Ecosystem for the
process industry

Economic Efficiency & Scalability

GETEC PARK.MUTTENZ

GETEC PARK.STEIN

As a leading specialist operating industrial parks in Europe, GETEC provides sustainable, fully managed and cost-efficient industrial ecosystems.

An industrial park is a purpose-built campus for innovation, research, production, and businesses, enabling the companies on site to benefit from shared infrastructure and services. GETEC develops, finances, implements and operates industrial parks in key locations across Europe, with companies taking advantage of our comprehensive approach to reliable energy supply, wastewater treatment, facility management, logistics and much more.

For park tenants, getting the full scope of energy, utilities and services from a single source minimises economic risks and reduces expenditure while offering synergies and opportunities for collaboration and business growth. GETEC continuously advances the efficiency and sustainability of industrial parks by leveraging renewable energy and circular-economy practices.

Expertise across Europe

With strong customer relationships and a prioritisation on quality, GETEC has the experience, expertise and dedication to provide reliable energy solutions that enable companies to focus on their core business. Learn more about our industrial parks.

Full-service ecosystems

GETEC industrial parks offer customers a holistic infrastructure and service package that reduces operating costs and provides access to state-of-the-art energy and sustainable infrastructure without upfront investment.

GETEC PARK.MUTTENZ

The ideal location for future-proof research and production within a powerful industrial ecosystem.

GETEC PARK.MUTTENZ is an innovative and integrated industrial park located near Basel, in Switzerland. With state-of-the-art infrastructure, reliable energy solutions and comprehensive services, the MuttENZ location enables chemical and life sciences companies to achieve their corporate and sustainability goals. The park has an advanced network of established production companies and qualified service providers, with close collaboration and valuable synergies along the entire value chain. Companies also benefit from flexible design options, financial agility, uninterrupted operation, access to experienced specialists and economies of scale that optimise operating costs.

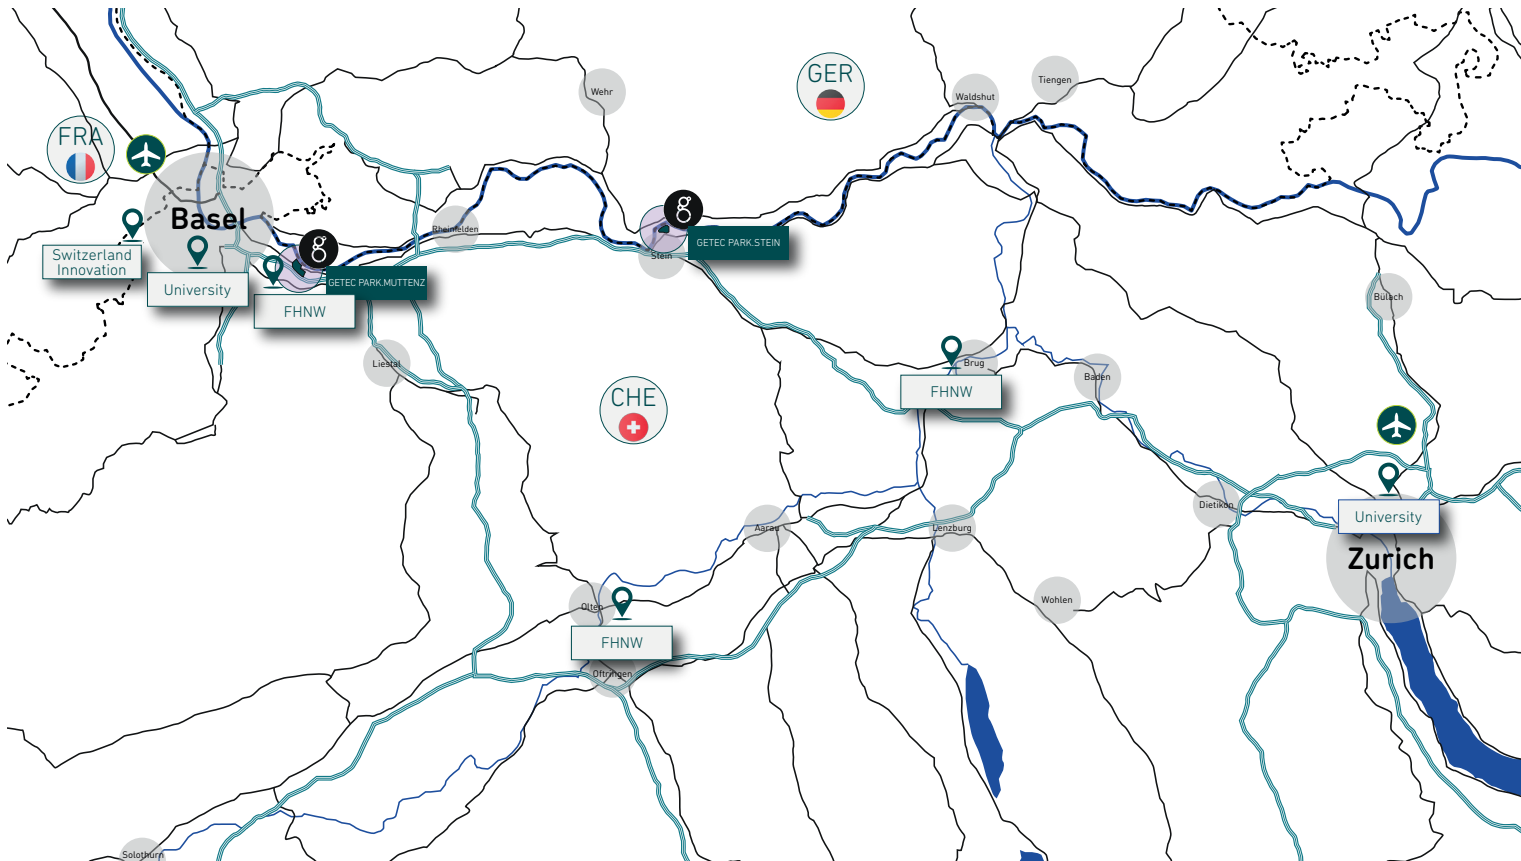

GETEC PARK.STEIN

Connecting companies, research institutions and service providers to accelerate knowledge transfer and cooperation.

GETEC PARK.STEIN is a specialised life sciences park strategically located between Basel and Zurich, in Switzerland. As a leading ecosystem in central Europe for innovation and growth in the life sciences industry, this state-of-the-art park enables companies to fast-track the time to market, optimise their core business and reduce operating costs. Companies benefit from the existing infrastructure and ready-to-use buildings, with flexible concepts ensuring business operations commence within short time frames. The cluster-like green field settlements offer proximity to leading life sciences, neutraceutical, cell therapy and high-tech companies, to further knowledge exchange and enable companies to achieve sustainable success.

Your strong Partner

GETEC Switzerland is the reliable partner for industria companies that value cost efficiency, regulatory security, efficient logistics and long-term competitiveness. The strong customer focus and the broad infrastructure offer guarantee smooth integration and development at the new location.
