product used as an expectorant for productive cough (wet cough with difficult expectoration of residual thick secretions).

Dry ivy leaf extract (*Hederae heliis folii extractum siccum*) - 430,55 mg (DER 4-8:1), extraction solvent: ethanol 30% (m/m).

potassium sorbate,
anise essential oil,
propylene glycol,
liquid non
crystallizing sorbitol
70%, purified
water

Children from 2 to 5 years old - 2 to 3 times a day with a 2,5 ml measuring cup or 1/2 teaspoon.
Children from 6 to 11 years old - twice a day with a 5 ml measuring cup or 1 teaspoon.
Adults and adolescents from 12 years old - 3 to 4 times a day with a 5 ml measuring cup or 1 teaspoon. Should not be given to children less than 2 years of age.
Tips for diabetics: the drug does not contain sucrose. Can be used by people with diabetes. 1 teaspoon (6.2 g or 5 ml) of syrup contains 3.36 g of D-sorbitol, which corresponds to 0.28 Bread units (BE).

INFLAMMATORY STATES OF THE UPPER AIRWAYS, FEVER, COUGH

Echinasal®
syrup, 125 g

Echinasal® is a herbal product containing an extract composed of ribwort plantain leaf, grindelia herb and rose fruit; extract of thyme herb, and juice of the purple coneflower herb. Echinasal® is traditionally used as a stimulant for body immunity.

The product is a traditional herbal medicinal product for use in specified indications exclusively based upon long-standing use. Echinasal® is traditionally used as a prophylactic agent during periods of reduced immunity. Supportively, syrup is used in mild inflammatory conditions of the upper respiratory tract with cough (e.g. in common cold).

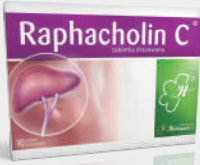

Extract composed (1:4,4) of:
Plantaginis lanceolatae folio (3 parts),
Grindeliae herba (1 part), *Rosae fructus* (1 part) - 5 g,
extractant: ethanol 50% (v/v)
Thymi herbae extractum (1:4) - 3 g,
extractant mixture: ethanol 30% (v/v),
glycerol, ammonia water 25%,
Echinaceae purpureae herbae succus (1:1) - 2 g.
The syrup contains up to 1% (m/m) ethanol.

sucrose, purified
water, currant
concentrate

Administration to children under 3 years of age is not recommended.
Children 3 to 7 years of age - 1 teaspoonful 3 to 4 times a day if justified.
Children from 7 up to 12 years of age - 1 tablespoon (15 ml) 2 times a day.
Children over 12 years of age and adults - 1 tablespoon (15 ml) 3 to 4 times a day.
The duration of treatment should not be longer than 10 days. If symptoms get worse or persist over several days, consult your doctor.
For prophylactic use (e.g. during periods of increased respiratory infections), half the dosage should be used.
Children from 3 up to 7 years of age - 1 teaspoonful 2 times a day if justified.
Children from 7 to 12 years of age - 1 tablespoon (15 ml) once a day, children over 12 years of age and adults - 1 tablespoon (15 ml) 2 times a day.
The use as prophylactic agent requires a multi-day administration; however, not longer than 20 days.
