

List of References by Aspen API

January 2026

Contains:

- List of PEPTIDES references
- List of STEROIDS & OLIGONUCLEOTIDES references

List of PEPTIDES references by Aspen API:

1. Eggen IF, Ten Kortenaar PBW. Process for the preparation of peptides. Patent No. US 6,864,357, 8 March 2005.
2. Eggen IF, Ten Kortenaar PBW, Haasnoot CAG. Process for rapid solution synthesis of peptides. Patent No. US 7,435,791, 14 October 2008.
3. Eggen IF. DioRaSSP: The future in peptide manufacturing. *Speciality Chemicals Magazine* 2003; **23**(8): 42-44.
4. Eggen IF, Bakelaar FT, Petersen A, Ten Kortenaar PBW. Combined approach gives rapid synthesis of peptides. *SP2* 2003; **2**(9): 34-35.
5. Eggen IF, Ten Kortenaar PBW. A novel method for the synthesis of peptides in solution. *Innovations in Pharmaceutical Technology* 2004; **4**(14): 123-127.
6. Eggen IF, Bakelaar FT, Petersen A, Ten Kortenaar PBW. DioRaSSP®: Diosynth Rapid Solution Synthesis of Peptides. In *Peptide Revolution: Genomics, Proteomics & Therapeutics*, Chorev M, Sawyer TK (eds.). American Peptide Society: San Diego, 2004; 57-58.
7. Borsuk K, van Delft FL, Eggen IF, Ten Kortenaar, PBW, Petersen A, Rutjes FPJT. Application of substituted 2-(trimethylsilyl)ethyl esters to suppress diketopiperazine formation. *Tetrahedron Lett.* 2004; **45**: 3585-3588.
8. Eggen IF, Bakelaar FT, Petersen A, Ten Kortenaar PBW. DioRaSSP: Diosynth Rapid Solution Synthesis of Peptides. *Org. Process Res. Dev.* 2005; **9**: 98-101.
9. Eggen IF, Bakelaar FT, Petersen A, Ten Kortenaar PBW, Ankone NHS, Bijsterveld HEJM, Bours GHL, El Bellaj F, Hartsuiker MJ, Kuiper GJ, ter Voert EJM. A novel method for repetitive peptide synthesis in solution without isolation of intermediates. *J. Peptide Sci.* 2005; **11**, 633-641.

10. Eggen IF, Bakelaar FT, Petersen A, Ten Kortenaar PBW. DioRaSSP®: Diosynth rapid solution synthesis of peptides. In *Peptides 2004*, Flegel M, Fridkin M, Gilon C, Slaninova J (eds.). Kenes International, 2005; 323-324.
11. Eggen IF, Bakelaar FT, Ten Kortenaar PBW, Adermann K, Forssmann W-G, Schulz A. Rapid solution-phase synthesis of a 20-mer peptide according to the DioRaSSP method. *Supplement to Chimica Oggi/Chemistry Today; Focus on Peptides & Amino Acids* 2005; **23**: 21-24.
12. Eggen IF, Bakelaar FT, Ten Kortenaar PBW, Adermann K, Forssmann W-G, Schulz A. Rapid solution-phase synthesis of a 20-mer peptide according to the DioRaSSP® method. In *Understanding Biology Using Peptides*, Blondelle SE (ed.). American Peptide Society, 2005: 156-157.
13. Profits from peptides: new deals and investments. *SP2* 2006; **5**(2): 18-22.
14. Eggen IF, Bakelaar FT, Bijsterveld HEJM, El Bellaj F, Fluitsma KFC, Heijnemans LCJA, Kuiper GJ. Synthesis of octreotide according to DioRaSSP®. In *Peptides 2006*, Rolka K, Rekowski P, Silberring J (eds.). Kenes International, 2007; 738-739.
15. Critical parameters in DioRaSSP® (Diosynth Rapid Solution Synthesis of Peptides): Racemization of amino acid derivatives during activation and basic deprotection. Presentation by D.J. v. Zoelen at the 9th International Symposium for Solid Phase Synthesis (Norwich, 2007).
16. Eggen IF, Boeriu CG. Selective enzymatic hydrolysis of C-terminal *tert*-butyl esters of peptides. Patent No. EP 1 979 370 B1, 17 March 2010.
17. Eggen IF, Boeriu CG. Process for the conversion of C-terminal peptide esters or acids to amides employing subtilisin in the presence of ammonium salts. Patent No. EP 2 167 673 B1, 5 January 2011.

18. Boeriu CG, Eggen IF, van Zoelen DJ, Bours GH. Selective enzymatic hydrolysis of C-terminal *tert*-butyl esters of peptides. In *Peptides for Youth*, Del Valle S, Escher E, Lubell WD (eds.). American Peptide Society, 2009; 115-116.
19. Gini F, Eggen IF, van Zoelen D-J, Boeriu C. Application of proteases in the C-terminal modification of peptides. *Chimica Oggi/Chemistry Today; Focus on Tides* 2009; **27**(2): 24-26.
20. Boeriu CG, Frissen AE, Boer E, van Kekem K, van Zoelen DJ, Eggen IF. Optimized enzymatic synthesis of C-terminal peptide amides using Subtilisin A from *Bacillus licheniformis*. *J. Mol. Catalysis B: Enzymatic* 2010; **66**: 33-42.
21. Corîci LN, Frissen AE, van Zoelen DJ, Eggen IF, Peter F, Davidescu CM, Boeriu CG. Sol-gel immobilization of Alcalase from *Bacillus licheniformis* for application in the synthesis of C-terminal peptide amides. *J. Mol. Catalysis B: Enzymatic* 2011; **73**: 90-97.
22. Swietlow A, Rode H, Szajek A, Verlander M, Eggen I, Gregg B. Control strategies for synthetic therapeutic peptide APIs - Part I: Analytical considerations. USP evaluates quality attributes for synthetic peptides. *BioPharm. Int.* 2014; **27**(3), 16-21.
23. Eggen I, Gregg B, Rode H, Swietlow A, Verlander M, Szajek A. Control strategies for synthetic therapeutic peptide APIs - Part II: Raw material considerations. USP evaluates raw materials used in the chemical synthesis of peptides. *BioPharm. Int.* 2014; **27**(4), 24-29.
24. Gregg B, Swietlow A, Szajek A, Rode H, Verlander M, Eggen I. Control strategies for synthetic therapeutic peptide APIs - Part III: Manufacturing process considerations. USP's Therapeutic Peptides Expert Panel discusses manufacturing processes and impurity control for synthetic peptide APIs. *BioPharm. Int.* 2014; **27**(6), 42-47.

25. Case study: From screening to scale-up of therapeutic peptide purification. Presentation by N. Zilverschoon at the 5th European Phenoprep Symposium (Barcelona, 2024).
26. Eggen I. Green Continuous LPPS – The future in peptide manufacturing. *Aspen API White Paper*, November 2024.
27. Fate and purge of diastereomers of an API with Prep HPLC. Poster presentation by N. Zilverschoon, L. Heijnemans and S. van Heumen at the Forum for Analytical Science and Technology (FAST 2025, Maastricht).
28. Driving sustainable innovation in peptide API manufacturing – GREEN, LEAN & CLEAN: 25 years of green peptide chemistry at Aspen API. *Aspen API White Paper*, November 2025.
29. Presentations by I.F. Eggen at the following conferences: IBC's Tides 2003: Oligonucleotide and Peptide Technology Conferences (Las Vegas, 2003), 18th American Peptide Symposium (Boston, 2003), 8th International Scientific Update Conference on Organic Process Research and Development (Barcelona, 2003), IBC's 4th Annual Conference: Eurotides (Berlin, 2003), 9th International Scientific Update Conference on Organic Process Research and Development (Osaka, 2004), 3rd International and 28th European Peptide Symposium (Prague, 2004), IBC's 5th Annual Conference: Eurotides (Brussels, 2004), Dutch Peptide Day (Nijmegen, 2005), 19th American Peptide Symposium (San Diego, 2005), 29th European Peptide Symposium (Gdansk, 2006), EDQM symposium for "Impurities control: Setting specifications for antibiotics and synthetic peptides" (together with B.M.M. van Genugten, Strasbourg, 2006), 20th American Peptide Symposium (Montreal, 2007), Informa Tides USA and Tides Europe (virtual, 2020) and Informa Tides Europe (Vienna, 2022).

List of STEROIDS & OLIGONUCLEOTIDES references by Aspen API:

1. Stoelwinder J, Ostendorf M, van Buggenum PAM. Process for the preparation of 7 α -methylsteroids. Patent No. WO2003/059931A1, 14 January 2003.
2. Ostendorf M. Combined synthesis route for Etonogestrel and Desogestrel. Patent No. WO2013/135744A1, 13 March 2013.
3. de Bont L, Dingemans J, Krishnamurthi R. Endocrine-disrupting pharmaceuticals in the environment – How Aspen API is acting to minimize discharges of hormone-based active pharmaceutical ingredients into the environment. *Aspen API White Paper*, December 2021.
4. Koekoek E, van Heijningen-Ramaekers M. UHPLC assay method: interesting alternative for USP GC method. *Aspen API White Paper*, February 2023.
5. Production of a development batch Segesterone Acetate. Poster presentation by L. Steemers at IUPAC|CHAINS 2023 (the Hague, 2023).
6. Benchtop NMR for in-process analysis. Poster presentation by M. Baltussen, M. Lunenburg and P. Nijland at the Forum for Analytical Science and Technology (FAST 2025, Maastricht).
7. Advancing steroid manufacturing with efficiency, sustainability and safety – Clascoterone and Segesterone acetate, new development opportunities in our steroid portfolio. *Aspen API White Paper*, October 2025.
8. de Koning MC, Ghisaidoobe ABT, Duynstee HI, Ten Kortenaar PBW, Filippov DV, van der Marel GA. Simple and efficient solution-phase synthesis of oligonucleotides using extractive work-up. *Org. Process Res. Dev.* 2006; **10**(6), 1238-1245.

9. Ghisaidoobe ABT, de Koning MC, Duynstee HI, Ten Kortenaar PBW, Overkleef HS, Filippov DV, van der Marel GA. A two-step sulfurization for efficient solution-phase synthesis of phosphorothioate oligonucleotides. *Tetrahedron Lett.* 2008; **49**(19), 3129-3132.
